

Dactylicapnos sp. NJM12.042	£7.50	2.00	Collected in the hill country of Manipur, NE India. Forming herbaceous climbing stems to perhaps 3m each year, attaching themselves with tendrils and bearing clusters of bright yellow dicentra flowers in summer. Hardiness unknown, so plant in a protected spot and mulch over in winter. Ht to 3.0mtrs.
Dahlia 'Black Jack'	£5.20		Bred in Austria in 2003, this is a stunning, semi-cactus Dahlia with pointed petals, darkest red, almost black at the edges, becoming deep black towards the centre. has a velvety sheen. Flowers June to the frosts. Green divided leaves. Sheltered, well drained spot in sun or lift tubers. (6-10) 100cm.
Dahlia 'Black Touch'	£6.10		(Fimbriata Group) Tall form with fimbriated, pointed petalled, richest ruby red flowers, almost shading black at the centre over a long period from June to the frosts. Much divided, deep-green leaves. an improvement on 'Arabian Night'. Sheltered, well drained spot in sun or lift tubers. (6-10) 120cm.
Dahlia coccinea	£7.75		Startling, single, medum-small, PURE VERMILLION flowers on delicate airy stems; July to frosts. Green waxy leaves. The parent of many modern hybrids. Lift tubers or mulch in winter. well drained soil in full sun. 90x75cm.
Dahlia cuspidata	£9.25		Only described in 2003, this scarce species from Oaxaca & Hidalgo province in Mexico is rather like a dainty merckii. Very leafy with thick stems having very finely cut, glossy green leaves. Well branched stems carry small rich mauve-pink single flowers from July to the frosts. Hardiness not tried yet. (7-10) 160cm.
Dahlia 'Dark Angel Dracula'	£5.20		(Dark Angel Series) Short, compact form bred specifically for pots. Single, darkest cherry-red flowers with velvet black overtones, darker around the small yellow eye;- summer to the frosts. Darkest brown-black leaves. protect tubers in winter. Well drained sunny spot. (6-10) 40cm.
Dahlia 'David Howard' (AGM)	£5.20		Large, semi-double, fragrant, BURNT ORANGE flowers freely produced against contrasting mounds of smokey-brown foliage; July into September. Not reliably hardy - lift & store tubers in autumn. Fertile soil in sun. 90x60cm.
Dahlia dissecta	£7.85		coll ; - rocky ground in the mountains of Hidalgo and San Luis Potosi at altitudes up to 8,000ft. Small, tufted species Dahlia from Mexico with mounds of very finely dissected, glossy green leaves. Short stems carry single pale lilac-pink to white flowers, usually during early summer. Will need to be assessed for hardiness. (5-7)
Dahlia 'Doctor John Grainger'	£5.20		Dwarf form with tightly packed, pompom like orange flowers, much paler on the outside petals;- June to the frosts. divided green leaves. Rare in cultivation. Protect tubers in winter. Light, free draining soil in sun. (6-10) 40cm.
Dahlia 'Fascination' (AGM)	£4.50		Paeony flowered form, with lilac flowers, in tight, overlapping, tiered buns. Deeply cut, purple brown leaves. May be hardy if mulched, of lifted in winter. Flowers all summer. Well drained soil in full sun. (6-10) 80cm.
Dahlia 'Honka' (AGM)	£5.20		(Single Orchid Flowered) Very unusual, single Dahlia with six, very narrow, lemon yellow petals which are quilled & lightly scented. Large gold centre. flowers from June to the frosts. strong stems with much divided, dark green leaves. Mulch in winter or lift tubers.
Dahlia 'Honka Surprise'	£5.20		Sport from 'Honka' with unusual, single, windmill like rich pinkish-red flowers with the tips of the petals twisted & quilled. The centre is a rich golden-yellow. Flowers June to the frosts. Erect stems with much divided, dark green leaves. Mulch crowns in winter or lift tubers as desired. (6-10) 90cm.

Dahlia imperialis	£7.50	Very imposing foliage plant, only flowering in long, hot summers, but what foliage. Huge, imposing mounds of finely cut, glaucous silver leaves like a huge Melianthus. Good sized single pink flowers if you are lucky. Sheltered, well drained spot in sun. (10-12) 280cm.
Dahlia merckii	£5.80	Slender fleshy stems topped by clusters of small, single, LILAC FLOWERS with yellow stamens; all summer & autumn. Elegant parent of many of modern hybrids. Hardier than many hybrids but may need winter protection. 120x60cm.
Dahlia 'Pooh Swan Island' (AGM)	£5.20	(Anemone Type) Small, single vibrant orange flowers with a gold anemone centre. the tips of the petals are also tipped gold. Flowers July to the frosts. Protect tubers in winter. Light, free draining soil in sun. (6-10) 80cm.
Dahlia tubulata	£9.95	This is a recently described Mexican species & is a big brute of a Dahlia. Spreading, very thick stems, often dark flushed with very large, much cut glossy green leaves. Single, pointed petalled rich lilac-purple single flowers rather late, often in september to the frosts. Hardiness needs to be assessed. (9-11) 1.8x2.5mtrs.
Dahlia 'Twyning's Smartie'	£5.20	(Single Dahlia) Rather amazing, striking small flowered Dahlia with round petalled single flowers with some petals soft dusky-purple, others white, varying in proportion from flower to flower. Gold eye. Flowers June to the frosts. Divided fresh green leaves. Dry, sunny sheltered spot or lift tubers in winter. (6-10) 80cm.
Dahlia 'York and Lancaster'	£5.20	One of the oldest Dahlia hybrids in cultivation, this short form has small, almost pompom like quilled petals, variably red & white bicoloured, all different on the same bush. Thin, almost arching stems with finely cut green leaves reminiscent of a species. Needs good living. protect tubers in winter. Free draining soil in sun. (6-10) 40cm.
Dalea purpurea	£5.20	Rare semi woodlander from Missouri of painfully slow growth, often 4-5 years to flowering. Clumps of very finely cut leaves. Cone like heads of bright cerise-purple, opening in a band up the spike, during late summer & autumn. Important nitrogen fixing plant. Any reasonable soil. preferably in light shade. (8-10) 40cm.
Darmera peltata (AGM)	£6.55	(syn.Peltiphyllum) Striking, rounded heads of 5-petalled lilac-pink flowers held on long, stiff, upright stems; before the leaves in April-May. Large parasol-type, deeply lobed & conspicuously veined, dark green leaves turning red in autumn. Damp areas. To 1.5m.
Darmera peltata 'Nana'	£4.50	syn.Peltiphyllum. From mountain streams in Western USA comes this creeping low rhizomatous perennial with rounded coarsely toothed leaves, turning red in autumn. Roundede heads of small pink flowers are borne with the leaves in early spring. Moist soil. (3-
Dasyilirion miquihuanense F&M 321	£7.95	coll;- La Pena, NE Mexico. Magnificent slow growing species at least cold hardy forming evergreen, symmetrical rosettes of very narrow, rapier like leaves with finely spined margins. Slim spikes of white flowers to 6mtrs on mature plants. Very dry sheltered spot.
Deinathe bifida	£4.85	Strange Hydrangea relative for woodsy conditions. Pairs of divided, rough, three lobed leaves. Large, nodding white flowers with long filaments;- June & July. Best in an acid, cool, moist woodland soil in part shade. (6-7) 35x45cm.
Delphinium 'Alice Artindale'	£9.50	A small member of the elatum group & a slow, old variety well worth maintaining in cultivation although difficult to propagate. Short spikes of button-like, double, purple flushed sky-blue flowers. Needs good living.
Delphinium 'Berghimmel'	£6.75	CUTTINGS RAISED PLANT. Branched stems with long spikes of clear sky-blue flowers with a white eye. Better in the mixed border than the taller elatum hybrids. Retentive, well drained soil in sun or part shade. (5-8) 120cm.

Delphinium 'Cha-Cha'	£5.50	(Highlander Series) Bred in Glasgow this is a short, fully double form. Spikes of soft mauve purple flowers during May to July, occasionally repeating later. They have subtly suffused creamy green eye. Divided basal leaves. Retentive, well drained soil in sun or part shade. (5-7) 85cm.
Delphinium 'Chelsea Star'	£6.75	CUTTINGS RAISED PLANTS. Stunning spikes of the brightest royal-blue flowers with a strong white 'bee' during midsummer. Basal clumps of much divided leaves. Retentive, well drained soil in sun or light shade. (6-8) 170cm.
Delphinium 'Crown Jewel'	£6.75	CUTTINGS RAISED. Unusual, semi-double, rather dusky grey-blue flowers with a contrasting dark brown 'bee' ; - midsummer. Basal clumps of much divided leaves. Retentive, well drained soil in sun or light shade. (6-8) 180cm.
Delphinium Dusky Maidens Group	£5.25	(Millennium Series) Superior New Zealand raised seed strain with bold spikes of rich-pink flowers with a prominent brown bee' ; - June to August. Divided basal leaves. Retentive, well drained soil in sun. (6-8) 160cm.
Delphinium elatum 'Blushing Brides' (New Mill. series)	£5.25	(New Millennium Series) A seed strain, bred in New Zealand giving rather uniform, densely packed spikes of dusky rich rose-pink flowers with a small brown bee;- midsummer. Basal clumps of much divided leaves. Protect from slugs. Retentive, well drained soil, preferably in full sun. (6-8) 150cm.
Delphinium elatum 'Sweethearts' (New Millen. series)	£4.80	Bold, impressive New Zealand hybrid breeding reasonably true from seed. well packed spikes of double, dusky pink flowers with a white 'bee' during midsummer. Basal clumps of much divided basal leaves. Best in a well drained soil in sun. (6-8) 150cm.
Delphinium 'Gute Nacht'	£6.75	syn. 'Good Night'. Spikes of semi double rich violet-purple flowers with pink highlights. White 'bee'. Flowers midsummer. An old Karl foerster hybrid for a retentive, well drained soil in sun or light shade. (6-8) 180cm.
Delphinium 'Highlander Crystal Delight'	£5.20	This series, bred by Tony Coakley in Scotland are remarkable for their spikes of double, if not triple, frilly flowers with soft lavender pink outer petals, suffused cream inside & jade-green centre petals. flowers midsummer. Basal clumps of divided leaves. Surprisingly good garden plants. (6-8) 75cm.
Delphinium 'Highlander Moonlight'	£5.20	(Highlander Series) CUTTINGS RAISED PLANTS. Bold spikes of triple, softest lavender-blue flowers becoming more white at the centre which is a soft sulphur green. Flowers early summer. Best in a light yet retentive soil in sun. (5-7) 100cm.
Delphinium 'Highlander Sweet Sensation'	£5.55	CUTTINGS RAISED PLANTS. Showy spikes of small, fully double, rather frilly rich violet-blue flowers with lighter blue-green overtones as they open. Much like a modern day 'Alice Artindale'. Flowers early to midsummer. Retentive, well drained soil in sun or light shade. (5-7) 90cm.
Delphinium 'Lord Butler' (AGM)	£6.80	CUTTINGS RAISED PLANT. Very showy old hybrid with bold spikes of semi-double deepest sky-blue flowers with a white centre ; - midsummer. Basal clumps of much divided leaves. Retentive, well drained soil in sun or part shade. (6-8) 180cm.
Delphinium 'Magic Fountains Lilac Rose'	£5.65	Seed raised strain breeding remarkably true from seed. Bold spikes of rosy lilac flowers usually with a white bee during early summer. Basal rosettes of finely cut leaves. Retentive, well drained soil in sun. Beware of slugs. (6-8) 120cm.
Delphinium 'Pink Punch' (New Mill. series)	£4.80	(New Millennium Series) Seed strain, bred in New Zealand & far superior to all other strains. Impressive spikes of deepest mulberry-pink flowers with crimped edges & a brown bee ; - summer. Mounds of divided basal leaves. Retentive, well drained soil in sun. (6-8)
Delphinium 'Schildknappe'	£5.50	syn 'Shield Handsome' CUTTINGS RAISED PLANT. Superb spikes of rich purple-blue flowers with a white centre, held on black flushed stems during midsummer. Basal mounds of much divided leaves. Retentive, well drained soil in sun or part shade.

Delphinium 'Sommerwind'	£6.75	CUTTINGS RAISED PLANTS. Long, tapering spikes of a luminous sky-blue with a contrasting white 'bee' :- Midsummer. Basal mounds of much divided leaves. Retentive, well drained soil in sun or light shade. (6-8) 180cm.
Dianella caerulea	£4.35	Fans of more or less evergreen, softly leathery leaves on bamboo-like stems. Clusters of potato-like blue flowers with a yellow centre followed by piercing blue berries. Sheltered, not too dry spot in sun. (7-9) 80cm.
Dianella caerulea 'Little Jess'	£4.35	More vigorous, more or less hardy evergreen with narrow, strap like, green leaves. Sprays of reflexed, mid-blue flowers with yellow beaks in summer followed by vivid blue berries. Quickly forms a clump which is unusual in the genus. Sheltered spot in sun.
Dianella revoluta 'Blue Stream'	£5.70	Erect tufts of broad, very glaucous, blue strap like leaves, forming tight, spreading clumps. Sprays of reflexed bright blue flowers with a yellow beak in summer, followed by purple fruit. Hardy to -6c. Best in a rich, fertile soil in light shade. (6-8) 60cm.
Dianella revoluta 'Coolvista'	£4.80	Erect, tufted evergreen with narrow, steely blue, pleated, folded leathery leaves, quickly forming a good clump. Airy sprays of potato like electric blue flowers with a yellow beak followed by showy purple fruit in autumn. Hardy to -6c. Best in in a rich soil in light shade. (6-8) 45cm.
Dianella revoluta 'Little Rev'	£4.35	More or less hardy evergreen with fans of blue hued, strap like leaves with rolled back margins. Airy sprays of reflexed blue flowers with yellow beaks in summer followed by intense blue berries. Sheltered, well drained spot in sun. (6-7) 45cm. Good in
Dianella 'Streetscape'	£4.80	Tuft forming evergreen with rather broader, softly leathery, pleated fresh green leaves, spreading more slowly. Airy sprays of reflexed electric blue flowers with yellow beaks, followed by purple fruit. Hardy to -6c. Best in a rich soil in light shade. (6-8) 60cm.
Dianthus 'Bailey's Celebration'	£3.75	Fully double soft pink flowers with notched petals & purple-red streaking & wedges. Flowers all summer if deadheaded. Good scent. Grey green leaves. Poor soil in full sun keeps it compact. (5-
Dianthus barbatus 'Green Trick'	£4.20	Strange form of sweet william which has no real flowers just a pompom like heads of fine green thread like petals, flowering consistently from late spring through into autumn. Makes an excellent cut flower. Retentive, well drained soil in sun or light shade. (5-10) 45cm.
Dianthus barbatus 'Monksilver Black'	£4.20	Although traditionally a biennial, this is soundly perennial. Selected by John Grimshaw at Monksilver nursery, this has rosettes of dark smokey, brown-black leaves. Heads of darkest cherry-red, velvety almost black flowers during summer. Well drained soil in sun. (5-8) 35cm.
Dianthus 'Dawlish Joy'	£3.75	A sport from Joy'. Large flowers have carmine pink stripes on a soft pink background; are freely produced all summer on long stems making them excellent for cutting. Gritty well drained soil in sun. 30x30cm.
Dianthus 'Devon General'	£3.75	A vibrant deep red form with a very pleasant perfume. Truly perpetual flowering even through a mild winter. Compact habit. Well drained soil in a sunny site. Ht:20cms
Dianthus 'Diane' (AGM)	£3.80	A popular old cottage garden plant - a sport from Doris'. Forms a compact mound of silvery leaves topped by well scented carmine rose semi-double flowers. Needs a well drained soil & a sunny site. 30x45cm. (6-10)
Dianthus 'Doris' (AGM)	£3.75	Double blooms of light pink with a salmon eye; well scented. A very popular variety. Plant in groups for effect. Well drained, sunny position. Ht:30cms (12ins). (June-Oct)
Dianthus 'Laced Monarch'	£3.75	Double flowers of pink with chestnut marking from June-Sept.; slight fragrance. Excellent for edging or underplanting roses. Well drained soil in a sunny position. Ht:30cms

Dianthus 'Lady In Red'	£3.75	syn.Xanthe'. One of the most intense vermilion reds I have ever seen. Fully double flowers in profusion from June through the summer over mounds of steely grey leaves. Light, rather poor soil in sun. (6-9) 35cm.
Dianthus 'Memories'	£3.75	(Scent First Series) Voted the best new perennial of 2013, this is surely one of the most powerfully scented pinks ever bred. Superbly shaped, pristine white flowers over a very long period from may to August. Tight buns of silver grey, needle like leaves. Light, free draining soil in sun. (5-8) 20cm.
Dianthus 'Moulin Rouge' (AGM)	£3.75	A new delicately laced variety, with semi-double white flowers flushed icy pink, picoteed red & a large burgundy red eye. Neat spreading habit & lovely clove scent. Well drained soil in sun.
Dianthus 'Mrs. Sinkins'	£3.75	Still very popular - the old-fashioned cottage garden pink' with very fragrant, double, white flowers; June-Oct. Tends to have a more spreading habit than more modern varieties. Well drained, sunny position. Ht:20cms
Dianthus pavonius	£3.60	The Peacock Eye pink comes from the Pyrenees & Alps. Tight mounds of greyish, very fine, needle like leaves. Single, gappy petalled rich pink flowers with an iridescent peacock-blue centre, surrounded by a white halo. Flowers late spring & early summer. Ideal for a sink. Free draining soil in sun. (5-6) 10cm.
Dianthus 'Widcombe Fair' (AGM)	£3.75	Fully double, scented, champagne-pink flowers; June to October. Well drained soil in a sunny position. Ideal front of border. Good cut flower. Ht:25cms
Diascia personata	£4.50	Very unusual, tall upright growing Diascia with woodyish stems & toothed green leaves. Airy, billowing spikes of two lipped dusky-pink flowers from June to the frosts. Surprisingly hardy in a sheltered, well drained spot in sun. (6-10) 90cm.
Dicentra canadensis	£4.80	From the woodlands of Eastern USA. this is an ephemeral perennial. Bulbous form, emerging in spring with very finely cut, almost feathery, grey-green leaves. Short stems with hanging white lockets follow shortly afterwards. Dormant by summer. Humus rich, woodland soil in part shade. (3-4) 15cm.
Dicentra cucullaria	£4.20	Racemes of white flowers with yellow tips on arching stems in early spring. Divided clumps of blue-green leaves. Dies back quickly after flowering. Gritty rich soil in part shade. 20x20cm.
Dicentra cucullaria 'Pink Punk'	£4.80	Small, tufted bulbous woodlander with mounds of very finely cut, feathery silver-grey leaves. Dainty blush-pink lockets hover just above the leaves in spring. Dormant by midsummer. Best in a cool, moist, woodland soil in part or full shade. (4-5) 10cm.
Dicentra cucullaria 'Pittsburg'	£4.50	From small white bulbous clusters arise clumps of grey-green finely dissected leaves. The flowers which look like inverted trousers are a buff mushroom colour with a flush of pink in spring. Difficult plant for the plantsperson. Humus rich soil in part shade.
Dicentra eximia 'Snowdrift'	£4.80	(syn.Alba') An uncommon plant with finely cut, pale green leaves forming low carpets. The pure white hanging lockets are carried over a long period; April-July. Best in a cool, shady, not too dry site. 30x45cm.
Dicentra 'Stuart Boothman' (AGM)	£4.50	Clusters of delicate pink lockets on short stems over delicate, deeply cut, slightly glaucous leaves. Cool shade in not too dry soil. 30x60cms. Flowers: April-May.

Dichelostemma ida-maia	£4.20	Strange, tubular, red flowers tipped yellow; early summer. Grassy leaves wither at flowering time. Sheltered, well drained position in full sun. Bulbous perennial from N.America. 60x30cm.
Dichelostemma ida-maia 'Pink Diamond'	£4.20	Whorls of cerise-pink, tubular flowers with white flared mouths, from green buds. Narrow, long grassy leaves wither at flowering. Needs a warm, sheltered spot in a gritty soil in full sun. (5-6) 60cm.
Dictamnus albus	£4.95	Slow clump former with erect spikes of elegant WHITE blooms with long stamens in early summer. When the seed pods ripen, they give off a volatile oil which can be ignited on hot days. Lemony aromatic leaves. Fertile soil in sun. 90x60cm.
Dierama 'Coral Bells'	£5.20	Shorter form multiplying quite well for a Dierama. Arching sprays of bell shaped warm coral-pink flowers from silver bracts during early summer. Narrow, upright tufts of sword like leaves. Never dry but well drained soil in sun. (6-7) 90cm.
Dierama dracomontanum	£5.50	Hanging, dark pink to mauve bells in papery calyces; all summer. Fans of narrow, erect, grassy leaves. Retentive yet well drained soil which never dries out in sun. 60x30cm.
Dierama igneum	£5.20	Coll;-S.Africa. Recently introduced species that seems more free flowering. Tufts of narrow, grassy leaves & arching stems ending in clusters of nodding, bell-shaped deep pink flowers in late summer & early autumn. Retentive well drained soil in sun. 60x45cm.
Dierama 'Lancelot'	£5.20	Selected by Jim Cave from pulcherrimum. Small, upright tufts of grassy leaves. Arching sprays of narrow mouthed, bell-shaped, mid-pink flowers, held in silvery, papry calyces;-summer. Retentive, well drained soil in sun. (6-8) 120cm.
Dierama 'Miranda'	£5.20	Selected in South Africa, the home of the Dierama, this strong growing selection has arching stems with good sized lilac-pink flowers from silver bracts;- summer. Narrow fans of upright leaves. Retentive, well drained soil in a sheltered spot. Ht 150cm.
Dierama pauciflorum	£4.80	A dwarf species from high in the Drakensbergs. Few flowered erect spikes of very large rich pink flowers, usually marked white & red in throat;- midsummer. Multiplies reasonable well & flowers reliably. One of the easier ones to grow. (7-8) 55cm.
Dierama 'Puck'	£5.20	Bulbous with stiff narrow grassy clumps of leaves. This dwarf form has arching stems topped by silvery pink bell shaped flowers in papery calyces in august which rustle in the breeze. Retentive soil that does not dry out in sun. 60x45cm.
Dierama pulcherrimum 'Blackbird'	£5.50	Very rarely available is this wonderful deep plummy-maroon form, almost black. These are from division & not seed as is usually offered. Retentive, well drained soil in sun. (7-8) 75cm.
Dietes bicolor	£5.80	Although only on the borderlines of hardiness, these long flowering Iris relatives are excellent for a pot. Erect, evergreen fans of narrow, sword like leaves. Beautiful moonlight yellow flat flowers with three burgundy blotches, intermittently through summer. Loves sun. (6-9) 90cm.

Digitalis 'Glory Of Roundway'	£4.50		Long, upright spikes of small, creamy-pink, tubular flowers; May-June. Soundly perennial, sterile hybrid. Reasonably drained soil in sun or part shade. Ht: 90cms.
Digitalis grandiflora (AGM)	£4.20		Spikes of tubular, CREAMY-YELLOW flowers; summer. Evergreen. A pleasing, short, clump-forming, evergreen foxglove. Any reasonable fertile soil in sun or part shade. 60cms.
Digitalis grandiflora 'Carillon'	£4.20		A selected dwarfer form with shorter spikes of soft creamy yellow unmarked flowers during midsummer. Basal rosettes of grey haired leaves. Retentive well drained soil in sun or part shade. (5-8)
Digitalis 'Ice Queen'	£7.85	2.00	Very distinct purpurea type with basal rosettes of heavily felted, silvery-white, coarse leaves. Well branched stems carry spikes of tubular unmarked white flowers from creamy-yellow buds throughout summer. Light free draining soil in sun. (6-9) 75cm.
Digitalis 'Illumination Raspberry'	£5.50		Isoplexis x Digitalis. Spectacular hybrid with the usual basal rosettes of downy, large leaves. Bold, well branched spikes with narrowly tubular, intense raspberry-pink flowers with a spotted rich orange throat, from May to August. Retentive, well drained soil in sun or part shade. (5-8) 150cm.
Digitalis lutea	£4.20		(syn.D.eriostachya) An uncommon small foxglove forming rosettes of glossy leaves. Strong upright stems carry small, narrow, tubular, YELLOW flowers crowded down one side of the spike. For a well drained soil in sun or part shade. 60x30cm. Flowers: June-August.
Digitalis x mertonensis (AGM)	£4.20		(D.purpurea x D.grandiflora) Spikes of large foxglove flowers of unusual ROSY-MAUVE & COPPER-BUFF. Divide after flowering to maintain stock. Breeds true from seed. Any reasonable soil; best in part-shade. Ht:60cms. Flowers:June-August.
Digitalis parviflora	£4.20		Long cylindrical spikes of small BROWNISH-PURPLE, narrow, tubular flowers on leafy stems; early summer. Basal rosettes of rich green leaves. Sun lover for a well drained soil. 75x45cm.
Digitalis purpurea albiflora (AGM)	£4.20		Stately, perennial form with tall, one-sided spikes of large, WHITE flowers. Forms a basal rosette of matt-green leaves. Seeds freely. Prefers humus-rich soil in partial shade but tolerant of many conditions except very wet/dry. Ht: 1-2m. Flowers: Early summer.
Digitalis purpurea x thapsi	£4.20		Hybrids between these two species are often variable in colour, usually blush shades of pink or white. Rosettes of felted, grey-white haired leaves. This hybrid usually gives soundly perennial plants for a well drained spot in sun. (6-7) 75cm.
Digitalis 'Spice Island'	£4.50		Much like a rusty golden brown flowered form of ferruginea, making it soundly perennial, but painfully slow to propagate, hence the price. Narrow spikes of baggy flowers with a white lower lip in summer. Deeply veined leaves. Well drained soil in sun. 75cm.
Diphylleia cymosa	£5.20		So called because of its immense, two lobed, rounded leaves to 2ft across. Heads of small white flowers followed by striking indigo-blue berries on red stems. Woodland cool moist soils. 60x30cms. Flowers: June-July.
Diplarrena latifolia	£4.60		Evergreen Iris relative with fans of leathery sword like leaves. Rather showy, three petalled pure white flowers with purple & yellow marked throats;- early summer. Sheltered, well drained soil
Diplarrena moraea	£4.80		The three-petalled white flowers with a yellow & purple eye are produced on wiry stems; July-August. Forms clumps of iris-like, evergreen leaves. Well drained sunny site. Marginally hardy. 45x30cms.

Disporopsis aspersa	£5.50	Much like an evergreen form of Solomon's seal, spreading by surface rhizomes. Arching stems, often spotted black, with pairs of thick, leathery leaves. Hanging clusters of scented, creamy-white flowers in the upper leaf axils;- spring. Humusy soil in pt,sh.
Disporopsis fuscopicta	£5.15	Woodland perennial, looking a little like an evergreen solomon's seal. Arching, thick stems with leathery, alternate, pale-green leaves. Small clusters of orange scented, waxy, creamy-white, bell-shaped flowers in the leaf axils; spring. Cool, humus rich soil. 45
Disporopsis pernyi 'Bill Baker'	£4.80	Bought by Bill Baker in a Chinese Bird market, this form has the usual, nodding bell-shaped citrus scented cream flowers but with a dark eye;- late spring. Solomon seal like evergreen leaves. Retentive woodland soil in part shade. (4-5) 45cm.
Disporopsis taiwanensis B&SWJ 3388	£5.50	From the high mountains of Taiwan, this is much like an evergreen Solomon's Seal. Arching stems with leathery, thick textured glossy green leaves. From the leaf axils hang bell shaped cream flowers, stained purple & yellow inside, during June, followed by purple berries. Cool, moist woodland soil in part or full shade. (6-7) 40cm.
Disporum uniflorum	£5.20	Previously sold as flavens. Easily grown woodland plant much like Solomon's seal. Glossy leaves up the stout stems & clear yellow nodding bell shaped flowers amongst the upper leaves in spring followed by black berries. Cool woodland conditions in humus rich soil. 60x30cm.
Disporum longistylum 'Green Giant'	£5.20	The giant of the genus with tall bamboo like stems emerging in spring with a purple tint. Large oval leaves on branched stems. Small hanging clusters of green-white scented flowers followed by black fruit. Cool, moist woodland soil in part or full shade. 150cm.
Disporum megalanthum CD&R 2412b	£5.50	Very strong growing form, introduced by Compton, D'Arcy & Rix. Unusual in being more or less evergreen, the well branched arching stems have thick textured leaves. Hanging cream bells like a solomon's seal from March to May. Cool, humus rich, shady spot. 40cm
Disporum trbaeculatum 'Nakafu'	£5.50	Slow, creeping deciduous woodlander with stems having, elliptic, pointed, glossy green leaves with slightly wavy margins. In spring they emerge with a central gold splash which disappears at flowering, reappearing later. Small, yellowish-green flowers during late spring. Humus rich, woodland soil in part shade. (4-5) 25cm.
Disporum viridescens	£5.20	Delicate Asian species with arching stems having nodding, narrowly bell-shaped white flowers with a green tinge in late spring followed by blue fruit which age black. Retentive, well drained soil in part or full shade. (5-6) 50cm.
Dodecatheon austrofrigidum	£5.20	Narrow endemic to the Pacific northwest of USA, this larger species forms rosettes of wavy margined, smooth light green leaves. Exploding firework like heads of variable but usually magenta reflexed flowers ; - April & May. Summer dormant woodlander for part shade at least. (4-5) 30cm.
Dodecatheon conjugens	£4.50	Coll; Lewis & Clark Co, Montana. Soft pink reflexed flowers with a yellow beak in mid spring. Small basal leaves. The whole plant is smaller than those in cultivation. Retentive, humus rich soil in part shade. 20x20cm.
Dodecatheon meadia 'Queen Victoria'	£4.50	Umbels of reflexed magenta-pink flowers with a white ring & yellow beak on bare stems during mid & late spring. Rosettes of toothed, pale green leaves. Moist, well drained humus rich soil in sun or part shade. (4-5) 40cm.
Dodecatheon pauciflorum	£4.80	In the UK this is considered synonymous with meadia but in the US, where it grows, it retains it's status. Small woodlander with rosettes of dark green, smooth leaves. Strongly reflexed purple-pink flowers with a yellow & black beak; May & June. Summer dormant. Best with some shade. (4-5) 20cm.

Dodecatheon pulchellum pulchellum 'Red Wings'	£4.50	Umbels of nodding deep cerise-purple flowers with a yellow beak, held on bare stems. Basal rosettes of smooth pale-green leaves. Dormant by late summer. retentive soil in dappled or part shade. (4-5) 30cm.
Doronicum x excelsum 'Harpur Crewe'	£4.50	Branched stems with large golden yellow daisies up to 4-ins across; spring. Heart shaped pointed softly hairy leaves. Moist humus rich soil in part or dappled shade. 60x60cm.
Doronicum orientale 'Magnificum'	£3.95	(syn.D.caucasicum) A popular early flowerer with heads of lovely, 3 inch, yellow daisies; March to May. Clumps of glossy green, heart-shaped leaves. The long stalked flowers are good for cutting. Fertile soil in sun or part shade. 30x45cms.
Doronicum pardalianches 'Goldstrauss'	£4.50	Much more permanent in the garden than other Doronicums, this has kidney shaped, toothed, fresh green leaves. The starry, single, golden yellow daisies are held in a little late in mid spring. Light, freedraining soil in sun. 60cm
Dracocephalum argunense 'Fuji Blue'	£4.50	Branching spikes of hooded, purple-blue flowers from June to August. Forms a clump of narrow leaves. Needs a well drained soil in sun. 30x45cm.
Dracocephalum forrestii	£4.25	
Dracunculus canariensis	£5.20	Rarely seen, tender species from Madeira & the Canary Islands. Stout spotted, snakeskin stems, with pairs of large, divided leaves. The white spathe, flushed green on the exterior, with a yellow spadix in early summer. Keep frost free. (6-7) 60cm.
Dracunculus vulgaris	£4.50	Tuberous perennial producing huge, (60cm+) cuckoo-pint-like, foul smelling, maroon purple, open spathes with an erect, almost black spike; spring or summer. Large, dark green, ovate, brown-spotted basal leaves. Humus-rich, well drained soil in sun.
Dryas x suendermannii (AGM)	£4.20	Naturally occurring evergreen mat former with woody stems covered in small, intensely glossy, deeply veined dark green leaves. Slightly nodding soft cream flowers intermittently in spring & summer followed by fluffy, silky seed heads. Edger or rockery in well drained soil in sun. (4-7) 10cm.
