

Echinacea '12th of July'	£5.20	Unusual, very small East European variety with single, dusky purple-pink flowers with fluted petals. They are held on black stems during late summer. Rather large, dark pointed leaves. Sheltered, free draining soil in sun. (7-9) 35cm.
Echinacea 'Cranberry Cupcake'	£5.20	Much like a shorter, wider, more spreading form of 'Razzmattazz'. Anemone centred rich raspberry-pink flowers with a large central cone & narrow, gappy ray petals ; - late summer & early autumn. Light, free draining soil in sun or light shade. (7-9) 40cm.
Echinacea 'Ferris Wheel'	£5.20	Rather unusual single flowered form with strongly quilled & fluted petals. They emerge cream, ageing white with lemon tips. Large gold cone. The flowers are sweetly scented. Has a shorter, well branched habit. Best in a light, free draining soil in sun or light shade. (7-9) 50cm.
Echinacea 'Greenline'	£5.20	Surprisingly strong growing double form with a small row of drooping, green tinged white petals. Very large, anemone like cone of soft lime green, short quilled petals;- Late summer & autumn. Best in a retentive, sharply drained soil in sun. (7-9) 65cm.
Echinacea 'Green Envy'	£4.80	A very unusual form with the upward facing flowers a soft sage green around the bronze cone. As the flower ages a burgundy staining becomes stronger around the cone. Flowers;- late summer. Light, free draining soil in sun (7-9) 90cm.
Echinacea 'Irresistible'	£5.20	Much like an orange flowered 'Razzmattazz' the cone is a shaggy centre of salmon orange petals with slightly drooping soft orange petals;- late summer & autumn, all held on purple flushed stems. Light, free draining soil in sun. (8-10) 60cm
Echinacea 'Maui Sunshine'	£5.20	paradoxa x purpurea hybrid with good sized, bright golden yellow flowers around a high centred bronze-orange cone. The petals reflex slightly with age. Needs good living in order to thrive. Flowers late summer & autumn. Slow to maturity. Sheltered, sharply drained spot in sun. (8-10) 60cm.
Echinacea 'Meditation'	£4.80	Short variety bred by Marco van Noort for pots. Heads of soft pink flowers with short ray petals. The petals droop with age & the central rusty cone gets larger. Flowers are held on differing length stems ; - late summer. Sharply drained soil in sun. (7-9) 40cm.
Echinacea 'Pacific Summer'	£5.50	Rather distinct colour with very large, single soft, cool apricot flowers around a coppery-bronze small central cone, during late summer & autumn. Strong, well branched stems. Light, free draining soil in sun. (7-10) 75cm.
Echinacea paradoxa	£4.50	The rarely seen yellow form of the usually purple coneflower. Upward facing, daisy-like, rich yellow flowers with drooping, almost reflexed petals around a bold reddish-bronze, raised cone;- late summer. Retentive, well drained soil in sun or part shade. (8-
Echinacea purpurea 'Adam Saul'	£4.80	syn. 'Crazy Pink'. Incredibly free flowering hybrid with reflexing, shuttlecock shaped clear light-pink flowers with a distinct orange bronze cone;- late summer into autumn. It's well branched habit & floriferousness make it one of the best. (7-9) 75cm.
Echinacea purpurea 'Augustkonigin'	£4.80	German selection with large, upward facing pale lilac flowers, with a greyish hue, the petals rather ragged & reflexed. Large brown bronze central cone. Free draining, preferably sandy soil in sun or light shade. (7-9) 75cm.
Echinacea purpurea 'Milkshake'	£4.95	One of the strongest growers of these conical forms with a dense bun of modified creamy white petals around an egg yolk yellow centre & dparse, long drooping ray petals;- mid to late summer. Likes a retentive, free draining soil in sun. (7-9) 90cm.
Echinacea purpurea 'Razzmattazz'	£5.20	Very unusual double flowered form with a raised cone of small quilled bright-pink flowers with a surrounding ring of drooping ray petals;- late summer into autumn. Well scented. Sharply drained soil in sun. (6-9) 75cm.
Echinacea purpurea 'Tom Thumb'	£5.20	Short, well brached form with good sized, slightly reflexing pink-purple flowers around a raised bronze-burgundy cone; late summer into autumn. Good edger for light, free draining soil in sun. (7-9)

Echinacea purpurea 'White Swan'	£4.20	Large, single, wide rayed, daisy flowers of PURE WHITE with a pronounced central cone; June to September. Stately, upright perennial with well branched stems. Any reasonable soil; best in sun. 60x60cms.
Echinacea 'Spider'	£4.80	Short hybrid with the dark stems topped by large, very fine petalled bright-cerise-pink flowers, slightly fluted at the tip orange at the eye. Maroon bronze cone. Large, pointed, glossy green leaves. Best in a light, free draining soil in sun or light shade. (7-9) 40cm.
Echinacea 'Summer Salsa'	£5.20	Amazing, anemone centred form with starts out as a rich orange, almost single flowers, forming a large cone of deep vermilion orange-red, with small drooping ray petals, from July to October. Lightly scented. Needs a sharply drained soil in sun. (7-10) 60cm.
Echinacea 'Sunacea Zion'	£6.85	Compact, bushy perennial with the flowers changing remarkably as they age. They open light orange, turning deep orange with horizontal petals. As they age the petals droop & a turn a pale beige-orange, all held at the same time. Flowers late summer & early autumn. Sharply drained soil in sun. (7-9) 40cm.
Echinacea 'White Mist' (Mistical Series)	£4.60	
Echinops bannaticus 'Blue Globe'	£4.50	(syn.E.ritroBlue Ball'). Steel-blue, globular heads on grey stems from a base a green-grey, jagged leaves. Excellent contrast plant for reasonably drained soil in full sun. 120x60cms.
Echinops ritro 'Veitch's Blue'	£4.50	A statuesque upright perennial with rounded thistle like PURPLE-BLUE HEADS of tightly packed flowers ON SILVERY STEMS. Pale sage-green leaves are deeply divided & downy beneath. Poor soil in full sun. 120x75cm. Flowers: Late summer
Echinops spinosissimus	£5.20	Plant of drylands around Greece & N.Africa. Basal rosettes of intensely spiny silver-grey basal leaves. Rounded heads of extravagantly spined silver buds, opening to silver-blue flowers, during late spring & early summer. Needs a poor, sharply drained
Echinops tjanschanicus	£6.75	2.00 Rather tall, back of the border Chinese species, especially the Tien Shan mountains. Well branched stems carry imposing, tennis-ball sized silvery-blue flowers on stout stems, over a long period throughout summer. Adored by bees. Thistle like leaves. Light, free draining soil in sun or light shade. (6-9) 200cm.
Echium amoenum 'Red Feathers'	£4.50	Collected in the Caucasus, this produces flat rosettes of ground hugging, bristly deep-green leaves. Arching stems clothed in narrow burgundy-red tubular flowers in smokey bristly bracts. Perennial? Well drained soil in sun. (6-8) 40cm.
Echium candicans (AGM)	£6.75	Imposing, slow growing biennial forming a woody based mound of stout stems with whorls of intensely silver, narrow leaves. Fat spikes of purple blue flowers over a long period from late spring. Hardy in the Southwest & in very sheltered, well drained sunny
Echinacea 'Yellow Spider'	£5.20	Very unusual palest creamy flowers with very narrow, fully fluted petals & flared mouths. Large bronze brown cone. Flowers late summer into autumn. Best in a light, free draining soil in sun or light shade. (7-9) 60cm.
Eomecon chionantha	£5.20	Curious perennial with orange sap, rounded, greyish leaves & PURE WHITE, nodding poppies with yellow stamens. Spreads freely when happy. Cool, moist, shady site. 45x45cms. Flowers: April-May.
Ephedra major	£5.20	Plants important for medicinal alkaloides, these represent a group of plants thought to represent the link between conifers & flowering plants. Strangely jointed, cylindrical tangled stems which are leafless. Insignificant flowers with the branched wreathed in small red fruit during autumn. easy in any soil in sun. 150x120cm.
Epimedium acuminatum L575	£4.80	Rose purple & white large spurred flowers; mid to late spring. Large evergreen leathery trifoliolate leaves are marbled reddish-brown when young. Moisture retntive humus rich soil in part or full

Epimedium 'Akebono'	£4.50	A Japanese hybrid with grandiflora in it's breeding. The large spidery flowers are subtly blended white & pink. The deciduous leaves are heavily flushed red when young. Compact clump former for retentive soil in part or full shade. (3-5) 30cm.
Epimedium 'Beni-kujaku'	£4.85	Deciduous, Japanese hybrid, with the new growth, pale creamy yellow, colouring well in autumn. Nodding, spidery, two toned, lilac flowers in spring. Humus rich, retentive soil in part or full shade. (3-5) 35cm.
Epimedium 'Black Sea'	£4.80	Previously sold as a form of pinnatum subsp. colchicum. More or less evergreen, this has rounded leaves turning almost rich black during the cold winter. Copper new growth in spring with the starry yellow, orange veined flowers. Excellent ground cover even for dry shade. (3-5) 30cm.
Epimedium 'Buckland Spider'	£5.50	Deciduous hybrid derived from grandiflorum with nodding, large, spidery dusky pink flowers over mounds of rounded leaflets, rich copper bronze in spring. Tolerant of drier condition sin part or full shade. (3-5) 35cm.
Epimedium chlorandrum	£4.95	Rhizomatous, deciduous Chinese species with large, spidery, yellow-green flowers, emerging in spring with showy, heavily brown mottled leaves. The leaves are leathery & spiny toothed. One of the trickier species to please. Cool, moist, humus rich soil in part or full shade. (3-5) 45cm.
Epimedium Creeping Yellow	£4.60	Small creeping deciduous species with the new growth in spring soft golden yellow, with a broad burgundy rim & speckling. Clusters of nodding white flowers in spring with the new leaves. Cool, retentive woodland soil in part or full shade. (2-5) 20cm.
Epimedium 'Darrell's Pink'	£5.50	Not sure where this name came from. Mounds of oval, spiny green leaves with a little copper new spring growth. Branched stems with narrow, soft pink spidery, wavy petals. Short orangey-red sepals with gold stamens. Flowers late spring. Humus rich, woodland soil in part shade. (4-6) 35cm.
Epimedium 'Darrell's Spiny Yellow'	£5.50	May relate to what is sold in the US as wushanense Spiny forms. Evergreen clumps of long, narrow, elliptic, spiny leaves, rich copper-brown during spring, dark green & leathery through summer. Well branched stems with good sized, two toned soft yellow flowers. Humus rich soil in part shade. (4-5) 35cm.
Epimedium diphyllum	£4.20	Semi-evergreen mats of leathery pale-green leaves with spineless margins. Racemes of pendulous bell-shaped white flowers with reflexed petals in late spring & early summer. Japanese. Humus rich soil in part or full shade. (3-5) 45cm.
Epimedium ecalcaratum Og 93.082	£5.50	Chinese species, with evergreen leaves strongly flushed purple in winter. Long spikes of spurless, bonnet-shaped yellow flowers in spring, often continuing into summer. Retentive soil which never dries out in part or full shade. (3-6) 40cm.
Epimedium 'Egret'	£5.20	Effectively this is a larger, more free flowering form of latisepalum. Heavily branched stems with leathery, glossy green, toothed & pointed leaves. Large, nodding hawk like very white flowers during mid spring. Rare in the UK. Retentive soil in part or full shade. (3-5)
Epimedium epsteinii	£4.85	Rare species from Japan with rather large, white & violet, spurred flowers in late spring. The evergreen leaves have very long, spined margins but take on little autumn colour. Humus rich, not too dry soil in part or full shade. (5-6) 30cm.
Epimedium 'Fire Dragon'	£5.20	davidii x leptorrhizum hybrid bred by Robin White. Creeping perennial with spiny edged, pointed leaves, heavily mottled brown in spring. Nodding, reflexed yellow flowers with pink sepals, during spring. Needs a rich, retentive soil in part or full shade. (3-5) 35cm.
Epimedium flavum	£4.85	Robust Chinese form, with spikes of large primrose-yellow flowers through late spring, well into summer. Large, toothed leaves take on good spring & autumn colour. retentive soil which never dries out in sun. (4-7) 40cm.

Epimedium 'Flowers Of Sulphur'	£5.20	Strong growing hybrid frm Robin White, this has nodding good sized sulphure yellow flowers, almost blaeching white at the tips;- mid to late spring. Glossy pointed leaves are bronze in spring turning copper bronze in autumn, but soundly evergreen. Retentive, never dry soil in part or full shade. (3-5) 40cm.
Epimedium 'Golden Eagle'	£5.20	
Epimedium grandiflorum 'Elfenkonigin'	£4.80	(Elf Queen'). A compact form of this deciduous species, with the new growth flushed purple in spring. Relatively large cream flowers held on wiry stems in ;late spring & early summer. Good ground cover for fertile, rich soil in shade.(4-6) 30cm.
Epimedium grandiflorum 'Lilafee'	£6.75	A deciduous variety with small, airy, DEEP LILAC-MAUVE reflexed flowers; early spring. Delicately lobed leaves on wiry stems emerge copperry-bronze. Best in a cool shady spot but tolerates sun. 30x45cms.
Epimedium grandiflorum 'Queen Esta'	£5.50	Deciduous variety with the new leaves emerging purple before becoming copperry. Good sized reddish-pink flowers with white spurs with the new leaves in spring. Best in a retentive, woodland soil in part or full shade. (2-5) 30cm.
Epimedium grandiflorum 'White Queen' (AGM)	£4.80	Very tall form, with the deciduous pointed leaves flushed red in spring. Large, small spurred white flowers are freely produced in spring. a not often seen hybrid & slow to colonise. (4-5) 40cm.
Epimedium grandiflorum 'Yellow Princess'	£5.35	Shorter form of this deciduous species, a good choice for more drier shade. Short stems with good sized pale yellow, long spurred flowers in late spring. the leaves emerge pale yellow with good autumn colour. Any reasonable soil in part or full shade. 20cm.
Epimedium 'Jean O'Neill'	£4.95	Selected at Spinners Nursery, this is probably an acuminatum x davidii hybrid. acuminatum like large cream flowers, suffused yellow with violet sepals, overall looking soft pink. Red flushed spiny new leaves. Retentive soil in part shade. (3-5) 50cm.
Epimedium 'Jenny Pym'	£4.85	Very old hybrid of the x cantabrigiense persuasion with deciduous leaves colouring well in autumn. Rather small red & yellow bicoloured flowers well clear of the leaves;- mid spring. A good choice even for dry shade. (3-5) 50cm.
Epimedium latisepalum	£4.95	A recently discovered Chinese species with horizontal branches carrying enormous creamy-white flowers in spring. The large leaves are mottled chocolate in spring. Very sheltered spot in part shade.
Epimedium 'Little Shrimp'	£5.50	Showy, new, dwarf hybrid which creeps slowly. Reflexed, RICH SALMON-PINK flowers marked yellow; March & April. Deciduous, small, rounded leaves on wiry stems. Ordinary soil in sun or part shade. 20x45cm.
Epimedium 'Myojo'	£4.80	Japanese grandiflorum hybrid with longer spurred mid-pink flowers with rather claw like petals ; April & May. Deciduous leaves emerge in a spring with a red speckling. Good ground cover even for drier shade. Retentive soil in part or full shade. (4-5) 20cm.
Epimedium ogisui	£4.95	Delicate reasonably quick spreading species only recently discovered. Carpets of usually deciduous leaves emerge in spring with a bronze flush. Large spurred white flowers are held on horizontal stems. Humus rich soil in part shade. (3-5) 20cm.
Epimedium x omeiense 'Stormcloud'	£5.20	Rare species with rather sinister, metallic purple-brown flowers amongst the new bronz3e flushed leaves in spring. Selected form from Mt. omei in China. Cool, humus rich, never too dry soil in part shade. (4-5) 45cm.
Epimedium pauciflorum	£4.95	Rarely seen Chinese woodlander, with two toned, spidery pink flowers in spring. The shaply toothed, spined leaves emerge in spring with a heavy brown mottling, glossy in summer. Never let it dry out in woodland soil in part shade. (2-5) 30cm.
Epimedium perralderianum	£4.50	Heads of small, bright yellow flowers with short, brown spurs; April-May. Large, evergreen, fresh green, glossy, toothed leaves. Does not like being cut back. Good, spreading perennial. Any reasonable soil in a cool shady position. 30x45cms.

Epimedium x perralchicum 'Frohnleiten'	£4.20	CLEAR GOLDEN-YELLOW flowers in airy spikes. Semi-evergreen, fresh green, heart-shaped foliage is edged & mottled red. Good ground cover in sun or part shade in not too dry soil. 30x45cm.
Epimedium perralderianum 'Weihenstephan'	£7.05	Selected in Germany, this semi-evergreen is spectacular in spring when the glossy green leaves are heavily reticulated brown. Erect sprays of small, piercing golden-yellow flowers during late spring. Good ground cover even for drier soil. Best in retentive, rich soil in part or full shade. (4-5) 40cm.
Epimedium 'Phoenix'	£5.50	was 'Emperor'. New hybrid from Wendy Perry in Devon with good sized rich lilac-purple sepals, deep purple, almost white at the tips of the spurs;- mid to late spring. The new growth in spring is richly blotched red. Rich woodland soil in part or full shade. (3-5) 40cm.
Epimedium 'Pink Elf'	£4.80	pubescens x leptorrhizum. Robin Whites excellent cross with heavily brown mottled leaves in spring, turning warm coral brown in autumn. Smmall pixie like salmon-pink flowers in late spring with the new leaves. Never too dry soil in part shade. (3-5) 25cm.
Epimedium pinnatum colchicum (AGM)	£4.50	An unusual form with almost rounded, evergreen leaves flushed a deep bronze. Wide, spurless, YELLOW flowers on dancing stems; April & May. Grows anywhere but best in cool shade. 30x45cm.
Epimedium pubigerum	£4.50	Tall spires of small CREAMY-YELLOW flowers; March to May. Excellent ground cover with handsome, rounded, glossy foliage. Will tolerate dry shade but best in rich soil. 45x45cms.
Epimedium 'Sasaki'	£4.80	Deciduous, grandiflorus based hybrid with nodding lilac-pink, almost spurless flowers with the coppery new growth in spring. Rich golden autumn colour. Easily grown Japanese hybrid for drier soils in part shade. (3-5) 30cm.
Epimedium sempervirens	£5.20	Rarely seen species from Western Japan. Rather fresh, glossy green leaves have little spring colour. Nodding, spidery white flowers in late winter through spring. Humus rich, never too dry soil in part or full shade. (3-5) 30cm.
Epimedium sempervirens 'Okuda's White'	£5.75	From the snowy slopes slopes of Honshu this is more or less like an evergreen form of grandiflorum. New leaves have a reddish flush with the good sized white flowers; late spring & early summer. Not easy needing an acid, rich soil in part shade. (3-5) 30cm.
Epimedium 'Shiho'	£6.20	Creeping deciduous ground cover with heart-shaped pale leaves, flushed copper on the new growth. Spidery bright cherry-pink flowers with the new growth during early spring. Good autumn colour. Any reasonable soil in part or full shade. (4-5) 25cm.
Epimedium 'Spinners'	£5.50	Large, chunky more or less evergreen hybrid with large toothed leaves, flushed copper & red on the new growth in spring. large, open spikes of wide, spidery soft cream & dusky pale-brown bicoloured flowers in late spring. Best in a retentive soil with some
Epimedium 'Spine Tinger'	£5.50	syn. 'Sphinx Twinkler'. An astounding evergreen, collected from a cliff in Sichuan by Darrell Probst. Large, very narrow, glossy green leaves with spined margins, flushed chocolate on the new growth. Airy, branched sprays of very large, nodding lemon flowers in spring. Never too dry soil in part or full shade. (4-5) 45cm.
Epimedium 'Star Cloud'	£7.05	Tall, erectly held spikes of small, dainty, nodding white flowers, ageing with a pink tinge. Startling orange anthers. Flowers mid to late spring on dark stems. The spiny, holly like leaves are mottled chocolate brown, especially on the new growth. Retentive, humus rich soil with some shade. (4-5) 45cm.
Epimedium stellulatum 'Wudang Star' L1193	£5.50	A species collected by Roy Lancaster in 1983. The toothed evergreen leaves have spectacular red marbled leaves especially in spring when the leaves are flushed chocolate. Nodding heads of small white flowers. Humus rich, retentive soil in part shade. (3-4)
Epimedium 'Totnes Turbo'	£5.80	latisepalum x pinnatum colchicum. Selected by Sarah & Julian Sutton, this strong growing evergreen has good sized flowers, bicoloured pale & mid yellow. They are held on well branched stems well clear of the leaves. The almost spiny leaves have a brownish cast on the new growth. Retentive yet well drained soil

Epimedium x versicolor 'Cupreum'	£6.75		Deciduous hybrid for drier soils with small, nodding soft coppery orange & cream bicoloured flowers on wity stems;- March to May. The new leaves are soft copper in spring with good autumn colour. Any reasonable soil in part or full shade. (3-5) 40cm.
Epimedium x versicolor 'Neosulphureum'	£4.50		Mats of rounded, pale-green leaves with a copper-pink flush on the new growth. Short spurred, palest creamy-yellow flowers dance above the leaves in spring. Humus rich, retentive soil in part or full shade. (3-4) 30cm
Epimedium x versicolor 'Sulphureum' (AGM)	£4.50		A very delicate, dainty form the small leaves having beautiful tinting when young. Sprays of PALE YELLOW flowers; March to May. Sun or shade in not too dry soil. 30x30cm.
Epimedium x warleyense	£4.20		Wiry stems topped with several, dancing, small, yellow flowers with orange sepals; April-May. Light green, heart-shaped, evergreen leaves tinted red in spring & late summer. Good spreading ground cover growing best in cool shade. 40x75cms.
Epimedium x warleyense 'Orangekonigin'	£4.50		Good ground cover making mounds of light green, semi-evergreen leaves on wiry stems that take on good autumnal colour. Small reflexed BRIGHT ORANGE flowers. Fertile soil in sun or shade. 30x30cms. Flowers: Early spring.
Epimedium x youngianum 'Niveum' (AGM)	£4.50		PURE WHITE, starry flowers; April & May. A good neat form with small semi-evergreen leaves that turn chocolate in spring. Grows anywhere but best in cool shade. 25x60cm.
Epimedium x youngianum 'Roseum'	£4.50		Clumps of small, heart-shaped leaves are tinted red when young. Sprays of small pinkish-red flowers are held on branching stems; April & May. Sun or shade in not too dry soil. 30x45cms.
Epimedium zhushanense	£5.80		Rarely seen Chinese species, running freely with one, rather oval, rounded pale green leaflet per stem. Large, spidery long spurred rich purple flowers with the new leaves in spring. Prefers a retentive soil in part or full shade. (3-5) 35cm.
Epipactis palustris	£7.20		One of the easier garden orchids, multiplying well in retentive or moist soils with some shade. Spikes of showy, pale lime-green flowers with reddish-brown wings' from June to August. Stem clasping leaves. Like a rich soil. 40cm.
Equisetum 'Bandit'	£4.50		Dense clump forming, rather prehistoric evergreen with erect, leafless stems with bands of black & glowing luminous yellow at the nodes. said to have originated from japan but looks like a hyemale hybrid. Gently runs in a moist, even wet soil in sun or part shade. 60cm.
Equisetum hyemale affine	£4.20		A curious but appealing plant with upright bamboo-like stems of bright green with black & white rings. Whorls of fine, fresh green leaves. Not invasive. Moisture retentive soil in sun or part shade.
Equisetum variegatum	£3.90		Tufted, clump forming horsetail, gently sprading but never invasive, for retentive or moist soil. Evergreen, needle like, unleaved stems, with black bands at the nodes. Insignificant flowers. 30x45cm.
Eremurus 'Helena'	£5.80	2.00	Selection from the Ruitter hybrids' with long, bold spikes of pure-white flowers with cream stamens during summer. Basal rosettes of grey-green leaves wither at flowering time. Sharply drained soil in sun. (6-7) 150cm.
Eremurus 'Image'	£5.50	2.00	Big robustus hybrid, with big, bold, impressive spikes of starry CREAMY-PINK flowes, with dusky-pink stamens. The strap-like leaves wither at flowering. Very hardy but needs perfect drainage to stop winter wet. Sun. (6-7) 180cm.
Eremurus x isabellinus 'Cleopatra'	£5.50	2.00	Long plumes of densely packed, starry SPANISH ORANGE flowers, with darker midribs, from burnt orange buds; June. Rosettes of leaves die away before the flowers appear. A selection from the Ruitter Hybrids. Well drained soil in sun. 180x60cm.

Eremurus 'Oase'	£7.25	2.00	Exceptionally tall, large spikes of showy PHLOX-PINK flowers with central midribs of chocolate-brown; early Summer. Basal rosettes of narrow leaves die-back before flowering. Well drained soil in a sunny sheltered site. 120x60cm.
Eremurus 'Sarah Cato'	£7.80	3.00	Rather distinct, much shorter form with narrow, upright spikes of closely packed, mid-pink flowers, opening up the stems during midsummer. The strap like leaves wither at flowering. Looks rather more like a species. Needs perfect drainage in sun. (7-8) 90cm.
Eremurus 'Twist'	£5.50	2.00	Top awarded Dutch variety with long, rather open, narrow tapering spikes of the palest blush pink, almost white starry flowers, opening from the base during June & July. Strap like basal leaves wither at flowering time. Needs perfect drainage in a warm, sheltered spot in sun. No not overcrowd. (6-7) 130cm.
Erigeron 'Azurfee'	£4.20		(Fleabane) A reliable easy border plant forming dense ground cover.Sky-blue semi double daisies freely produced.Fertile well drained soil in sun.60x60cm.(6-8)
Erigeron coulteri	£4.20		collected Mineral Co., CO, 11300ft, 3445m. Front of border daisy with a profusion of chalky white daisies, held on short stems during late spring & early summer. Tufts of oval, basal leaves. retentive, well drained soil in sun or light shade. (5-7) 40cm.
Erigeron 'Foerster's Liebling' (AGM)	£4.20		Beautiful, large, daisy-like, DEEP REDDISH-PINK, SEMI-DOUBLE flowers on semi-erect stems. Front of border plant for sun or part shade. Any reasonable soil. 45x45cms. Flowers: June-August.
Erigeron glaucus 'Elstead Pink'	£4.20		Semi-double, LILAC-PINK daisies with narrow petals & a large yellow eye on short stems; late spring through midsummer. Succulent, spoon shaped, glaucous leaves. Spreading ground cover. Well drained soil in full sun. 30x45cm.
Erigeron 'Professor Korodi'	£4.50		Not often seen European variety with rather distinct, fully double white flowers with very fine, slightly ragged white petals around the yellow eye, during early summer. Narrow, elliptic green leaves. Retentive, well drained soil in sun or part shade. (5-7) 55cm.
Erigeron 'Quakeress'	£4.20		A prolific & easy plant forming rosettes of dark green leaves. PALE LILAC-PINK daisies on long stems; June to September. Fertile, well drained soil in sun. 60x60cms.
Erigeron 'Rosa Juwel'	£4.20		Bushy, daisy like perennial with good sized, rich dusky-pink flowers with a yellow eye, during midsummer. attractive cottage garden perennial, easily grown in any reasonable soil in sun or part shade. (6-8) 60cm.
Erigeron 'Rosa Triumph'	£4.50		Not often seen in cultivation, this shorter form has semi-double, almost double rich pink, fine rayed daisies with a yellow cone, during midsummer, held on well branched stems. Tufts of narrow basal leaves. Fertile, well drained soil in sun or part shade. (6-8)
Erigeron 'Schwarzes Meer'	£4.80		(Black Sea'). Heads of semi-double, yellow eyed deepest violet flowers in early & midsummer. Basal clumps of narrow, lance-shaped leaves. Fertile, well drained soil in sun or part shade. (6-7)
Erigeron 'Sommerneuschnee'	£4.20		syn.New Summer Snow'. Cottage garden plant with a myriad of stems carrying narrow rayed white daisies which age blush pink as the flower matures;- midsummer. A little floppy so may need support. Well drained soil in sun or light shade. (6-8) 75cm.
Erigeron 'Strahlenmeer'	£4.50		Lovely front of border perennial of semi open habit. Produces a succession of large, semi double, VIOLET-BLUE daisy like flowers of soft texture. Reasonably drained soil in sun. 60x60cms. Flowers: June-August.
Erigeron 'Wayne Roderick'	£4.20		Selected by the famous American plantsman, this mound forming evergreen forms rosettes of spathe shaped leathery leaves. The whole plant is covered in large, lavender daisies with a prominent yellow eye all summer. Well drained, poor soil in sun. (4-9)

Eriogonum fasciculatum	£4.80		Woody based Californian sub-shrub with needle, like inrolled leaves, hairy beneath, on spreading stems. Small, rounded heads of blush-pink or white flowers with a pink stained eye, held at the nodes during summer. Needs a sheltered, well drained spot in full sun. (7-8) 60x90cm.
Eriophyllum lanatum	£4.20		Forms spreading clumps of bright-silver divided leaves freely covered in YELLOW daisies over a very long period; May to September. Well drained soil in full sun. 30x60cm.
Erodium castellanum	£4.50		Ground covering, evergreen, Spanish species with pinnate, green leaves. Deep pink flowers, paler at the centre, with light violet veins;- summer. Good ground cover for well drained soil in sun. (5-8) 15x45cm.
Erodium chrysanthum	£4.50		Showy rockery or front of the border species, forming tight evergreen mats of finely cut, intensely silver leaves. Sprays of small, cup-shaped palest creamy yellow flowers in late spring & summer. Gritty, well drained soil in sun. (4-7) 15cm.
Erodium manescavii	£4.35		Deep, rich lilac-pink geranium-like flowers all summer. Forms a dense clump of divided, feathery, hairy leaves. Well drained soil in sun. 45x60cm.
Erodium 'Spanish Eyes'	£4.80		Neat, compact, mound forming evergreen with lacy, filigree, silver-grey leaves. Short, branched stems carry blush-pink flowers with a very strong purple veining & two blotches on the upper petals, from April to August. Well drained soil in sun or light shade. (4-8) 20cm.
Eryngium agavifolium	£4.50		Statuesque plant forming a rosette of sharply toothed, sword-like leaves. Big, GREEN, thimble-like flowerheads; late summer. Well drained fertile soil in sun. 1.5x1.2m.
Eryngium agavifolium - giant	£6.85	2.00	From a recent wild Mexican collection, this is a huge form of agavifolium, 50% bigger than the normal cultivated forms. Rosettes of strongly spined, leathery, tongue like evergreen leaves. Well branched stems carry thimble like, silver-green oval heads during midsummer. Free draining soil in sun. 180cm.
Eryngium alpinum 'Blue Jackpot'	£5.20		One of the most spectacular hybrids with large, intensely frilled deep steely blue flowers with a deeper navy blue cone held on near black stems. Basal clumps of divided leaves. Sharply drained soil in sun. (6-8) 60cm.
Eryngium 'Blue Spikes'	£4.80		planum x ?. Not sure of the breeding of this very nice sea holly. Well branched stems with good sized rich metallic blue-silver flowers on vivid violet stems, surrounded by a large, toothed ruff ; - summer. Basal rosettes of oval green leaves. Light, rather poor, free draining soil in sun. (5-8) 75cm.
Eryngium bourgatii 'Picos Blue'	£7.20	2.00	A form found in the wild in the Picos de Europa mountains in Northern Spain. Semi-evergreen rosettes of deeply cut, toothed, leathery leaves variegated silver. Cone like, steely blue flowers with a prominent ruff; summer. well drained. 45cm.
Eryngium eburneum	£4.50		(syn.E.paniculatum. of hort.) Clump former with long narrow spiny toothed arching leaves. Airy umbels of small whitish-green thimbles on pale stems; late summer. Moist, well drained fertile soil in sun. 150x60cm.
Eryngium giganteum (AGM)	£4.50		A legendary plant with silvery-grey leaves & HEADS OF METALLIC SILVER-GREEN cones surrounded by a large ruff of spiny SILVER BRACTS; summer. Excellent for drying. Biennial which self-seeds freely. Well drained fertile soil in sun. 150x45cms.
Eryngium giganteum 'Silver Ghost' (AGM)	£4.50		Possibly better than Miss Willmott's Ghost'. Huge, imposing mounds of spiny, silvery, divided leaves. Small white heads surrounded by large, intense steely-silver bracts; all summer. Biennial but self seeds. Well drained soil in sun .90x60cm.

Eryngium 'Neptune's Gold'	£5.50		Most likely a form of zabelii, this forms basal rosettes of divided leaves, richly burnished gold throughout the year. Golden stems with large, thistle like silvery-gold flowers, developing a steely blue cone & centre with age. Flowers midsummer. Light, free draining soil in a sunny spot. (6-8) 60cm.
Eryngium planum 'Blauer Zwerg'	£4.50		Blue Dwarf'. This dwarf, compact form has spherical umbels of intense, steely-blue flowers held in spiny blue-green bracts. Basal rosettes of leathery toothed leaves. Well drained soil in a sunny site. (6-8) 45cm.
Eryngium planum 'Blaukappe'	£4.50		(syn.Blue Ribbon') Large basal leaves are grey with stout branching stems carrying bright metallic-blue small flowerheads in spiny, metallic bracts. A good border plant & dried flower. Fertile well drained soil in sun. 100x45cm. Flowers: June-August.
Eryngium planum 'Blue Hobbit'	£4.50		Dwarf, compact form with well branched stems having lots of small ruffed rich blue flowers, initially opening silver; midsummer. Basal rosettes of oval glossy green leaves with silver veins. Light, free draining soil in sun. (6-8) 30cm.
Eryngium planum 'Jade Frost'	£5.20		vert attractive new hybrid with the glossy green leaves having a broad creamy white margin & a pink flush on th new growth. Airy spikes of small ruffed metallic blue flowers on dark stems, initially emerging silver;- late summer. Well drained soil in sun. 90cm.
Eryngium planum 'White Glitter'	£6.60	2.00	Bred specifically for cutting, this has thimble like silvery-white flowers surrounded by a small silver ruff. They are held on silver flushed stems during midsummer. Basal rosettes of glossy leaves. Best in a light, free draining soil in sun. (6-9) 70cm.
Eryngium tricuspdatum	£6.75	2.00	Basal clumps of rounded three-lobed leaves with toothed edges. GREEN, ROUNDED, THIMBLE-LIKE FLOWERS are held in spiny bractr. Rarely seen easy border plant for a gritty soil in sun. 75x45cm. Flowers: Summer.
Eryngium x tripartitum (AGM)	£4.50		Wiry stems from a basal rosette of leaves producing many branches ending in METALLIC-BLUE CONES surrounded by DARK BLUE, SPIKY BRACTS; July & August. Well drained soil in
Eryngium umbelliferum	£5.80		Distinct, evergreen species from Mexico with basal rosettes long, rapier like, metallic green leaves with teeth arranged like a hedgetrimmer. Branched stems carry white, thistle like flowers in late summer. Dry soil in sun. 60cm.
Eryngium x zabelii 'Big Blue'	£5.20		Very strong, robust hybrid much like a very large bourgatii. basal rosettes of divided, silver-grey veined leaves. well branched steely blue stems with good sized inky blue flowers, held in a large spiny ruff;- Summer. Light, poor, free draining soil in sun. (6-9) 90cm.
Eryngium x zabelii 'Donard Variety'	£5.20		Showy & slow to propagate perennial, with rosettes of deeply cut, jagged, green leaves with a silver overlay & veining. Large, cone shaped, silver blue flowers, with a broad, frilled, metallic, silver blue ruff. Sharply drianed soil in sun. (6-7) 75cm.
Eryngium x zabelii 'Jos Eijking'	£5.20		Spectacular new Sea Holly with steely blue branched stems & intense lavender blue flowers which glow; June to August. Divided silver veined basal leaves. For a hot, dry well drained position in full sun. 75x45cm. PROTECTED BY PLANT BREEDERS RIGHTS.
Erythronium americanum	£4.50		A collector's plant which is difficult to flower. Spreads freely by stolons at the expense of flowering. Beautiful pairs of two toned brown leaves & narrow, nodding, yellow flowers flushed red; spring. 15x15cm.
Erythronium dens canis (AGM)	£4.80		Reflexed pinkish flowers have bands of brown purple & yellow in the centre; April & May. Large, basal leaves heavily mottled brown. Summer dormant. Tuberos perennial for part shade in humus rich well drained soil. 20x30cm.

Erythronium dens-canis 'Frans Hals'	£4.50	Six petalled VIOLET-PINK flowers become reflexed with age; freely produced in spring. Lovely woodland, cormous perennial with pairs of glossy, marbled leaves. Retentive well drained humus rich soil in part shade. 30x30cm.
Erythronium dens-canis 'Lilac Wonder'	£4.25	Nodding, reflexed, LILAC-PURPLE flowers with a brownish-yellow eye; spring. Elliptic pairs of mid-green leaves marbled brown. Fertile humus rich well drained soil in part shade. 20x20cm.
Erythronium dens-canis 'Old Aberdeen'	£5.20	Rare form due to it's slow nature. The leaves are spectacularly mottled chocolate brown & held in pairs. Nodding, narrow, purple-pink flowers in mid spring. Cool, retentive, well drained woodland soil in part shade. (3-4) 15cm.
Erythronium dens-canis 'Pink Perfection'	£4.50	Lovely woodlander with pairs of spotted & marbled leaves. Delicate pastel pink flowers become reflexed with age & are freely produced in spring. Retentive well drained humus rich soil in part shade. 30x30cm.
Erythronium dens-canis 'Purple King'	£4.50	Large mid violet-pink flowers reflex with age; freely produced in spring. Lovely woodland, cormous perennial with pairs of glossy, heavily marbled leaves. Retentive well drained humus rich soil in part shade. 30x30cm.
Erythronium dens-canis 'Rose Queen'	£4.50	Nodding reflexed ROSE-PINK flowers with a deeper eye; Spring. Pairs of long glossy deep green leaves marbled purple-brown. Summer dormant. Fertile humus rich well drained soil in part shade. 20x20cm.
Erythronium 'Kinfaun's Pink'	£4.80	Hybrid raised in Scotland between revolutum x 'White Beauty'. Pairs of glossy leaves well mottled brown. Reflexing, soft pink flowers during mid to late spring. Multiplies well. Best in a cool, moist, woodland soil in part or full shade. (4-5) 20cm.
Erythronium 'Pagoda' (AGM)	£4.20	Woodlander making clumps of leathery, wide, green leaves. Large reflexed PALE-YELLOW flowers. Dies down by midsummer. Peaty, humus-rich, well drained soil in part or full shade. 30x30cms. Flowers: April-May.
Erythronium revolutum (AGM)	£5.20	Beautiful species with nodding, reflexed, rich pink flowers, occasionally paler as there is some variability from seed. Small yellow throat. Pairs of glossy leaves with heavy mottling. Cool, moist, humus rich soil in part shade. (3-5)30cm.
Erythronium tuolumnense 'Spindleston'	£7.30	Shorter more vigorous form of the species with good sized, slightly reflexing rich golden yellow flowers. Pairs of glossy green leaves. Multiplies very well in retentive yet well drained soil in part shade. (4-5) 20cm.
Erythronium umbilicatum	£5.20	Scarce but not difficult species with strongly reflexing rich gold flowers, stained brown on the exterior;- March & April. The pairs of glaucous flushed leaves are heavily mottled burgundy. Humus rich, retentive soil in part shade. (3-4) 20cm.
Eucomis autumnalis (AGM)	£5.50	2.00 Long lasting spikes of white flowers topped by a tuft - the whole spike resembling a pineapple. Attractive late summer flowering bulb with waxy clumps of narrow, green leaves. Mulch or lift & dry in winter. Well drained soil in sun. 45x45cm

Eucomis bicolor (AGM)	£5.50	2.00	Spotted brown stems carry a spike of STARRY PALE-GREEN FLOWERS EDGED MAROON. Large, glossy, overlapping leaves forming a rosette. Bulbous & marginally hardy. Any reasonable soil in sun.
Eucomis bicolor spotted selections	£5.95	2.00	Selected by Julian Sutton from a batch of seedlings, this is dramatic when the leaves unfurl as the reverses of the leaves are heavily spotted burgundy-black. Whorled spikes of green flowers, edged red during autumn. Light, free draining soil in a sunny, sheltered spot. (8-9) 60cm.
Eucomis comosa	£5.50	2.00	(syn. E.punctata) Stout stems topped with PALE CREAMY-GREEN flowers with LILAC anthers topped by a green pineapple like tuft; late summer. Rosettes of limp, strap-like, green leaves. Sunny, sheltered, well drained soil or winter protection.
Eucomis comosa 'Johannesburg'	£5.95	2.00	Fleshy, rosette forming bulb with semi-erect, wavy-margined light green leaves. spikes of starry white flowers with a candy pink eye, during late summer. The spike is topped with a pineapple like crown. Needs a sheltered spot in sharply drained soil in sun. (7-9)
Eucomis comosa 'Lotte'	£5.20	2.00	Very short white flowered form with the stumpy spike topped by a pineapple like rosette. Broad, very fleshy leaves. Flowers late summer & autumn. Sheltered spot in light, free draining soil in sun. (8-9) 30cm.
Eucomis comosa 'Sparkling Burgundy'	£5.95	2.00	Rosettes of broad, fleshy smokey-purple leaves. Spikes of purple-flushed green-white flowers topped by a pineapple-like crown in late summer. Bulbous plant for gritty, well drained very sheltered spot. (8-9) 45cm.
Eucomis comosa striata	£5.50	2.00	Selected for it's fantastic leaves when unfurling. The reverses are a series of burgundy spots which form long stripes. Whorled spikes of creamy-green flowers with a pink tinge during late summer & autumn. Light, free draining soil in sun. (7-9) 50cm.
Eucomis montana hybrids	£5.50	2.00	Rarely seen but one of the most outstanding species. Long, narrow spikes of pure white flowers with a prominent black eye on finely red speckled stems;- autumn. Smooth green leaves with a pale midrib. Light, free draining soil in sun.
Eucomis 'Playa Blanca'	£5.80	2.00	Very showy form with long spikes of starry, pure white flowers, topped by a huge pineapple like crown, during late summer into autumn. Basal rosettes of smooth green, wavy margined leaves. hardy in warm, sheltered gardens in a well drained sunny spot. Can be grown in pots & protected in winter. Needs full sun. (7-9) 60cm.
Eupatorium cannabinum	£4.20		Big, bold, back of the border perennial with stout stems carrying large, toothed, nettle-like leaves. Large, flattened umbels of dusky, purple-pink, tassel like flowers in autumn. Retentive soil in sun or part shade. (8-10) 175cm.
Eupatorium capillifolium (AGM)	£4.80		syn. 'Elegant Plume'. Back of the border variety from Mexico. Each season it sends up erect stems clothed in feathery finely cut Artemisia like foliage. Purple pink flowers in november are usually aborted by the frosts. Retentive well drained soil in sun. 150x60cm.
Eupatorium capillifolium 'Elegant Plume'	£4.80		Far more feathery than the species this has tall, willowy stems with frothy, very finely cut, needle like leaves. Although capable of flowering, it is often too late in UK climes & to be honest, add very little. Superb foliage plant for a sheltered, well drained spot in sun.
Eupatorium cyclophyllum	£5.80		A name of little botanical standing which grows in Blooms Gardens. Erect stems with nettle like leaves emerging, brownish-red, usually green at flowering. Domed heads of fluffy white flowers during late summer. Needs a retentive soil in sun or part shade. (7-9) 90cm.
Eupatorium dubium 'Baby Joe'	£4.80		Shorter form & one of the most vividly coloured with flattened heads of intense fuchsia-pink in late summer & autumn, held on almost black stems. Nettle like, bronze flushed leaves. retentive soil in sun or part shade. (7-9) 90cm.

Eupatorium dubium 'Little Joe'	£4.80		Rare species from NE USA, easier to grow even in part shade. It's much like a very rich coloured form of purpurea with dark pinky-purple flowers on dark stems. Coarse purple flushed leaves. Any reasonable soil in sun or part shade. (8-9) 90cm.
Eupatorium fistulosum	£4.50		Native of Eastern United States, this back of the border, upright perennial has strong stems with broadly elliptic leaves. Very large, domed heads of dusky, purplish-mauve flowers are loved by bees. Flowers mid to late summer. Adaptable to most soils, especially retentive in sun or part shade. (7-9) 150cm.
Eupatorium fistulosum albidum 'Bartered Bride'	£4.50		Tall, back of the border perennial with slightly drooping, narrow whorls of dark green leaves. Flattened, large heads of slightly off white flowers in late summer into autumn. Retentive soil in sun or part shade. (8-9) 180cm.
Eupatorium fistulosum albidum 'Ivory Towers'	£4.90		Stately, imposing back of the border plant, much loved by bees. Stout stems with whorls of grey tinged leaves. Huge, frothy open heads of white flowers from late summer through autumn. Retentive soil in sun or light shade. (8-10) 210cm.
Eupatorium lindleyanum	£4.15		Rarely seen Siberian species, with flattened heads of lilac-pink flowers from deeper pink buds during late summer & autumn. Dark stems with toothed, dark-green leaves. Retentive soil in sun or part shade. (8-10) 100cm.
Eupatorium maculatum 'Album'	£4.50		Large, flattened heads of fluffy creamy-white flowers, held on well branched stems during late summer & autumn. Dark flushed stems carry whorls of corrugated, thick textured coarse green leaves. Very hardy in a retentive soil in sun or part shade. (8-10) 120cm.
Eupatorium maculatum Atropurpureum Group (AGM)	£4.50		Very showy, tall back of the border perennial with large pyramidal panicles of rich rosy-purple, small flowers in dense heads; early autumn. Whorls of purple-flushed leaves up almost black stems. Retentive, well drained soil in sun or part shade. 180x90cm.
Eupatorium maculatum Atropurp. Group 'Gateway'	£5.65	2.00	Big, bold form with black stems & smokey flushed coarse green leaves. Domed heads of dusky pink flowers in autumn. Yellow autumn colour. Good wildlife plant. Retentive or moist soil in sun or shade. (7-9)200cm.
Eupatorium perfoliatum	£4.80		Large, flattened compound heads of small white flowers with a purple flush. Serrated, wrinkled grey-downy leaves on upright stems in late summer & autumn. From SE USA. Retentive or moist soil in sun or part shade. 150cm. (8-9)
Euphorbia amygdaloides robbiae (AGM)	£4.20		Slowly running' perennial with handsome, tall rosettes of dark, evergreen foliage. Showy heads of LONG LASTING YELLOW-GREEN FLOWERS. Prefers reasonably drained soil in shade making excellent ground cover. 60x60cms. Flowers: April-August.
Euphorbia 'Blackbird'	£4.80		Amazing foliage form with evergreen, deep purple leaves held in whorls. Loose, cylindrical heads of green flowers, suffused purple on dark stems;- mid spring. Likes a light, well drained soil in sun. 45x45cm.
Euphorbia ceratocarpa	£4.80		Clump-former making stands of erect stems tinged red at the base. Well branched heads of RICH YELLOW flowers' SUFFUSED LIME-GREEN making a bold display. Well clothed in wavy, pale green leaves. Reasonably drained soil in sun. 1.0m. SAP CAN CAUSE SKIN IRRITATION.
Euphorbia characias wulfenii (AGM)	£4.50		Wonderful feature plant with long stiff stems covered in evergreen blue-grey foliage & carrying HUGE CLUB-LIKE HEADS OF LIME-GREEN flowers in spring. Prefers well drained, sunny position sheltered from strong winds. 90x90cms. Flowers: March-May

Euphorbia characias wulfenii 'Silver Shadow'	£5.65		Bred by John Fielding. Shorter form with whorls of almost entirely evergreen, silver-grey leaves with just the finest white margin. Narrow, open spikes of small whitish flowers with red nectaries from February to May. A handsome foliage plant. Light, free draining soil in sun. (2-5) 90cm.
Euphorbia 'Copton Ash'	£4.80		E.segueriana niciana x nicaeensis. Small, slow growing, choice form, with whorls of narrow, elliptic, silver-grey leaves on almost white stems. Flattened umbels of golden-yellow flowers & bracts in late spring. Well drained sun. (4-5) 25cm.
Euphorbia dendroides	£4.50		Although not reliably hardy, this spectacular plant can form a small 4ltr tree with time in the right spot. Very thick, stout stems with fleshy whorls of linear leaves. Big heads of lime-yellow flowers in late spring. Striking in the cold greenhouse. (4-6) 150cm.
Euphorbia epithymoides (AGM)	£4.50		syn. polychroma. Full, rounded, neat growing variety massed in round, flat heads of SULPHUR-YELLOW bracts; April-May. Any reasonable soil in sun/part shade. 45x45cms. SAP CAN IRRITATE
Euphorbia epithymoides 'Bonfire'	£6.65	2.00	Lower growing form with the leaves rich smokey red, holding their colour well all summer. Golden yellow bracts ageing with an orange tinge over a long period through summer. Colours best in sun. Light, well drained soil in sun. (3-6) 30cm.
Euphorbia epithymoides 'First Blush'	£4.80		Low growing, deciduous Euphorbia with whorls of narrow grey-green leaves, edged cream, with a fine red rim. The first flush of leaves on emergence are copper-pink. Variegated heads of yellow& cream flowers in early summer. Best in a hot, dry soil in
Euphorbia epithymoides 'Purpurea'	£4.50		Useful herbaceous evergreen with leaves and stems of purple-mahogany and heads of yellow-green flowers. Any reasonable soil in sun or dappled shade. HARMFUL IF EATEN - SAP CAN IRRITATE EYES & SKIN. 30x30cms. Flowers: March-May
Euphorbia x gayeri 'Betten'	£4.60		Rather unusual, light, airy Euphorbia, almost continuously in flower from April to the frosts. Running root with willowy, erect stems with whorls of fine, fresh green leaves. Flattened heads of yellowish-green flowers. Retentive, well drained soil in sun or light shade. (3-
Euphorbia griffithii 'Fireglow'	£4.50		Heads of VIVID BRICK-RED over a mass of good foliage; early summer. Striking plant with upright, wiry stems. Spreading roots thrive in good, reasonably drained soil in sun or part shade. 75cms.
Euphorbia x martini 'Ascot Rainbow'	£5.95	2.00	A variegated x martinii with whorls of blue-green leaves, broadly edged gold, a central silver vein & rich red-purple new growth. Even the flowers are variegated green & gold;- late spring. Light, free draining soil in sun. (4-7)45cm.
Euphorbia x martinii 'Tiny Tim'	£6.45	2.00	Small, rounded, bushy evergreen with whorls of narrow, grey-green leaves. Domed heads of acid yellow-green, red eyed flowers during spring & early summer. A small form for a light, free draining soil in sun. (3-6) 45x50cm.
Euphorbia mellifera (AGM)	£4.80		A bold feature plant needing a sheltered wall in order to thrive. Whorls of smooth, green leaves have a silver central vein. Heads of gnarled, brown flowers in midsummer are heavily honey-scented. Well drained fertile soil in sun. 140x75cm.
Euphorbia myrsinites (AGM)	£4.50		Evergreen perennial with prostrate, radiating stems clothed in narrow, silvery grey leaves. Umbels of bright yellowish green heads at the tips; spring. Well drained, light soil in full sun.
Euphorbia nicaeensis	£4.80		Handsome evergreen making a bold clump of semi-woody stems clothed in rosettes of silver blue, fleshy foliage. HEADS OF GREENY-YELLOW. Well drained, sunny position. 40x40cms. Flowers: June-July. HARMFUL IF EATEN; SAP CAN IRRITATE
Euphorbia palustris 'Walenburg's Glorie'	£4.50		A selected, large flowered form of this moisture loving Euphorbia, with glowing heads of golden-green flowers. Soft green leaves on upright stems. Any reasonable soil, especially retentive in sun or light shade. (4-6) 75cm.
Euphorbia x pasteurii 'John Phillips'	£8.95		mellifera x stygiana. A very robust form of pasteurii looking more like stygiana than mellifera. Huge strong stems with whorls of leaves topped by large heads of honey scented honey-brown flowers during spring & summer. Needs a sheltered spot in sun. (5-

Euphorbia polychroma 'Lacy'	£4.50		One of the best variegated spurge's with radiating stems clothed in whorls of green & creamy-yellow leaves. Heads of yellow-green flowers also show the variegation; summer. Choice variety for a sheltered well drained soil in a sunny site. 45x45cms.
Euphorbia 'Roundway Titan'	£9.10		Much like a more showy, spectacular form of mellifera, probably with some stygiana thrown in. Large shrubby hybrid with whorls of velvety-green leaves with a silver vein. large heads honey scented brownish-green flowers through summer. Very sheltered spot in poor soil. (5-8) 180x180cm.
Euphorbia sarawschanica	£5.80	2.00	Rarely seen in cultivation, this Caucasian species has tall upright stems with narrow dark green leaves which colour well in the autumn. Heads of small golden-yellow green flowers top the plant almost all year. Well drained soil in sun. (4-8) 150cm.
Euphorbia seguieriana niciciana	£4.80		Woody based semi-evergreen with narrow, glaucous-blue leaves on gently arching stems. Terminal heads of yellow-green flowers in late summer & early autumn. Light, well drained soil in sun.
Euphorbia sikkimensis (AGM)	£5.20		Gently creeping by rhizomes. In spring the young shoots are attractively flushed red. Glabrous stems have soft green leaves veined white. Compact flattened lime green flowerheads in summer. Requires a moister soil in sun or part shade. 120x60cm.
Euphorbia stygiana	£9.95		Huge species from the Azores, hardy in a warm, sheltered position. Stout stems with whorls of bold, evergreen leaves, with a fine, central silver stripe. Loose heads of honey scented mustard coloured flowers in early summer. Sunny, sheltered spot. Ht to 2m
Euphorbia 'Whistleberry Garnet'	£4.95		Medium sized, semi-evergreen Euphorbia with whorls of rather large, fleshy leaves, tinged red in summer but turning rich burgundy in winter. Spikes of yellow-green flowers with a pronounced red eye in spring. Well drained, light soil in sun.
Euryops chrysanthemoides	£4.20		A tender perennial ideal for tubs. Free-branching, upright stems with deeply cut, grey foliage and a good cover of bright golden-yellow daisies; May-October. Well drained soil in sun. Protect in winter. 75x60cms.
Euryops tysonii	£4.50		Shrubby, South African species, with erect stems clothed in leathery, pointed, Euphorbia like grey green leaves. Heads of yellow, ragwort like flowers in summer. Seems hardy in a sheltered well drained spot in sun. (5-9) 45x45cm.
Fagopyrum dibotrys	£4.20		A bold imposing back of the border plant with strong upright stems clothed in heart-shaped leaves topped by clusters of small white flowers. Any not too dry soil in sun/part shade. 150x60cms. Flowers: June-July
Farfugium 'Last Dance'	£5.20		japonicum x hiberniflorum. One of the most prolific flowering Farfugiums with huge heads of bright yellow daisies from October & November. large, angular, rather rounded leaves, grey felted on the undersides. Only hardy in sheltered gardens but ideal for the cold greenhouse in shade. (10-11) 40cm.
Fascicularia bicolor	£8.90		Amazing Bromeliad from Chile foirming evergreen rosettes of narrow, leathery, spiny leaves with the centre becoming intense scarlet crimson with blue flowers held in white bracts. Best planted on their side in a sheltered spot or cold green house. 45cm.
Felicia petiolata	£4.20		A hardy form with clear pink daisies that first appear in late Spring but have a second flush in late season.Sunny site in well drained soil. Amazingly hardy in a sheltered spot in the south. 75x60cm.(5-
Ferraria divaricata	£4.50		Wierd, surprisingly tough, small South african bulbs from high rainfall areas. They have unusual, upward facing, six petalled curious yellow-brown flowers with crisped edges to the edges, during spring. The fine grassy leaves wither shortly afterwards & it is summer dormant. For the skilled grower. (4-5) 15cm.

Ficaria verna 'Brambling'	£3.80	was Ranunculus ficaria. Small, gently creeping ground cover with rosettes of glossy, leathery leaves purple shaded with silver & jade green markings on purple brown leaves. usual golden yellow flowers during mid spring. Summer dormant. Retentive, well drained soil in dappled shade. (3-4) 5cm.
Ficaria verna 'Brazen Hussy'	£3.80	An unusual plant found by chance in a wood, with yellow buttercup like flowers and deep brown glossy leaves. Summer dormant. Retentive soil in sun/part shade. 7x45cms. (3-5)
Ficaria verna chrysocephala	£4.20	was Ranunculus ficaria chrysocephala. This very large form of lesser celandine could easily be mistaken for a Caltha. In spring it produces rosettes of thick, fleshy leaves. Sprays of large golden-yellow buttercups from February to May. Summer dormant. Naturalises in retentive soil in sun or shade. (2-4) 30cm.
Ficaria verna 'Collarette'	£3.80	Slow spreading form of the lesser celandine with shield shaped leaves with black mottling. Short stems with brassy, golden-yellow anemone centred flowers with gappy petals;- spring. Summer dormant. (2-4) 5cm.
Ficaria verba pale yellow flowered	£3.80	Found on Rye Golf Course. Shallow, pale yellow, cup-shaped flowers fading paler with age; early spring. Heart-shaped, glossy, dark-green leaves with silver blotching. Good ground cover in moist, humus rich soil in part or full shade. 10x30cm.
Ficaria verna 'Primrose Elf'	£3.80	Very low growing, slightly more vigorous form with prostrate mats of almost plain green, occasionally marked leaves. A profusion of small, stary, narrow petalled pale primrose, silky flowers in spring. Remains evergreen longer than others. Light shade. (3-5) 5cm.
Ficaria verna 'Randall's White'	£3.80	Pale creamy-white flowers with purple-blue reverses; spring. Mats of glossy, plain green leaves. Dormant by summer. Any reasonable soil in sun or shade. Ht: 10cms
Filipendula kiraishiensis BSWJ1571	£4.50	Very dwarf form collected by Crug Farm. Flattened umbels of white flowers held on short stems in late summer. Basal rosettes of toothed, pinnate leaves. Leafy, moist yet well drained soil in sun or part shade. (7-9) 60cm.
Filipendula multijuga	£4.50	syn. palmata 'Nana'. From moist Japanese mountain meadows, this shorter form has flattened, fluffy heads of bright pink flowers on red flushed stems during mid to late summer. Basal mounds of pale-yellow green, red edged leaves. Good autumn colour. Retentive or moist soil in sun or shade. (7-8) 60cm.
Filipendula palmata 'Goteborg'	£4.50	Dwarf form collected by Gothenburg Botanical garden. Mounds of very finely cut, glossy green leaves, turning rusty in autumn. Glowing red stems topped by clouds of frothy, candy-pink flowers during late summer. Retentive, even moist soil in sun or shade. (7-
Filipendula palmata 'Rubra'	£5.95	Rarely seen species with mounds of very large, glossy green, palmate leaves. Wiry stems topped by bold plumes of fluffy rich reddish-pink flowers over a long period through mid to late summer. retentive or moist soil in sun or part shade. (7-8) 120cm.
