

Jeffersonia diphylla	£4.80	Tufted clump-former with unusual two-lobed leaves that open after flowering. Large, WHITE, cup-shaped flowers in spring. Dies down quickly after flowering. Hates root disturbance. Choice plant for cool, leafy, woodland soil in shade. 30x30cm.
Jovellana punctata	£4.60	Half hardy sub-shrub with clusters of small, Calceolaria like white pouches with purple spots in the throat during May to July. Nettle like leaves. Will only stand short periods of frost. Light well drained soil in sun. (5-7) 40cm.
Jovellana violacea (AGM)	£8.20	Small sub-shrub, native to Chile with unusual small lobed leaves with a fine brown rim & flush. Clusters of Calceolaria like, small lilac purple flowers like small pouches;- spring through summer. Needs a warm spot or cold greenhouse in winter. (5-8) 45x45cm.
Kalimeris incisa 'Alba'	£4.20	Closely related to Aster, this free flowering daisy forms a mound of small white daisies with a yellow eye all summer. Woody stems are clothed in dark green, toothed leaves. Easily grown in any reasonable soil in sun or part shade. (6-10) 60cm
Kalimeris mongolica	£4.50	Curious, erect, narrow clumps of slightly grey, pinnate leaves are topped by LILAC-PURPLE yellow-eyed daisies; summer. Looks much like an Aster but is a rare Mongolian native. Easily grown in ordinary soil in sun or part shade. 90x45cm.
Kalimeris mongolica 'Antonia'	£4.50	A much more compact form of mongolica, effectively behaving like a summer Aster. Willowy stems with narrow leaves, topped by clouds of small, rich-blue, yellow eyed daisies, from July to September. Easily grown in any retentive, well drained soil in sun or part shade. (7-9) 60cm.
Kalimeris pinnatifida 'Hortensia'	£4.20	(syn.Asteromoea) Erect, willowy stems carry small, toothed deep-green leaves. Crowded clusters of small white daisies with raised yellow Anemone-centres in late summer. Any reasonable soil in sun or part shade. (7-9) 120cm.
Kalimeris yomena 'Shogun'	£4.50	A lovely variegated plant with each leaf edged cream. Pale purple daisies in August & September on upright stems. Slowly forms a dense clump. Any soil in sun. 60x75cms
Kirengeshoma palmata (AGM)	£4.80	An unusual Japanese perennial noted for its buttermilk-yellow, 5cm (2inch), shuttlecock-like flowers of great charm; August & September. Good rich soil in part shade. 90x60cm.
Kirengeshoma palmata koreana	£5.20	Large, shuttlecock-like, PALE BUTTER YELLOW flowers freely produced in autumn. More compact than the type with irregular maple-like leaves on dark stems. A good perennial for late season colour. Fertile not too chalky soil in part shade. 60x45cm.
Kitagawia litoralis	£4.50	This umbellifer make correctly be a Peucedanum, but being a rare species it is hard to be sure. Mounds of finely cut, fresh green leaves. well branched stems carry good sized heads of creamy-white flowers during mid to late summer. Soundly perennial in a retentive soil in sun or part shade. (7-8) 60cm.
Kitaibela vitifolia	£4.20	A relative of the mallow from the Danube Statuesque plant with pointed vine like leaves, & lots of white Mallow flowers. Any reasonable soil in sun.180x90cm.(6-10)
Knautia macedonica 'Mars Midget'	£3.95	Smaller form, with branched stems carrying scabious-like, pincushion flowers of rich burgundy-red throughout summer. Rosettes of toothed leaves. Retentive, well drained soil in sun or
Knautia macedonica 'Red Knight'	£4.50	Strong growing, more upright form with well branched stems carrying pincushion like, rich crimson red flowers over a long period through summer. Much more red than the species. Downy grey basal leaves. Well drained soil in sun or part shade. (6-9) 90cm.
Knautia macedonica 'Thunder & Lightning'	£4.95	

Kniphofia thomsonii 'Kichocheo'	£5.80	This name is Swahili for poker & represents the form collected by John Grimshaw. More closely packed, denser spikes of orange & yellow bicoloured flowers during midsummer. Rosettes of narrow, very long, thickly fleshy leaves. Only hardy in the most sheltered of spots in a sunny spot. (6-8) 120cm.
Kniphofia thomsonii thomsonii 'Stern's Trip' (AGM)	£6.20	This unusual form dates back to the first introduction from William Stern so has been given this name to differentiate it from later introductions. Running species with channelled grey-green leaves. Tall, widely spaced spikes of narrowly tubular, coral-orange flowers during midsummer. Very sheltered spot or cold green house in winter. (6-8) 120cm.
Lamium maculatum 'Anne Greenaway'	£4.20	Spreading ground cover with yellow leaves margined green & a central silver stripe. Hooded soft pinky-purple flowers ; Late spring & early summer. Retentive well drained soil in part or full shade. 20x45cm.
Lamium maculatum 'Beacon Silver'	£4.20	Excellent, semi-evergreen, quick spreading carpeter with silver-white leaves. Short, tufty spikes of pink flowers; May & June. Preferably cool soil in part shade. 10x30cms.
Lamium maculatum 'Brightstone Pearl'	£3.95	
Lamium maculatum 'Ickwell Beauty'	£3.95	From the nearby National Trust property, this forms mats of dark green leaves with a broad, central silver white splash down each petal. Whorls of hooded white flowers in short spikes in spring. Good ground cover for difficult shady spots but adaptable. 10cm.
Lamium maculatum 'Mega Purple'	£6.75	Bred for hanging baskets, this has a very neat, compact habit. Rather jagged, almost entirely silver leaves with a fine green edge. Dense whorls of hooded rich purple flowers during spring, intermittently throughout the year. Easy in any soil in sun or shade.
Lamium maculatum 'Orchid Frost'	£4.60	Attractive low spreading Dead nettle, one of the most popular forms in America. The leaves are almost entirely silver with just a fine green picotee. Short spikes of hooded rich orchid-pink flowers during late spring & early summer. Excellent for dry shade.
Lamium maculatum 'Roseum'	£4.20	Invaluable ground cover, even for dry shade. Creeping, more or less evergreen mats of dark-green leaves with a central silver stripe. Spikes of hooded, rich pink-purple flowers in spring & early summer. Sun or shade. (4-6) 15cm.
Lamium maculatum 'White Nancy' (AGM)	£4.20	Good spreading, semi-evergreen ground cover the leaves almost entirely silver. Short spikes of hooded white flowers provide a contrast. Any retentive soil in light shade. 30x60cm. Flowers: April-July.
Lamium orvala	£4.20	Spikes of pinkish-purple, two lipped flowers held in whorls on square stems; late spring to summer. Non-invasive, clump-forming perennial with almost triangular, toothed, dark green leaves. Retentive yet drained soil in part shade. Ht: to 60cms.
Lamium orvala 'Album'	£4.50	Unusual upright form, with woody stems carrying large pale-green toothed leaves. Short spikes of comparatively large hooded dirty-white flowers in spring often repeating in autumn. Retentive soil in part or full shade. (5-7) 45cm.
Lamium orvala 'Silva'	£4.50	Unusual deciduous species with large, nettle like, toothed green leaves with a faint silver central stripe, disappearing by flowering. Large, tubular dusky purple flowers in spikes during early & midsummer. Any reasonable soil in sun or shade. 40cm.
Lamprocapnos spectabilis 'Valentine'	£4.80	Showy form of this cottage favourite. The new shoots emerge purple, becoming glaucous. Glowing red lockets on arching spikes in spring. Sheltered spot as it has fleshy stems. Retentive woodland soil in part shade. (3-5) 60cm.

Laserpitium latifolium	£4.95	Widespread although scarce over its European range, this perennial umbellifer has basal clumps of three lobed, divided green basal leaves. Flattened umbels of small white flowers held in radiating rosettes ; - mid to late summer. Slow to flowering. Any well drained soil in sun or part shade. 120cm.
Lathyrus davidii	£5.20	Small climber or scrambler with short, stumpy spikes of warm ochre white flowers quickly maturing a warm honey-mustard;- midsummer. Rounded, oval pale-green leaflets with scrambling tendrils. The best form of this plant we have ever had. Sun/pt.sh.Ht
Lathyrus gmelinii	£4.80	Rare species from N.Spain to Ukraine, herbaceous in habit with mounds of pinnate, softly hairy leaves. Short spikes of mustard brownish-yellow, pea like, keeled flowers in summer. Retentive, well drained soil in sun or light shade. (5-7) 30cm.
Lathyrus grandiflorus	£5.80	Vigorous small climber or scrambler which spreads freely. Stems have sparse blue-green leaves & panicles of deep magenta-pink pea-like flowers with maroon-red keels. Well drained soil in sun. Ht. to 2m. Flowers: Summer.
Lathyrus linifolius	£4.50	A semi-shrubby sweet-pea-like perennial with long, narrow, linear leaflets. The racemes of scented, hooded flowers vary from dusky pink to blue; June to August. Gently creeps in well drained soil in sun or part shade. (6-9) 30cm.
Lathyrus niger	£4.50	Erect, branched species with racemes of purplish flowers fading blue; summer. Gets its common name from the fact that the whole plant turns black as it dies back. Any reasonable soil in sun or part shade. 90x60cm.
Lathyrus pisiformis	£4.35	Small herbaceous scrambler with grey green leaves. Short spikes of mauvy-pink pea like flowers during early summer. Ideal scrambling into low shrubs. A rare species from Eastern Europe just to China. Retentive, well drained soil in sun or light shade. Ht
Lathyrus pratensis	£4.25	An East Anglian speciality with scrambling stems to 1.2mtrs with narrow leaves, twining as it grows. Good sized bright yellow pea-like flowers in large clusters are borne in summer & loved by wildlife. Likes a damp soil in sun. Ht to 1.2mtrs with support.
Lathyrus rotundifolius 'Tillyperone'	£6.20	Rare, slow growing form of rotundifolia with rounded grey-green leaflets, bred at Oxford Botanical garden. The flowers are a prolific rich dawn pink & smother the plant;- midsummer. Rarely available as it is so slow to produce. Rich, well drained soil in sun or light shade. (6-7) Ht to 2mtrs.
Lathyrus transsylvanicus	£4.95	Rare herbaceous perennial pea from Romania into Russia.
Lathyrus tuberosus	£4.80	A low sprawling climber for growing through shrubs. Clusters of rich rosy pink, pea-like flowers throughout summer followed by attractive seed pods. Spreads by runners. Soundly perennial. Humus-rich, fertile well drained soil in sun or part shade. 120x60cm.
Lathyrus 'Tubro'	£5.15	An unusual hybrid between these two species which should only be propagated by division. Slightly running root with delicate leaflets on twining stems. Small clusters of brick reddish-pink pea flowers during summer. Reasonable soil in sun. (7-8) Ht to 2.5mtrs.

Lathyrus venetus	£4.60	Superficially similar to the well known L.vernus with basal clumps of rounded leaflets. Larger flower clusters of pea like violet red flowers during late spring. Does not produce tendrils. Retentive, moist soil in sun or part shade. 30x45cm.
Lathyrus vernus (AGM)	£4.50	Early spring flowerer of the small, herbaceous species. The spikes of pea like, purple-blue flowers emerge with the new, divided leaves in spring. Dormant by midsummer. Best in woodland type soil in light shade. (2-4)30cm.
Lathyrus vernus 'Alboreus'	£4.50	Gently creeping, herbaceous sweet pea with BICOLOURED WHITE & CANDY-PINK flowers: March to June. Pinnate leaves. Easy to grow but slow & difficult to propagate. Any reasonable soil in sun or part shade. 30x45cm.
Lathyrus vernus 'Gracilis'	£7.50	Small, slow clump forming perennial, slow to propagate. Very finely cut, almost thread-like divided leaves. Small heads of pea-like, intense violet-blue flowers as the new leaves emerge from March to May. Retentive, rich, well drained soil in sun or part shade. (3-4) 25cm.
Lathyrus vernus 'Spring Melody'	£4.75	Small harbinger of spring with short spikes of bright candy-pink & white bicoloured flowers, emerging with the new pinnate leaves from February to May. usually dormant by midsummer. Fertile, humus rich soil in dappled shade is best although versatile. (2-4) 30cm.
Leontodon sp.	£4.20	Unidentified South African species much like a very showy dandelion. Basal clumps of elliptic, round lobed, bristly dark-green leaves. Branched, wiry stems with golden-yellow flowers during midsummer. Retentive, well drained soil in sun or light shade. (6-7)
Leontopodium coreanum	£4.50	Rarely seen species with spreading mats of silver flushed, dark-green, needle like leaves. Short stems with diamond shaped, grey-felted flowers, becoming yellow with age. Well drained soil in sun. (5-7) 10cm.
Leonurus turkestanicus	£4.60	
Lepechinia salviae	£5.20	Mexico. Bushy, semi herbaceous plant, close to Salvia, with oval shaped, corrugated, grey-green, highly aromatic leaves. Dense spikes of narrow, tubular, deep magenta purple flowers in late summer. Hardy in a well drained, sheltered spot in sun. 55cm.
Leptinella dendyi	£4.20	Totally prostrate, evergreen mat former with mats of the freshest green, finely cut leaves. Very short stems carry button like soft cream flowers from late spring, intermittently through summer. Good edger or rockery plant for a moist, well drained soil in sun or part shade. (5-8) 5cm.
Leptinella squalida 'Platt's Black'	£4.20	Brass Buttons is a totally flat, mat forming evergreen with pinnate, finely divided. fern like leaves, heavily flushed, purple, bronze & black. Rather small yellow-green stemless buttons, from mid-spring to midsummer. Retentive, well drained soil, colouring best in sun. (5-8) 5cm.
Leucanthemella serotina (AGM)	£4.50	Strong growing, erect perennial massed with large, daisy-like white flowers with a greenish yellow disc; early to late autumn. Stems lined with elliptic, toothed leaves. Any reliably moist soil in sun or part shade. Wet meadows of SE Europe. Ht: 1.5m.
Rhodanthemum 'Sunshine Peach'	£4.50	Bun forming alpine for the rockery with finely dissected, bright silver leaves. Good sized soft peach flowers around an orange centre;- March & April. Needs a sharply drained, gritty soil in a sunny sheltered spot. (3-4) 10x20cm.
Leucanthemum x superbum 'Alaska'	£4.20	Very large flowered form, with single, snow-white daisies with a bold golden-yellow eye from midsummer. Good for cutting. Well drained soil in sun or part shade. (7-8) 75cm.

Leucanthemum x superbum 'Amelia'	£4.20		Bred specifically for it's cutting potential, this produces crisp, single pure white flowers with excellent ray petals around a yolk yellow eye. Flowers continuously all summer. Retentive, well drained soil in sun or part shade. (7-10) 75cm.
Leucanthemum x superbum 'Banana Cream'	£4.50		Short edging form, flowering over a very long period. The very large flowers open lemon-yellow, turning light butter-yellow & finally creamy white. They are narrow petalled & almost semi-double. Flowers July to September. Glossy, toothed green leaves. Retentive, well drained soil in sun or part shade. (7-9) 40cm.
Leucanthemum x superbum 'Beaute Nivelloise'	£4.50		syn 'Old Court'. Fine specimen perennial the strong stems topped with large, ragged SINGLE, WHITE FLOWERS with wide petals and a yellow eye; no support needed. Good cut flower. Any reasonable soil insun or part shade. 90cms. Flowers: Summer.
Leucanthemum x superbum 'Brightside'	£4.20		Excellent as a cut flower, this has well developed, single white flowers around a yolk yellow centre during late summer. Basal clumps of toothed, dark green leaves. Well drained soil in sun. (7-9) 90cm.
Leucanthemum x superbum 'Broadway Lights'	£4.95		Much more compact form of 'Sonnenschein' with vary large, single soft creamy-yellow daisies with a deeper eye; June to September. Very floriferous & does not need staking. Easily grown in well drained soil in sun or part shade. (6-9) 80cm.
Leucanthemum x superbum 'Christine Hagemann'	£4.20		Large, fully double, slightly quilled, pure white daisies; early summer to early autumn. Good vigorous clone. Rich, retentive yet well drained soil in sun or part shade. 75x45cm.
Leucanthemum x superbum 'Eisstern'	£4.50		German selection, very rare in this country with a tight anemone centre & an outer wide ring of narrow, pristine white, long petals;- late summer. Fresh green, toothed leaves. Retentive, well drained soil in sun. (7-8) 85cm.
Leucanthemum x superbum 'Engelina'	£4.50		A short Shasta daisy with double, very fine, frilled & frothy petals around a yolk yellow cone;- mid to late summer. Toothed, leathery green leaves. Very distinct hybrid for a retentive, well drained soil in sun or part shade. (6-8) 40cm.
Leucanthemum x superbum 'Exhibition'	£5.80	2.00	Medium sized, old Shasta Daisy, with good sized, just about semi-double to single white daisies around a golden yellow eye, from June to August. Basal clumps of toothed, glossy green leaves. Loved by bees. Retentive, well drained soil in sun or part shade. (6-
Leucanthemum x superbum 'Freak'	£4.50		A short form with fully double, ragged tipped petalled white flowers. around the gold eye is a short row of upright, stumpy white petals. Flowers mid to late summer. Retentive, well drained soil in sun or part shade. (7-9) 30cm.
Leucanthemum x superbum 'Goldfinch'	£4.50		Possibly the yellowest of the Shasta daisies, this has semi-double, lemon-yellow daisies, slightly deeper on opening, eventually fading a soft cream. It's dwarf stature makes it ideal for pots. Flowers late summer. retentive, well drained soil in sun or light shade. (7-9)
Leucanthemum x superbum 'Goldrausch'	£4.50		Short, front of the border with very large, ragged white petalled flowers with a central rim of very fine, yolk yellow ragged petals around the large yellow eye;- midsummer. Very distinct & unusual. Well drained soil in sun or light shade. (6-8) 40cm.
Leucanthemum x superbum 'Goldfinch'	£6.65	3.00	Possibly the yellowest of the Shasta daisies, this has semi-double, lemon-yellow daisies, slightly deeper on opening, eventually fading a soft cream. It's dwarf stature makes it ideal for pots. Flowers late summer. retentive, well drained soil in sun or light shade. (7-9)
Leucanthemum x superbum 'Lacrosse'	£4.50		Short but distinct Shasta Daisy with single white daisies having spoon shaped petals, the tips being fluted. Deep gold eye. Flowers midsummer. Basal clumps of toothed, leathery green leaves. Retentive, well drained soil in sun or part shade. (6-8) 35cm.
Leucanthemum x superbum 'Little Miss Muffet'	£4.20		Choice, tidy edger, forming mats of dark green, round toothed leaves. a plethora of chalky, single white, yellow eyed daisies cover the mat in late summer & autumn. Retentive, well drained soil in sun or light shade. (7-9) 30cm.

Leucanthemum x superbum 'Manhattan'	£4.20		Big, bold, impressive back of the border perennial with huge, single, white daisies on branched stems; early summer to early autumn. Very vigorous. Fertile, moist yet well drained soil in sun or part shade. 150x90cm.
Leucanthemum x superbum 'Paladin'	£4.50		A reverse sport of 'Goldrausch' this is so named for it's resemblance to Victorian collars. Double if not triple layers of horizontally held white ray petals around a yolk yellow eye. Very long flowering period through mid to late summer. Easy in retentive, well drained soil in sun or light shade. (7-9) 60cm.
Leucanthemum x superbum 'Phyllis Smith'	£4.15		Unusual, single, pure-white daisies with narrow, twisted petals & recurved ray petals. Golden -eye. Good midsummer flowerer for a well drained soil in sun or light shade. (7-9) 60cm.
Leucanthemum x superbum 'Real Dream'	£4.50		Semi-double soft creamy yellow flowers, opening with a greenish tinge & ageing almost pure-white ; - mid to late summer. The plant constantly evolves. Basal mats of glossy, leathery toothed leaves. easy in any well drained soil in sun or part shade. (7-9) 50cm.
Leucanthemum x superbum 'Real Dream'	£4.80		Semi-double soft creamy yellow flowers, opening with a greenish tinge & ageing almost pure-white ; - mid to late summer. The plant constantly evolves. Basal mats of glossy, leathery toothed leaves. easy in any well drained soil in sun or part shade. (7-9) 50cm.
Leucanthemum x superbum 'Real Neat'	£4.80	3.00	Tidy, shorter variety with double flowers made of perfect trumpet-shaped petals, like a flute around a golden-yellow eye ; - mid to late summer. Mats of glossy, toothed leaves. Easy in a retentive, well drained soil in sun or part shade. (7-9) 50cm.
Leucanthemum x superbum 'Sante'	£4.50		Medium sized, mid season variety with double, rather narrow, quilled & tagged pure white flowers around a gold yellow eye from midsummer into autumn. Toothed, glossy green leaves. retentive, well drained soil in sun or part shade. (7-9) 65cm.
Leucanthemum x superbum 'Shapcott Gossamer'	£4.50		Bred by the UK National collection holder, this showy Shasta Daisy has good sized, semi double pure white flowers with very fine, twisting ray petals, around a golden eye, continuously from June to September. Toothed, glossy green leaves. Retentive, well drained soil in sun or part shade. (6-10) 60cm.
Leucanthemum x superbum 'Shapcott Ruffles'	£4.50		Bred by the National collection holder, this is semi-double with rows of very fine, swirling, fine white petals around a yolk yellow eye, during midsummer. basal rosettes of toothed dark-green leaves. Retentive, well drained soil in sun or part shade. (6-8)
Leucanthemum x superbum 'Shapcott Summer Clouds'	£4.50		Bred by the UK National collection holder, this tough hybrid has white daisies reminiscent of an Erigeron. Forms a ring composed of many layers of very fine white ray petals of a very formal shape. Gold eye. Flowers June to September. Green toothed leaves. Retentive, well drained soil in sun or part shade. (6-9) 60cm.
Leucanthemum x superbum 'Snowcap'	£4.20		Reliable, bold perennial topped with large, single, daisy-like WHITE FLOWERS with a yellow centre; June-August. A more compact form for any reasonably drained soil; best in sun. 45cms.
Leucanthemum x superbum 'Starburst'	£5.65	2.00	One of the largest of the Shasta daisies with single, 6 inch pristine white daisies with a yolk yellow eye;- late summer. Rosettes of glossy, toothed leaves. Retentive, well drained soil in sun or light shade. (7-9) 100cm.
Leucanthemum x superbum 'Stina'	£4.20		Anemone centred double form with short, shaggy ray petals around a yolk yellow central cone;- midsummer. Popular in Germany but not well known here. Well drained soil in sun or light shade. (6-8) 90cm.
Leucanthemum x superbum 'Sunny Side Up'	£4.20		Large flowers with a double layer of white petals around a raised anemone golden centre. Basal clumps of dark-green, toothed basal leaves. Good for cutting. Retentive, well drained soil in sun or part shade. (6-7) 75cm.

Leucanthemum x superbum 'T.E.Killin' (AGM)	£4.25	Large, double, white daisies with yellow anemone' centres; early summer to early autumn. Good vigorous clump former. Fertile, retentive soil in sun or part shade. 75x45cm.
Leucojum aestivum	£4.20	Robust bulbous perennial with erect, strap-shaped glossy, dark-green leaves. Leafless stems carry chocolate scented white flowers with green tips in late spring. Retentive or moist rich soil in sun. (4-5) 60cm.
Liatris ligulistylis	£4.25	Dense, bottlebrush-like spikes of purple-blue flowers, unusually opening from the top in late summer. Rosettes of grassy, stem clasping, pubescent leaves. Fertile, not to heavy soil in sun or light shade. Southern USA. (7-9) 90cm.
Liatris spicata 'Floristan Violet'	£4.20	Dense cylindrical spikes of deep-violet flowers open from the base making a mass of strap-shaped petals & long curling stigmas; late summer. Dark green leaves arranged in whorls up the stems. Well drained soil in full sun. 90x45cms.
Liatris spicata 'Floristan Weiss'	£4.20	Dense cylindrical spikes of PURE WHITE flowers open from the base making a brush of strap-shaped petals & long curling stigmas; late summer. Dark green leaves in whorls. Well drained soil in sun. 90x45cm.
Liatris spicata 'Kobold'	£4.20	Spectacular perennial producing stiff bottle brushes of fluffy, mauve flowers above tufts of grassy leaves; June to September. Prefers well drained soil & full sun. 45x30cms.
Libertia 'Amazing Grace'	£4.45	Showy hybrid with clusters of large, pure-white flowers with yellow stamens. Fans of dark-green, evergreen leaves. Retentive yet well drained soil in sun or part shade. (5-6) 75cm.
Libertia 'Ballrogan Blue'	£5.20	A slow growing, wispy form of caeruleascens, so coming from Chile, will need a warm garden. Erect ferns of narrow, leathery erect leaves. Well branched stems carry sprays of starry sky-blue flowers during mid to late summer. Free draining soil in a sunny, sheltered spot. (7-8) 45cm.
Libertia caeruleascens	£4.80	Chilean species forming fans of leathery, evergreen leaves. Short panicles of three-petalled pale-blue flowers in late spring & early summer. Fertile, well drained soil in a sunny, sheltered spot. (5-7) 60cm.
Libertia elegans	£4.60	Rarely seen Chilean species with upright fans of narrow, glaucous flushed sword like leaves. Airy, branched sprays of three petalled white flowers;- mid to late summer. Sheltered, well drained spot in sun. (6-8) 75cm.
Libertia formosa	£4.35	(syn. L.chilensis) Sprays of PURE WHITE saucers with yellow stamens over quick spreading clumps of iris-like foliage. Sun or part shade in well drained soil. 90x60cm. Flowers: June-July.
Libertia ixiooides 'Goldfinger'	£4.80	ixiooides x peregrinans. Evergreen clump former with splayed fans of strap like, leathery, golden-bronze leaves. Short stems with three petalled white flowers during early summer. Light, free draining soil in sun. (6-7) 45x45cm.
Libertia paniculata	£4.80	Not often seen, this erect evergreen has narrow fans of leathery, sword-like deep-green leaves. Branched stems carry open panicles of starry white flowers, during early summer. An Australian species for a retentive soil in part shade. (5-7) 60cm.
Ligularia calthifolia	£4.50	Big, bold, moisture loving perennial with large, almost rounded, finely toothed leaves. large, flattened heads of shaggy golden-yellow daisies suring mid to late summer. Retentive or moist soil in sun or part shade. (7-8) 120cm.

Ligularia dentata 'Enkelrig'	£4.35	This German selection has dark green rounded leaves emerging with a crimson flush, held on dark red stalks. Flattened heads of large golden-orange daisies during mid to late summer. Beware of slugs. Never too dry soil in sun or part shade. (7-8) 120cm.
Ligularia dentata 'Othello'	£6.20	Elegant clumps of large, heart-shaped, leathery leaves on long stalks topped with golden-orange daisies on branching stems; midsummer. Bold perennial for moist or boggy, rich soil in sun. 120x60cms.
Ligularia dentata 'Twilight'	£4.35	Wonderful foliage plant with large, rounded, intensely glossy, toothed leaves emerging a rich coppery, soft red with orange overtones, slightly greener by summer. Large, flattened heads of daisy like, golden-orange flowers in summer. Moist soil in sun or part shade. 90cm
Ligularia 'Franz Feldweber'	£4.80	Old Austrian hybrid, bred from dentata 'Moorblut'. Shorter in stature, this has good sized heads of rich golden-orange daisies through mid to late summer. The rounded leaves are heavily flushed purple. Strangely neglected in the UK. Best in a retentive or moist soil in sun or shade. (7-8) 80cm.
Ligularia x hessei	£4.60	(dentata x wilsoniana) A superb hybrid for moist rich soil in sun where it can produce it's large heart-shaped leaves with unfurl revealing bold conical spikes of rich orange-gold flowers all summer. Beware of slug damage when young. 150x90cm.
Ligularia 'Little Rocket'	£4.80	Very much like a condensed form of the popular 'Rocket'. Mounds of rounded, toothed, glossy green leaves on black flushed stems. Erect spikes of starry golden-yellow daisies from mid to late summer. Best in a retentive or moist soil in sun or part shade. (7-9)
Ligularia macrophylla	£5.65	Very large, imposing & rarely seen species from Western China with big, rounded, toothed blue-green leaves. Spikes of starry rich yellow flowers;- July to September. Retentive or moist soil in sun or part shade. (7-9) 150cm.
Ligularia 'Osiris Cafe Noir'	£5.25	Bred in Canada, this has amazing, large, deeply cut & jagged leaves which emerge dark chocolate brown, becoming pale brown with a gold tinge & finally olive green by summer. Flattened heads of yellow daisies in summer. Moist or retentive soil in sun or part
Ligularia 'Osiris Pistache'	£4.50	One of the largest of these pondside plants with rosettes of rounded leaves, subtly blended chartreuse & dark green with darker veining;- Domed head of golden orange shaggy daisies in late summer. Beware of slugs. Retentive or moist soil. (7-8)120cm.
Ligularia stenocephala	£4.50	Deciduous clump former, with triangular pointed, toothed leaves with heart-shaped bases. Tall, slender stems of yellow daisies with orange centres, held on black-green stems. Retentive soil in sun or part shade. (7-9) 150cm.
Ligularia 'The Rocket' (AGM)	£4.65	Slender blackish stems carry striking pyramidal spires of small, clear yellow daisies; summer. Forms clumps of elegant, deeply fingered, dark green leaves of triangular outline. Moist or boggy soil in sun or shade. 180x90cms.
Ligularia vorobievii	£4.80	Rarely seen species from Russia with coltsfoot like, thick textured, leathery basal leaves. Purple-black stems topped by golden-orange daisies;- midsummer. Retentive or moist soil in sun or part shade. (6-8) 90cm
Ligularia wilsoniana	£5.65	Makes impressive clumps of almost circular, large leaves (1ft. across) with hollow stalks. Slender, stiff spikes of golden-yellow daisies. Moist soil in sun or part shade. 150x60cm. Flowers: May-
Ligularia x yoshizoeana 'Palmatiloba'	£4.35	(dentata x japonica) Branching heads of BRIGHT ORANGE daisies in late summer. Large, elegant clumps of deeply cut basal leaves. Retentive or moist soil in sun or part shade. 150x90cm.
Lilium candidum (AGM)	£5.20	(Madonna lily) The leaves appear in Autumn & in summer carry spires of white flared trumpets . Good for cutting. Rich, well drained soil in sun. 90x30cm. (6-7)

Lilium columbianum	£5.20	Tall species from NW USA with whorls of dark green glossy leaves. Branched heads with nodding, reflexed, orangey-gold flowers with scattered purple-brown spots;- mid to late summer. Likes a moist, free draining neutral soil in light shade. (6-7) 175cm.
Lilium henryi (AGM)	£4.20	Vigorous Chinese species, with purple flushed stems. Scattered lance-shaped leaves are topped by crowded clusters of turkschap like, deep orange flowers, spotted black, with red anthers. easy in rich soil in part shade. (8-9) 150cm.
Lilium humboldtii	£4.20	Tall species from Oregon with stout stems having whorls of glossy green, broadly elliptic leaves. Heavily branched stems carry a profusion of reflexed orange flowers, heavily covered in purple spotting, during autumn. Retentive, well drained soil in sun or part shade. (8-9) 170cm.
Lilium kelleyanum	£5.20	Native of moist soil by streams in the Sierra Nevadas of California. Erect stems with scattered, narrowly elliptic leaves. Branched stems with turkschap like soft orange flowers with purple speckling, during June & July. Not easy in cultivation, needing a retentive soil with some shade. (6-7) 75cm.
Lilium kelloggii	£5.20	From Northern California & S.Oregon. This turkschap lily has branched stems with reflexing blush-pink flowers with a large white throat, speckled during July & August. They have a soft, sweet scent. Needs good drainage but constant moisture. (7-8) 100cm.
Lilium lankongense	£6.75	Rare species from Central China, with racemes of nodding, turkschap rose-pink, fragrant flowers spotted purple, with purple anthers. Flowers late summer. Scattered, rough textured leaves on erect stems. Humus rich soil in dappled shade. (7-8) 120cm.
Lilium leichtlinii	£4.20	Unusual turkschap species from China with nodding, reflexed, orange-red flowers, regularly spotted brown-purple;- mid to late summer. Unusual as it spreads by stolons. Humus rich, woodland soil in part shade. (7-8) 150cm.
Lilium mackliniae	£4.95	Small woodland species with nodding, bell shaped white flowers, flushed pink on the exterior held in clusters if the upper leaf axils;- midsummer. Sparse, scattered whorls of green leaves. Cool, moist woodland soil, preferably in Scotland & shade. (6-7) 30cm.
Lilium pardalinum (AGM)	£4.15	Vigorous clump forming rhizomatous Lily, with dense whorls of lance-shaped dull-green leaves. Racemes of unscented, nodding turkschap orange-red, crimson flushed flowers, paler towards the bases & spotted crimson. Moist soil in sun or part shade. (6-7)
Lilium philippinense	£4.20	Rarely seen species, close to formosanum, flowering from very young. Long, scattered leaves on strong stems topped by clusters of very long, trumpet shaped white flowers, flushed purple & green on the exterior & yellow stamens. Well drained site in sun.60cm
Lilium poilanei	£6.50	A very rare species, locally endemic to a few cliffs in Vietnam. Our form is very different to the yellow form offered elsewhere. Very tall stems with narrow leathery leaves. Airy heads of well scented jade green recurving flowers with variable burgundy markings in the throat, during midsummer. Spreads by stolons. Untried in cultivation. (7-8) 170cm.
Lilium pumilum (AGM)	£4.20	(syn.L.tenuifolium) Beautiful dwarf lily rarely more than 45cms. The wiry stems have sparse, linear leaves & turkschap-like, bright sealing wax-red flowers all summer. Very fragrant. Gritty well drained soil in sun. 45x30cm.
Lilium regale (AGM)	£4.20	Tall bulbous perennial with branching spikes of very fragrant, huge, WHITE, funnel shaped flowers with a canary yellow throat & rose flush on the exterior. Rich, glossy leaves. Excellent in well drained soil in sun. 120x30cm.
Lilium regale 'Album'	£4.20	Fragrant, broadly trumpet-shaped pure-white flowers, with distinct orange stamens. Arching, purple-flushed grey-green stems. Moistyet well drained soil in sun. 120x45cm. (6-7)

Lilium rosthornii	£5.50	Erect, purple-flushed stems with faintly scented, turkscap-like, DEEP ORANGE flowers spotted black, with red anthers; July & August. Lance shaped leaves. Easily grown in ordinary soil in sun or part shade. 120x30cm.
Lilium wallichianum	£4.20	Umbels of large, highly scented, horizontal, CREAMY-WHITE flowers, widely flared at the mouth; August & September. Purple flushed, stiff, green stems clothed in widely spaced, rich green leaves. Moist, humus rich soil in part shade. 120x30cm.
Limonium platyphyllum	£4.20	Rosettes forming evergreen with spathe-shaped dark, leathery-green leaves with red flushed reverses. Branched, wiry stems carry small, papery lavender blue flowers from persistent, chaffy white calyces;- late summer. Good for cutting & drying. Sunny spot. (6-9)
Limonium platyphyllum 'Robert Butler'		Wiry stems covered in clouds of papery, intense violet-purple flowers from white calyces; late summer. Very long blooming & dries well. Rosettes of spoon-shaped leaves. Well drained soil in full sun. 60x60cm.
Linaria anticaria 'Antique Silver'	£4.20	flowers: Small spikes of pure white tinged grey & veined powder-blue; in abundance all summer. Low-spreading, compact ground cover with narrow, silver-grey leaves. Gritty, well drained soil in
Linaria 'Peachy'	£4.80	Tidily erect perennial with willowy stems clothed in fine, needle like, silver-grey leaves. Narrow spikes of small, snapdragon like flowers subtly suffused peach, cream & pink. Distinctly more yellow when cool hinting at it's dalmatica x purpurea breeding. From France. Dry, poor soil in sun. (6-9) 100cm.
Liparis kumokiri	£8.80	A very hardy Japanese Orchid, growing from a pseudobulb near the surface. Pairs of oval, pleated, wavy margined leaves. Spikes of intricate, greenish-white flowers during summer. Needs a cold winter & a cool, moist woodland soil in part or full shade. (6-7) 20cm.
Liriope muscari (AGM)	£4.50	Colonizer forming dense tuft of evergreen, grassy, dark, shining, arching leaves. Dense spikes of tiny DARK VIOLET flowers. Fertile, moist yet drained soil in sun or shade. 30x45cm. Flowers: August-September.
Liriope muscari 'Big Blue'	£4.50	A slow, dense, evergreen ground cover very popular in the USA. Much like our familiar garden form but larger in all parts. Grassy, arching, strap-like leaves & spikes of small BLUE-VIOLET flowers in autumn. Fertile, retentive soil in sun or shade. 45x45cm.
Liriope muscari 'Christmas Tree'	£4.50	Selected for it's broad, dark evergreen leaves, forming arching clumps. Spikes of strong purple flowers. Needs a sheltered spot, to make it vigorous. Humus rich soil in part or full shade. (8-11) 30cm.
Liriope muscari 'Gold Banded'	£4.50	A rather broad leaved Liriope with glossy green, arching leaves having a narrow gold edge, most striking in spring. Fat spikes of rich purple flowers during late summer & autumn. Best in a never too dry soil in sun or shade. (8-10) 30cm.
Liriope muscari 'Goldfinger'	£4.80	Evergreen clump former with arching fans of leathery strap like chartreuse yellow leaves which do not scorch in sun. VERY DIFFICULT TO GROW WELL ALMOST DECIDUOUS IN WINTER.
Liriope muscari 'Ingwersen'	£4.50	Strong, vigorous evergreen with arching clumps of narrow, dark-green leaves. Short spikes of lilac-purple flowers from purple buds are freely produced in autumn followed occasionally by fruit. Good ground cover for retentive soil in sun or shade. 30cm.
Liriope muscari 'Isabella'	£4.50	Distinct colour form with narrow, erect pokers of densely packed soft lilac-pink flowers during late summer & autumn. Rather quicker spreading evergreen clumps of arching, leathery green leaves. Never too dry soil in sun or shade. (7-9) 25cm.
Liriope muscari 'Moneymaker'	£4.50	Seems a much better garden plant than other Liriope with slightly broader, dark green leaves. Spikes of purple-blue flowers in autumn followed by berries which age black. Retentive soil in sun or part shade. (8-10) 20cm.

Liriope muscari 'Okina'	£4.95		Japanese selection with evergreen clumps of strap like leaves almost entirely white in spring with just a fine green streaking. As the season progresses with become more green with a fine white fleck. Lilac flowers in autumn. Retentive soil in part shade. 25cm.
Liriope muscari 'Royal Purple'	£4.45		Spreading clumps of evergreen, shining, grassy, arching leaves from which arise dense spikes of grape-like DEEP PURPLE flowers in autumn. Fertile, moist yet drained soil in sun or shade.
Liriope muscari 'Variegata'	£4.60		A rare evergreen perennial spreading by fleshy rhizomes. The strap-like glossy leaves are regularly edged cream. Spikes of thickly clustered bell-shaped VIOLET flowers. Slow to multiply. Sheltered site in retentive, fertile soil sun or shade. 30x30cm. (7-9)
Liriope muscari 'Webster Wideleaf'	£4.45		
Liriope spicata	£3.75		Chinese evergreen species with a rhizomatous root. Arching clumps of narrow, dark green leaves & spikes of small bell shaped pale violet flowers in late summer followed by black berries. Rich, not too dry or chalky soil in part or full shade. (8-9) 25cm.
Liriope spicata 'Alba'	£4.50		Semi-evergreen, tufted clump former making mats of small, arching dark-green leaves. Short spikes of small white flowers are held on violet stems in late summer & autumn, followed by black berries. Retentive, fertile soil in part or full shade. (8-9) 25cm.
Liriope spicata 'Gin-ryu'	£4.35		Compact, small tuft forming evergreen, with arching fans of dark-green leaves, with a regular silver variegation. Short spikes of violet-blue flowers in late summer followed by black berries. Retentive, rich soil in part or full shade. (8-9) 10cm.
Lithodora rosmarinifolia	£6.75	2.00	From Southern Italy & Sicily, this hummock forming alpine has narrow, dark-green bristly leaves, grey-green beneath, held on short stems. Heads of starry, gentian-blue flowers through summer into autumn. Likes a rather poor dry soil in a sheltered spot in sun.
Lithophragma heterophyllum	£4.80		Small diminutive woodlander from Western USA, looking much like a condensed form of Tellima. Creeping mats of small, hairy leaves. Spikes of starry, tiny yellowish-green flowers in late spring & early summer. easily grown in any retentive soil in part or full shade. (4-7) 15cm.
Loasa triphylla volcanica	£4.20		A vicious, small herbaceous perennial from Chile with oval leaves covered in fine, strongly stinging hairs. Branched stems with lampshade like white flowers, marked gold & red at the eye throughout summer. Not long lived but self seeds. Sheltered pot in sun. (6-9) 75cm.
Lobelia bridgesii	£8.55		Semi shrubby perennial from the foothills of the Andes & like a pink tupa. Spikes of trumpet-shaped soft pink flowers with a red throat during mid to late summer. Thick stems with whorls of toothed, pointed leaves. Needs a very sheltered spot in sun. (7-8)
Lobelia cardinalis 'Bee's Flame'	£4.50		Quite unlike the bedding varieties. Beetroot-red leaves arranged up long, stiff stems of the same colour. Long spikes of brilliant scarlet-red lipped flowers during late summer. Mulch in winter. Rich, damp soil in full sun. 80x45cm.
Lobelia cardinalis 'Black Truffle'	£4.80		American selection & certainly, one of the darkest foliage forms, it is a rich beetroot-red, almost black. Tall, open spikes of rather spidery, glowing scarlet-red flowers throughout summer. Rich, fertile, reliably moist soil in sun or part shade. Mulch in cold areas.
Lobelia 'Compton Pink'	£4.50		Very free flowering hybrid with densely packed spikes of fan-shaped blush pink flowers with a lipstick red throat. Purple flushed tube. Basal rosettes of glossy green leaves. Retentive yet never wet soil in sun or part shade. (7-9) 90cm.
Lobelia sessilifolia	£4.50		Not often seen, this species has thick stems clothed in narrow pointed leaves topped by unbranched spikes of lavender blue flowers with deeper purple throats in late summer. Retentive soil in a sheltered position. 75x45cm.

Lobelia siphilitica	£5.80	2.00	Erect, leafy stems studded with CLEAR-BLUE lipped flowers for many weeks; Jult - September. Semi-evergreen, leafy, basal rosettes. Humus rich, moist soil in part shade. 90x30cms.
Lobelia x speciosa 'Hadspen Purple'	£6.25	2.00	choice new hybrid, selected at Hadpsen House, with erect spikles of tubular, rich purple flowers, with a white throat. Basal rosettes of glossy, slightly bronze flushed leaves. Retentive or moist soil in sun. (7-9) 100cm.
Lobelia x speciosa 'Monet Moment'	£4.50		Moisture loving perennial with erect stems topped by spikes of rich-pink flowers, each having a small white throat & emerging from darker buds;- mid to late summer. Fleshy, green leaves. Retentive or moist soil in sun or light shade. (6-8) 60cm.
Lobelia x speciosa 'Ruby Slippers'	£4.50		American selection. with spikes of tubular, deep cherry-crimson flowers, appearing from dark purple buds during mid to late summer. Fresh, glossy green leaves. Retentive, not too dry soil in sun or light shade. (7-9) 100cm.
Lobelia x speciosa 'Sparkling Ruby'	£4.50		Erect spikes of rich ruby-red flowers on dark stems;- midsummer into autumn. Basal rosettes of glossy, fresh green leaves. Retentive, even moist soil in sun or part shade. (7-9)90cm.
Lobelia tupa	£5.20		Magnificent tall plant with narrow erect spikes of strange claw like reddish-brown flowers in late summer, held on dark stems. Large downy pale-green leaves. Needs a very sheltered warm position in full sun. 150x90cm.
Lupinus latifolius parishii	£4.80		Tall, lush, bushy deciduous Lupin with large whorls of finely cut, radial leaves. 30cm spikes of purple-pink flowers which smell of grape soda, during mid to late summer. Needs a retentive but sharply drained soil in sun. (7-9) 90cm.
Lychnis chalcedonica (AGM)	£4.20		Tall, wiry stems carry heads of small but beautiful VERMILLION-RED crosses; unremarkable glossy foliage. Fertile soil in sun. 90x45cm. Flowers: July-August.
Lychnis chalcedonica albiflora	£3.95		Undistinguished leaves are topped by erect stems & clusters of PURE WHITE cross-shaped flowers throughout summer. A lovely plant to grow through shrubs. Fertile, not too dry soil in sun. 90x45cm. Flowers: Summer
Lychnis chalcedonica 'Carnea'	£4.20		Unusual pink form of this usually scarlet species with dense, domed umbels of cut, two-toned, salmon-pink flowers, paler at the edges during early summer. Good cottage garden plant. Retentive, well drained soil in sun or light shade. (7-8)100cm
Lychnis coronaria (AGM)	£4.20		A good plant for poor dry gravelly soils. Clusters of cup-shaped REDDISH-PURPLE flowers are freely produced all summer. Grey flannel-like basal rosettes. Self seeds mildly. Very well drained soil in sun. 90x45cm.
Lychnis coronaria 'Alba' (AGM)	£5.80	2.00	Heads of 2.5cms (1inch) WHITE, saucer-shaped flowers on branching stems; June to September. Intensely woolly, grey leaves form basal clumps. Fertile, free draining soil in full sun. 90x45cms.
Lychnis coronaria 'Gardener's World'	£7.00		Sterile form, therefore very long flowering. Rosettes of wooly, silver-grey leaves & well branched stems carrying double, rose-like, velvety, blood red flowers throughout the summer. Light, well drained soil in sun or part shade. (6-9) 60x60cm.
Lychnis 'Dwarf Molten Lava'	£4.20		A short, edging form with sombre, brown flushed leaves. Heads of vibrant, intense scarlet-orange flowers over a long period through summer. Colours best in sun. Light, free draining soil in sun or light shade. (6-9) 20cm.

Lychnis 'Hill Grounds'	£4.80	coronaria x flos-jovis. Sterile hybrid which occurred in a Northamptonshire garden, flowering incessantly all summer. Basal clumps of heavily silver felted leaves. Heads of glowing cerise-pink flowers with a paler eye, throughout summer. Best divided regularly. Light, free draining soil in sun. (6-10) 75cm.
Lychnis viscaria 'Alba'	£4.20	Sticky unbranched stems with panicles of PURE WHITE flowers with distinctive notched petals; early summer. Small tufts of narrow, dark green, evergreen leaves. Well drained soil in sun or part shade. 45x45cm.
Lychnis viscaria 'Splendens'	£4.20	Tough littlr garden plant with basal rosettes of narrow evergreen leaves. Sticky stems with heads of gappy petalled rich dusky pink flowers over a long period through summer. Any reasonable soil in sun or part shade. (5-8) 40cm.
Lychnis yunnanensis	£4.35	A species for the front of the border forming good evergreen ground cover. Tight rosettes of lance shaped leaves. Short spires of CREAMY-WHITE flowers on slightly sticky stems. Fertile soil in sun. 30x30cm. Flowers: June-July.
Lycoris radiata	£4.50	Unusual bulbous perennial, with Nerine-like, rose-red, strongly reflexing flowers with very long filaments;- late summer & autumn. Strap-like, linear leaves after flowering. Best in a cold greenhouse in a pot for winter. (8-9) 40cm.
Lysichiton americanus (AGM)	£7.85	Striking perennial with large, to 40cm, bright yellow, cuckoo-pint-like spathes producing a musky smell; early spring. Basal rosettes of ovate, heavily veined, leathery leaves. Fertile, humus-rich soil on the margins of a pool; sun or part shade. 1x1.2m.
camtschatcensis 'Crocodile Tears'	£7.85	Bog or marginal which in spring produces a very large, unscented creamy-white spathe. The large, oval, fleshy leaves are covered in short, irregular burgundy banding, reminiscent of Crocodile skin. Moist or wet, damp boggy soil in sun or part shade. (3-4) 60cm.
Lysimachia ciliata 'Firecracker' (AGM)	£4.20	Creeping perennial with dark-chocolate leaves throughout the season & delicate SULPHUR-YELLOW flowers providing an attractive contrast. Spreads quickly in damp soil but is amenable to most sites. 75x60cm. Flowers: June-August
Lysimachia clethroides (AGM)	£4.20	Lovely clump-former the erect stems topped by arching wands of small WHITE flowers; August-September. Requires a moist soil in sun or part shade. 90x60cms.
Lysimachia ephemerum	£4.50	A lovely foliage perennial with silver-grey leaves lining strong stems topped by dense spires of WHITE flowers; July & August. Moist soil in sun or shade. 90x45cms.
Lysimachia fortunei	£4.20	Numerous, upright red stems topped with long, loose spikes of white flushed pale pink, 5-petalled flowers; June-July. Narrowly ovate, pointed, mid green leaves. Rhizomatous perennial for a humus-rich, moist yet drained soil in sun or part shade. Ht: 50cms.
Lysimachia nummularia 'Aurea' (AGM)	£4.20	Prostrate mat former for retentive soils. Rooting carpets of rounded, burnished gold-yellow leaves. The mat is studded with gold cup-shaped flowers;- midsummer. More or less evergreen. Colours best in sun, greener in shade. (6-7) 5cm x indefinite.
Lysimachia punctata 'Alexander'	£4.20	Unusual form the mid-green leaves irregularly edged cream & suffused pink when young. Long, dense spikes of funnel-shaped, BRIGHT YELLOW flowers; summer. Clump-forming perennial for retentive soil in sun or part shade. 75x60cms.
Lysimachia punctata 'Gauthier Brousse'	£4.20	

Lysimachia punctata 'Hometown Hero'	£4.60	very floriferous form of one of our native forms of loosestrife. Profuse heads of butter-yellow, dark eyed flowers, held on shorter stems all summer in profusion. gently spreads in retentive or moist soil in sun or light shade. (5-8) 60cm.
Lysimachia 'Snow Candles'	£4.50	A sterile hybrid between clethroides & ephemerum meaning that the white wands are produced over a much longer period during summer. Gently spreading ground cover for a retentive or moist soil in sun or part shade. (5-9)90cm.
Lysimachia cf. terrestris	£4.20	Unidentified form we found growing near Bill Gates' house on Lake Shammish in Washington state. Erect stems with domed heads of starry golden-yellow flowers with an orange eye; summer into autumn. Red autumn colour. Retentive or moist soil in sun or part shade. 96-9) 100cm.
Lysimachia thyrsoflora	£4.20	Airy branched heads of simple, cup-shaped pale-yellow flowers in loose spikes. Whorls of elliptic, dark-green leaves on upright stems. Retentive or moist soil in sun or part shade. (7-9) 85cm.
Lysionotus 'Lavender Lady'	£6.20	Unusual almost woody based sub-shrub spreading by suckers. Small, toothed, leathery dark green leaves Very large, trumpet-shaped light lavender flower flowers in autumn. Not easy, needing constant moisture in ACID soil in shade. On the borderlines of hardiness. (8-10) 40cm.
Lythrum salicaria 'Lady Sackville'	£4.50	Erect perennial, with spikes of starry, rose-purple flowers from mid to late summer. Narrow, willowy leaves take on yellow autumnal colour. Retentive or moist soil in sun. Best deadheaded to prevent self seeding. (6-8) 60cm.
Lythrum salicaria 'Robert'	£4.50	A fine feature plant with branching spikes of clear pink flowers; late summer. Good autumn colour..Any reasonably moist or boggy soil in sun or shade. 120cms. (4ft)
Lythrum salicaria 'Swirl'	£4.50	Useful dwarf form, with erectly held spikes of four-petalled rich rosy-purple flowers throughout midsummer. Woody based stems with elliptic leaves. Retentive or moist soil in sun or part shade. (6-
Lythrum salicaria 'The Beacon'	£4.20	Erect spikes of starry, glowing carmine-red flowers on stiff branching stems in late spring through summer. Lance shaped fresh-green leaves. Retentive or moist soil in sun or light shade. (6-
Lythrum salicaria 'Zigeunerblut'	£4.20	'Gypsy Blood'. Erect spikes of starry glowing purple-red flowers over a long period in summer. Narrow fresh green leaves. One of the tallest cultivars for the back of a retentive or moist border in sun or part shade. (7-9) 120cm.
Lythrum virgatum 'Dropmore Purple'	£4.60	Long, erect spikes of clear-purple flowers on unbranched stems in late summer & early autumn. The whole effect is much more leafy & elegant as opposed to other cultivars. Retentive or moist soil in sun or part shade. (7-9) 100cm.
Lythrum virgatum 'Rosy Gem'	£4.15	Slender spikes of BRIGHT ROSY-PINK flowers produced over several weeks; July & August. Very adaptable perennial - prefers a moist soil in a sunny site. 90x45cms.
