

Macleaya x kewensis 'Flamingo' (AGM)	£6.75	2.00	Statuesque plants throwing up many tall, strong, grey-green stems carrying long, arching plumes of creamy-pink, fluffy flowers. Large, rounded, lobed leaves of grey green. Any reasonable soil in sun or part shade. NEEDS SPACE! 2.0m+. Flower: July-Sept.
Macleaya microcarpa 'Kelways Coral Plume' (AGM)	£6.75	3.00	Imposing back of border plant with a running rootstock & leafy stems, blue-green above, grey white below topped with branching plumes of coral pink. Needs a lot of space in well drained soil in sun. 2.1x0.9m+. Flowers: Summer
Macleaya microcarpa 'Spetchley Ruby'	£4.50		Small, airy plumes of red flowers, followed by persistent ruby-red seed heads. Grey lobed leaves have a slight ruby flush. Less vigorous than other forms & sought after. Retentive, well drained soil in sun or part shade. (8-9) 2.0x2.0
Maianthemum bifolium kamtschaticum	£4.80		The Russian form of this widespread woodland species. Heart-shaped, glossy, deeply veined leaves emerge with the short spikes of starry, small white flowers in spring. Red fruits in autumn. Humus rich, woodland soil in part or full shade. (3-5) 20cm.
Maianthemum bifolium kamtschaticum minimum	£4.80		The smallest form I have ever seen with very small, heart shaped fresh green leaves, almost stemless. Short spikes of white flowers in spring followed by red fruit. Probably best in a sink as it is so small. Humus rich soil in part shade. (4-5)5cm.
Maianthemum canadense	£4.50		Gently spreading woodlander from NW USA & Canada. Smooth green, heart shaped leaves form a carpet. Short spikes of small, starry white flowers in late spring. Humus rich, woodland soil in part or full shade. (3-5) 15cm
Maianthemum oleraceum	£5.20		Was Smilacina. Dramatic species from Himalayas & W.China with arching red stems & deeply ribbed leaves. Beached panicles of white flowers in late spring followed by red fruit, maturing purple. Leafy woodland soil in part shade. (5-6) 80cm.
Maianthemum racemosum (AGM)	£4.25		Character plant the arching stems lined with fresh-green leaves (similar to Solomon's Seal) and fluffy, delightfully scented spikes of creamy-white flowers at the end of each stem. A choice plant for cool shade in non-chalky soil. 75cms. Flowers: May-June.
Maianthemum racemosum amplexicaule 'Emily Moody'	£4.60		Unusual woodlander, closely allied to Solomon's Seal, with small clusters of hanging, bell-shaped cream flowers from the upper leaf axils in spring. Pairs of fresh green leaves on stout stems. Humus rich, woodland soil in part or full shade. (3-5)100
Mandragora officinarum	£5.50		Upward facing tubular bell shaped greenish-white flowers look like a nest of pheasant's eggs; spring, followed by large yellow fruit. Rosettes of dark green glossy leaves. Fertile well drained soil in sun. 15x30cm.
Marrubium vulgare	£4.57		Native over much of Southern Europe & Asia, this has intensely silver, almost woolly, aromatic leaves. Whorls of tiny, tubular white flowers in the leaf axils throughout summer. Often used as a tincture for the common cold. Real sun lover for a sharply drained soil in sun. (6-9) 60cm.
Marshallia grandiflora	£5.20		Coll;-Rockton, Illinois. Rare composite with basal clumps of glabrous elongated leaves up to 1 foot long. Lilac-pink pompom daisies are produced from large bracts in summer. Relatively untried in this country so we must evaluate. ordinary soil in sun.

Mathiasella bupleuroides 'Green Dream'	£4.80		Only discovered in Mexico in 1954 this evergreen umbellifer has striking, divided, ash-grey leaves on stout stems. Euphorbia like heads of jade green flowers take on pink colouration by autumn. Seems hardy in a sheltered, well drained spot in sun. 90cm.
Matthiola fruticulosa 'Alba'	£4.20		Sub-shrubby evergreen, with whorls of hairy grey-green leaves. Heads of heavenly scented pure-white flowers from late spring through summer. mildly self seeds. Sharply drained soil in full sun. (5-9) 60cm.
Matthiola incana 'Pillow Talk'	£4.20		Woody stemmed perennial with whorls of fleshy, spathe shaped leaves. Dense heads of sweetly scented white flowers, ageing blush pink, over a long period throughout summer. Likes a light, rather poor & dry soil in sun. (5-10) 45cm.
Mazus reptans	£4.20		Creeping ground cover from the mountain Himalayan regions. Mats of rooting, coarsely toothed leaves with tubular purple-blue flowers with a gold speckled throat on short stems from late spring to summer. Moist yet well drained soil in sun. (5-7) 5cm.
Meconopsis baileyi (AGM)	£4.50		Deciduous, short lived perennial, with rosettes of grey-green leaves often covered in rusty hairs. Pendent, saucer-shaped bright-blue flowers with yellow stamens are held in clusters on bristly stalks. More perennial if not allowed to flower the first year.90cm
Meconopsis baileyi alba	£4.60		The white counterpart of the popular Himalayan blue poppy'. Rosettes of oblong leaves on upright stems. PURE WHITE, four petalled poppies with a large boss of golden stamens; early summer. Perennial when happy. Cool retentive soil. 90x45cm.
Meconopsis (George Sherriff Group) 'Branklyn'	£7.20	2.00	(George Sherriff Group) So rarely available these are divisions of the true form. Soundly perennial, the basal leaves are covered in rusty hairs. Vivid blue nodding lampshade flowers during summer. Cool, moist acid soil in part shade. Not easy. (7-8) 120cm.
Meconopsis cambrica	£4.20		An ardent colonizer with fresh, fern-green foliage. VIVID LEMON flowers unfurl all summer. Best in shade in any reasonable soil.45x45cm. Flowers: May-September.
Meconopsis x cookei	£6.80		Tiny, soundly perennial species, the hybrid of quintuplinervia x punicea. Tufts of small, narrow, soft yellow haired leaves. Beautiful, nodding deep dusky purple-pink flowers, never fully opening, during late spring. Seems one of the easier forms to grow in a cool, moist acid soil with some shade. (4-6) 30cm.
Meconopsis George Sherriff Group GS600	£5.50		Very confused in cultivation as it was originally collected as grandis by George Forrest. However over many years it has undoubtedly hybridised so has been renamed. Large, true rich-blue outward facing poppies during summer. White haired glaucous leaves. Ric, never dry woodland soil in part shade. (6-8) 70cm.
Meconopsis 'Huntfield'	£8.75	2.00	(George Sherriff Group) Absolutely stunning tall poppy with shallowly bowl-shaped intense gentian blue flowers, ageing with a purple flush ; - mid to late summer. Soundly perennial when established. A challenge in east Anglia. Very rarely available. (7-9) 120cm.
Meconopsis napaulensis	£4.50		Monocarpic. A tall bold variety very variable in habit, but easy to grow in this area. Silvery or ginger bristly rosettes. Papery poppy flowers vary from blue, pink to yellow in early summer. Do not let it flower in it's first year. Moist rich, yet well drained soil

Meconopsis (Infertile Blue Group) Slieve Donard' (AGM)	£7.40	Vigorous, free flowering form, with fine, rusty coloured hairs. Semi-pendent, saucer-shaped brilliant rich-blue flowers with narrow, pointed petals & a boss of yellow stamens. Humus rich, retentive, well drained soil in part shade. (5-7) 90cm.
Medeola virginiana	£6.20	Small, creeping woodlander, widespread across eastern USA but rare in cultivation. Produces a whorl of herb-paris like, glossy green leaves. A second whorl carries yellowish-green flowers on hanging stalks with May & June. Purple berries in autumn. The root is edible & tastes of cucumber. Rich, woodland soil in part shade. (4-5) 30cm.
Meehania cordata	£4.15	Spreading ground cover for part or full shade. Arching stems with heart-shaped, hairy leaves. Tubular, lavender blue flowers with a hairy throat in the upper leaf axils during summer. Retentive soil. (6-7) 20cm.
Melittis melissophyllum	£4.95	Lamium like, upright perennial, with whorls of hairy, toothed leaves. Very large, two-lipped white flowers, with the prominent lower lip bright cerise-pink. Flowers early summer. humus rich, not too dry soil in part or full shade. (5-7) 30x30cm.
Melittis melissophyllum albida	£4.50	The rarely seen pure white form of our native plant. Short, erect spikes with nettle like, dark-green leaves. Large, two-lipped, pure white flowers nestle in the leaf axils during early summer. Best in retentive soil in light shade. (4-6) 30cm.
Mertensia lanceolata	£6.20	coll ; -Elbert Co, Colorado. This rare Colorado endemic erupts quickly in spring with the stems & buds appearing before the glaucous fleshy leaves appear. One sided, nodding clusters of narrowly tubular sky-blue flowers during early summer. Best in a woody, well drained soil in sun or part shade. Beware of slugs. (5-
Mertensia maritima	£5.20	syn. simplicissima. Small, fleshy plant for the rockery with radiating stems clothed in spathe shaped, intensely silver-white, thick leaves. Sprays of piercing, sky-blue flowers during early summer. Retentive yet free draining soil in sun. (6-7) 10cm.
Mertensia virginica (AGM)	£4.80	(syn.pulmonarioides) A most desirable plant with oval, soft blue-green leaves. Arching stems are topped by clusters of funnel-shaped RICH BLUE flowers; April to June. Goes dormant in late summer. Fertile well drained soil in sun or shade. 45x45cms..
Meum athamanticum	£4.50	Like a very refined Cow Parsley. Delicate mounds of very finely cut lacey fennel like leaves which are highly fragrant. Large conspicuous flattened heads of small white flowers all summer. Fertile soil in sun. 45x45cm.
Mimulus cardinalis (AGM)	£4.25	Coll Fry Creek, San Diego. Erect grower with downy foliage. Large, red, snapdragon-like flowers in succession throughout summer. Evergreen but cut back hard in August to maintain shape. Ordinary, not too dry soil in sun. 80x45cm.
Mimulus cardinalis gold-flowered	£4.20	A narrowly geographical variant of this traditionally red species, found on Santa Cruz Island, California. Creeping rootstock with erect stems having slightly sticky, palest ghostly green leaves. Two-lipped, golden-orange flowers with a red throat, through summer & autumn. Well drained soil in sun. (6-10) 40cm.

Mimulus moschatus	£3.95	A strange plant that was originally grown by the perfume industry for it's intense musk like scent but for unknown reasons seems to have lost it. Creeping mats of pale green leaves with two-lipped pale yellow flowers, streaked black in the throat; early summer.
Mimulus ringens	£4.50	Curious species for moist soil or pondsides. Strong stems have two-lipped pale blue-mauve flowers in short spikes. Quickly makes a good clump but never invasive. Full sun in moist soil. 90x45cm. Flowers: Late summer.
Mitchella repens	£4.50	Totally prostrate, woody stemmed mat former with rooting, trailing stems with pairs of opposite, glossy, rounded leaves with a yellow midrib. Small white flowers from the leaf axils followed by scarlet berries. Woodland soil in part shade. (5-6) 5cm.
Mitella ovalis	£4.50	(syn.M.hallii) Gently creeping mats of shallowly lobed soft green leaves with upstanding white hairs. Narrow willowy naked stems with tiny yellow-green bells; late spring & early summer. Humus rich retentive soil in part or full shade. 30x45cm.
Mitella yoshinagae B&SWJ 4893	£4.60	Heuchera relative, with creeping carpets of semi-evergreen, round lobed, maple-shaped leaves, with deep veining. Short spikes of tiny, starry, yellow green flowers in late spring. Good ground cover for humus rich soil in part or full shade. (4-6) 10cm.
Modiolastrum lateritium	£5.95	A vigorous, spreading ground cover with prostrate, radiating stems clothed in dark, mallow-like leaves. Stems root as they grow. PEACH flowers (2.5cm), with a red eye, produced intermittently all summer. Well drained sheltered site in full sun. 15x180cm.
Molopospermum peloponnesiacum	£5.50	Large Umbellifer, forming huge mounds of glossy, palmate, deeply divided leaves. well established plants have creamy-white umbels of flowers in summer. Gritty, free draining soil in sun. (7-8) 200cm.
Moltkia doerfleri	£5.20	A dwarf semi-shrubby plant with white hairy stems. From pink buds emerge deep violet blue flowers in dense panicles in late spring & early summer. Narrow green leaves are silvery beneath. Well drained gritty soil in sun. 45x45cm.
Monarda 'Adam'	£4.20	Whorls of sage-like, bright scarlet flowers held in brownish-red calyces in late summer. The toothed, nettle-like leaves have a good mildew resistance. Retentive, well drained soil in sun or part shade. (7-8) 90cm.
Monarda 'Blaustrumpf'	£4.20	Blue Stocking'. Showy German hybrid, with whorls of hooded deep violet-purple flowers held in dark purple bracts on upright stems. Slightly smokey-purple flushed leaves. Retentive soil in sun or light shade. (6-8) 90cm.
Monarda 'Cambridge Scarlet' (AGM)	£4.20	Spikes of hooded, RICH-RED flowers; June to August. Forms a dense clump with strongly scented, pointed, brown-tinged leaves. Retentive soil in an open, sunny position. 1.2m.
Monarda 'Comanche'	£4.20	Upright stems topped with whorls of hooded, rather intense, warm salmon-pink flowers from rusty-brown bracts; June-August. Clump forming perennial for a humus-rich, moist yet drained soil in sun. Ht: 150cms.
Monarda 'Croftway Pink' (AGM)	£4.20	Whorls of hooded, sage-like, strong pink flowers on stiff upright stems; June-August. Highly aromatic leaves. Deep, rich, reasonably drained soil in sun. 90cms.

Monarda didyma 'Cranberry Lace'	£4.60	Modern variety bred specifically for it's excellent mildew resistance. Whorls of rich, dark cranberry-red flowers, held in brown bracts;- July to September. Strongly aromatic, nettle like leaves. Retentive soil in sun or light shade. (7-9) 110cm
Monarda didyma 'Pink Lace'	£4.50	Much shorter than most cultivars this has excellent mildew resistance & multiplies well. Whorls of nettle like aromatic leaves topped by whorls of hooded rich-pink flowers from brown bracts during midsummer. can be grown in pots. Retentive soil. (7-8)
Monarda 'Feuerschopf'	£4.80	Old German hybrid, not often seen now. Square stems carry whorled spikes of rich magenta-red flowers from persistent crimson-brown bracts, during mid to late summer. Nettle like, strongly aromatic leaves. Rich, never too dry soil in sun or part shade. (6-9)
Monarda 'Fireball'	£4.20	Dwarf form, with whorls of narrow, tubular, rich purple-red flowers, held in a rounded head. Large, toothed, highly aromatic, dark green leaves. Good mildew resistance. Retentive soil in sun or light shade. (7-8) 40cm.
Monarda fistulosa menthifolia 'Mohikaner'	£4.50	Not often seen hybrid with square stems with pairs of dull, mid-green leaves with a slight bronze flush, strongly aromatic. Whorls heads of tubular, rich lilac flowers which are loved by bees, during mid to late summer. Retentive soil in sun or part shade. (7-8) 60cm.
Monarda 'Gardenview Scarlet' (AGM)	£4.20	New compact selection recently introduced from Canada. Highly aromatic, minty leaves & whorls of large, hooded, brilliant scarlet flowers all summer. Good mildew resistance. Ordinary soil in a sunny site. 90x45cm.
Monarda 'Heidelerche'	£4.50	Strong growing, aromatic clump former with nettle like, mint scented leaves. Whorls of tubular bright cerise-pink flowers from persistent brown bracts during mid to late summer, held on brown flushed stems. Fertile, rich, never too dry soil in sun or part shade. (7-9) 120cm.
Monarda 'Jacob Cline'	£4.20	Tall American selection with rich scarlet flowers, ageing with just a tinge of blue;- mid to late summer. Aromatic leaves on square stems. never too dry soil in sun or part shade. Back of the border. (7-8) 120cm.
Monarda 'Kardinal'	£4.20	Erect stems, topped by whorls of tubular, hooded, rich velvety red flowers, held in smokey brown calyces during late summer. Pointed, highly aromatic leaves, with a bronze tinge. Retentive soil in sun or light shade. (6-9) 90cm.
Monarda 'Lederstrumpf'	£4.50	Old German hybrid with whorls of hooded, bright cerise-pink flowers, held in persistent rusty brown bracts, from June to August. Nettle like, strongly aromatic leaves on square stems. Loved by insects. Best in a retentive soil in sun or part shade. (6-8) 100cm.
Monarda 'Mahogany'	£4.20	Whorls of narrow, tubular, hooded, RICH-RED flowers the bracts flushed smokey-purple; June to August. Highly aromatic, old cottage garden favourite. Rich retentive soil in sun or part shade. 90x45cms.
Monarda 'Marshall's Delight' (AGM)	£3.95	An early flowering Canadian selection, with whorls of bright-red tubular flowers held in smokey-purple bracts all summer. The aromatic leaves have good mildew resistance. Retentive soil in sun or part shade. (6-8) 80cm.
Monarda 'Petite Delight'	£4.20	New, low growing, mildew resistant variety, with red flushed aromatic leaves. Whorls of rich-pink flowers on short stems in summer. Retentive soil in sun or light shade. (7-9) 30cm
Monarda 'Pink Supreme'	£4.20	Modern variety, bred specifically for it's mildew resistance. Erect square stems with whorls of tubular shocking pink flowers from brown bracts;- July to September. nettle like aromatic leaves. shorter form for retentive soil in sun or light shade. (7-9)60cm.

Monarda 'Pink Tourmaline'	£4.20		Whorls of narrow, tubular, softest salmon flowers held in darker bracts; all summer. Basal clumps of mint-like leaves are wonderfully aromatic. Retentive well drained soil in full sun
Monarda 'Prarienacht'	£4.20		(syn Prairie Night') Upright stems with pointed, fragrant, mint-like leaves topped with hooded, DEEP PURPLE flowers; June to August. Deep, rich soil in sunny. 90x60cm.
Monarda 'Raspberry Wine'	£5.80	2.00	Tall, very strong growing variety with stout stems & purple flushed leaves. Whorls of narrowly tubular wine red flowers from purple bracts;- July to September. Bred for it's mildew resistance. Retentive soil in sun or light shade. (7-9) 90cm.
Monarda 'Schneewittchen'	£4.20		(syn. Snow Maiden') Abundant stems of white hooded flowers over a clump of fresh-green foliage, late summer. All parts scented. Open sunny spot in dryish soils. 90cms(3ft)
Monarda 'Scorpion'	£4.20		Upright, purple stems topped with heads of reddish-purple flowers with purple calyces; June-August. Aromatic leaves. Fertile, reasonably drained soil in sun or light, dappled shade. Tall variety to 1401cms.
Monarda 'Squaw' (AGM)	£4.20		Upright stems with scented leaves & hooded, BRIGHT RED flowers around a central cone; July & August. Good, mildew-resistant variety. Best in retentive soil in sun. 120x60cms.
Monarda 'Twins'	£4.20		Wonderfully aromatic plant with whorls of RICH PINK, tubular flowers held in darker bracts; all summer. Mint-like foliage. Retentive yet well drained soil in sun. 90x60cm.
Moraea alticola	£4.80		Tall, strong growing, more or less evergreen bulb from The Drakensberg's & Lesotho with leathery, long, strap like leaves with neeted tunics at the base. Iris sibirica like, pale yellow flowers above the leaves in late spring. Tough in a warm, sunny site.(5-
Morina longifolia	£4.80		Rosettes of evergreen, very aromatic, thistle-like leaves. Tall stems with whorls of hooded, tubular, white flowers with a pink flush, turning crimson after pollination, all set in spiny collars. Well drained retentive soil. 75x45cm.
Morina persica	£4.80		Whorled clusters of scented flared tubular white flowers with a yellow throat, maturing pink; mid to late summer, in spiny bracts. Rosettes of pinnate very spiny leaves. Any reasonably shaply drained soil in full sun. 150x60cm.
Mosla diuranthera	£5.20		syn.grosseserratum. Shade loving Lamium relative with tall stems with unusually lobed, yellowish green leaves with a purple margin. Arching sprays of salvia like, mauve-blue flowers in autumn.Cool, moist woodland soil. (8-10) 180cm.
Muehlenbeckia axillaris	£4.50		A low creeping evergreen groundcover, forming a spreading mat of wiry stems, clothed in tiny rounded leaves with a glossy sheen. Autumn & Winter colour is an attractive bronze green. Insignificant green flowers become black-seeded white berries in late summer. Good even in dry shade. (6-7) Ht 10cm.
Mukdenia rossii 'Karasuba'	£7.65		syn.Crimson Fans'. Woodlander with large, maple shaped leaves initially edged red, becoming almost entirely burgundy by autumn. Flat heads of white flowers before the leaves in spring. Col, moist woodland soil in part or full shade. (3-4) 40cm.

Myrrhis odorata	£4.20	Highly aromatic perennial umbellifer forming billowing mounds of finely divided frothy, lacy leaves. Flattened heads of lacy white flowers throughout summer. Excellent when stewed with fruit. Easy in well drained soil in sun. (6-9) 100cm.
Nemesia 'Blue Lagoon' (Maritana series)	£4.20	Small edger which is proving surprisingly hardy in a warm, sheltered spot. Bushy semi evergreen topped by whorls of two-lipped, sweetly scented sky-blue flowers with a white marked throat, during summer to the frosts. (6-10) 25cm.
Nemesia 'Golden Eye'	£4.20	Surprisingly rather hardy spreading evergreen ground cover, surviving well through mild winters. Whorled heads of two-lipped highly fragrant flowers, violet on the upper petals, lilac on the lower lip with a gold eye. Flowers summer to the frosts. Good in pots. Well drained soil in sun. (6-10) 20x50cm.
Nepeta x faassenii 'Alba'	£3.95	White flowering form of this popular, easy perennial - these are freely produced over a long period from May to September. Free mounds of bushy, greyish, aromatic foliage. Well drained soil sunny position. 30x45cms.
Nepeta x faassenii 'Blue Wonder'	£4.50	Low, spreading ground cover with aromatic, softly grey downy toothed leaves on trailing stems. Rather fat, whorled spikes of small rich-blue tubular flowers over a long period through summer. Good edger for a light, well drained soil in sun. (6-9) 20x60cm.
Nepeta grandiflora 'Bramdean'	£4.20	Tidy clump former with short spikes of violet-blue flowers; early summer. Small, wrinkled, pebble-like, hairy dark green leaves, flushed red on the reverses. Good for edging. Well drained soil in sun or part shade. 45x45cm.
Nepeta grandiflora 'Dawn to Dusk'	£4.20	New hybrid making dense, compact clumps of small, grey, scented leaves. Short spikes of hooded SOFT-PINK flowers held in purple calyces. One of the larger cultivars. Well drained soil in sun. 90x60cm. Flowers: July-September.
Nepeta grandiflora 'Pool Bank'	£3.85	Tall, upright, vigorous form, with spikes of soft lilac-blue flowers throughout summer. Grey-green leaves are highly aromatic. Free draining soil in sun. (6-9) 80cm.
Nepeta grandiflora 'Summer Magic'	£4.20	Sturdy, bushy, compact catmint with deeply veined, grey-green leaves. Semi whorled spikes of small, narrowly tubular lavender-blue flowers from May to the frosts. One of the longest flowering varieties available. Light, free draining soil in sun. (5-10) 30x45cm.
Nepeta grandiflora 'Zinser's Giant'	£4.80	Strong growing, very upright form of grandiflora with aromatic, grey-green wrinkled leaves on brown stems. Whorled heads of narrowly tubular, lavender blue flowers continuously through summer. Best in a light, free draining soil in sun. (6-9) 90cm.
Nepeta kubanica	£4.50	May correctly be cyanea ssp. cyanea. Medium sized, upright catmint from the Caucasus with smooth, nettle leaves, flushed bronze in spring & autumn. Whorls of large mauve flowers from mauve bracts ; - late summer. Needs a more retentive soil in sun. (6-9) 80cm.
Nepeta latifolia 'Super Cat'	£3.95	Extremely tall catmint with felted, hairy grey leaves & stems, topped by long, narrow, upright, wispy spikes of narrowly tubular, aromatic, lilac-blue flowers during summer. Light, well drained soil in sun.
Nepeta 'Leeds Castle'	£4.20	syn. 'Longipes' Bushy, upright, highly aromatic catmint with larger, deeply veined grey leaves. Spikes of lavender-blue flowers from red tinged bracts over a long period through summer. Loved by insects. Light, free draining soil in sun. (6-9) 60cm.
Nepeta manchuriensis 'Manchu Blue'	£4.20	Tall, upright catmint, found growing along moist riverbanks in Russia, China & Japan. Tall stems with aromatic, nettle like pointed leaves. Whorled spikes of large, tubular rich lavender-blue flowers from violet calyces during early to midsummer. Retentive or moist soil in part shade is best. (5-7) 85cm.
Nepeta nuda 'Purple Cat'	£4.20	Taller, upright species with grey-green, hairy leaves. Dense whorl like spikes of small, narrowly tubular, lilac-purple flowers all summer. Well scented all over. well drained soil in sun. (6-9)

Nepeta racemosa 'Amelia'	£4.50		Low mound forming catmint, much loved by bees. Highly aromatic, soft grey leaves. spikes of narrowly tubular, soft ducky lilac-pink flowers from darker calyces all summer. cut back hard after first flush to maintain shape. Light, poor, free draining soil in sun. (5-9)
Nepeta racemosa 'Snowflake'	£4.20		An unusual white form with the usual hooded flowers over bushy pale grey-green foliage. An excellent edging plant. Well drained soil in sun. 45x45cm. Flowers: June-September
Nepeta racemosa 'Walker's Low'	£4.20		An improvement on the common catmint. Dense basal clumps of silvery-grey, aromatic leaves topped by spikes of hooded, PALE BLUE-MAUVE flowers with a spotting on the lower lip; May to July. Very well drained soil in sun. 60x60cm.
Nepeta sibirica 'Souvenir d'Andre Chaudron'	£4.35		(syn. N.Blue Beauty') Short spires of narrow, tubular, SPODE-BLUE flowers giving a good display of colour; June & July. Low growing, aromatic perennial with small, silver-grey leaves. Well drained soil in sun. 45x45cms.
Nepeta 'Six Hills Gold'	£4.80		Selected from 'Six Hills Giant' this has grey green leaves with a broad lime-yellow margin, still highly aromatic. Airy spikes of two lipped soft-blue flowers from purple bracts through summer & autumn. Excellent edger for a light, free draining soil in sun. (6-10)
Nepeta subsessilis	£5.65	2.00	A good form with large, lime-green leaves & erect stems with whorls of very large DUSKY BLUE, tubular flowers; all summer. Retentive soil in part or full shade. 60x45cms.
Nepeta subsessilis 'Laufen'	£4.20		One of the most impressive cultivars of this distinct species, with smaller, nettle like pale yellow-green leaves than the species. Short spikes of large, tubular, rich blue flowers with a white throat;- midsummer. Retentive soil in sun/pt.sh. (6-7) 60cm.
Nepeta subsessilis 'Pink Dreams'	£4.50		Very different form of catmint with large, lightly aromatic, toothed nettle like leaves. Whorls of much larger, tubular soft pink flowers from persistent maroon calyces throughout summer. Likes a little more moisture in a sunny site. (6-9) 40cm.
Nepeta subsessilis 'Washfield'	£4.20		Unusual form with spikes of very large, tubular, purple-blue flowers, held in violet bracts & in whorls;- summer. Large, deeply veined, dark-green leaves. Retentive soil in sun or part shade. Needs more moisture than most catmints. (6-9) 30x30cm.
Nepeta tuberosa	£4.35		(Catmint) Iberia.Unusual tuberous rooted form with purple-violet hooded flowers, over silver-grey scented leaves.Well drained soil in sun.75x45cm.(5-9)
Nepeta yunnanensis	£4.20		Giant Chinese species with aromatic, large toothed leaves on stout stems. Spikes of large, tubular lavender-blue flowers all summer. Can be very invasive in the right conditions but beautiful nonetheless. Retentive soil in sun or part shade. (6-8) 150cm.
Nerine bowdenii 'Alba'	£4.20		Stiff stems topped with heads of recurved, funnel-shaped, WHITE flowers; lt. summer. Strap-like leaves whither before the flowers. A beautiful plant for a sunny, baked position preferably at the foot of a wall. Plant the bulb with its nose on the surface. 60x20cm.
Nerine bowdenii 'Albivetta'	£4.20		Bulbous perennial, with broad, strap shaped leaves. In autumn, has open umbels of funnel-shaped, white flowers, with the palest-pink flush, with wavy edged, recurved petals. Hardy at the foot of a warm wall in a sheltered, sunny spot. (8-10) 40cm.
Nerine bowdenii 'Blanca Perla'	£4.20		Intermediate bowdenii x sarniensis hybrid so needing a more sheltered spot than most. Very large, spidery & heavily frilled crystalline white flowers over a long period in autumn, just before the strap like leaves. Free draining soil in a warm spot. (8-10)
Nerine bowdenii 'Ella K'	£4.20		Good sized whorls of scented, trumpet shaped pure white flowers, just finishing with the merest touch of pink;- autumn. They appear just before the strap like leaves. Best at the foot of a warm wall in a sheltered sunny pot. (8-10) 60cm.
Nerine bowdenii 'Favourite'	£4.20		In autumn it offers umbels of flared, wavy edged petalled salmon-pink flowers before the new leaves kick into growth ;- October & November. arching, strap like leaves. Plant bulbs shallowly. Best in a very warm, sheltered spot for a summer baking. (10-11) 55cm.

Nerine bowdenii 'Isabel'	£4.20	More or less a bowdenii hybrid so reasonably hardy in a sheltered spot. Whorls of large, spidery deep-rose flowers on bare stems in autumn, just before the strap like leaves. Needs a sheltered, well drained spot in sun. (8-10) 45cm.
Nerine bowdenii 'Nikita'	£4.20	Bulbous perennial with bare stems topped by whorls of flared, trumpet-shaped, narrow petalled, soft-pink flowers from red buds in autumn. The tips of the petals are reflexed. Strap like leaves appear after the flowers. Best at the foot of a warm wall in sun.
Nerine bowdenii 'Ostara'	£4.20	Bulbous perennial with whorls of flared, trumpet shaped rich pink flowers with paler, almost white edges, held on the bare stems in autumn, followed by the strap like leaves. Plant at the foot of a warm wall in sun. (9-10) 80cm.
Nerine bowdenii 'Sofie'	£4.20	More or less a bowdenii hybrid so reasonably hardy in a warm, sheltered spot. Good rich salmon spidery flowers, held in whorls during autumn, just before the strap like leaves. Needs a well drained spot in a sunny site. (8-10) 50cm.
Nerine bowdenii 'Vesta K'	£4.50	Reasonably hardy, Dutch hybrid with whorls of flared, good sized, trumpet-shaped blush-pink flowers, fading almost white, during late summer & autumn. The flower on bare stems just before the emergence of the strap like leaves. Sheltered, well drained spot in sun. (8-10) 60cm.
Nerine 'Mr. John'	£4.50	Said to bowdenii but probably has a lot of sarniensis in it, making it less hardy. Whorled heads of trumpet shaped, intense darkest-pink flowers, held on black stalks, during late summer & autumn. They are followed by the broad, strap like leaves. Sheltered, well drained spot in sun. (8-10) 60cm.
Nerine 'Pink Triumph'	£4.20	Plant at the base of a warm wall where it should not be disturbed. Clusters of flared rich pink frilly edged flowers in profusion in Autumn. Strap like rich green leaves disappear before flowering. Well drained soil in full sun.
Nerine 'Stefanie'	£4.20	Bare stems with whorls of narrow petalled, trumpet shaped, silver-white flowers from pink tinged buds, fading to just the palest pink with age;- autumn. Strap like leaves appear after the flowers. Best at the foot of a warm wall in sheltered sun. 75cm.
Nierembergia repens	£4.20	Small, creeping, mat forming more or less evergreen ground cover. Carpets of glossy leaves studded in bell-shaped, upward facing white flowers over a long period through summer. Ideal planted in cracks & crevices. Free draining soil in sun. (6-9) 5cm.
Nipponanthemum nipponicum	£4.50	Closely related to the Shasta Daisy, this has upward facing chalky-white daisies with a pale-yellow eye in autumn, finally turning a pale-pink. Thick, fleshy lobed leaves on upright stems. Retentive, well drained soil in sun or part shade. (8-11) 45cm.
Nomocharis aperta	£5.20	Fritillary relative from W.China, with saucer-shaped, rose-pink flowers with a scattering of ring shaped crimson spots. Alternate lance-shaped leaves on upright stems. Leafy, well drained woodland soil in a partly shady, retentive spot. (6-7) 60cm.
Nomocharis pardanthina	£5.50	Woodlander from Western China with whorls of sparse, elliptic leaves. Large, cup-shaped white flowers with fringed petals, heavily speckled purple at the centre, during June & July. Challenging to grow needing a cool, moist, humus rich soil in part
Notholirion bulbuliferum	£5.20	(syn.N.hyacinthinum) Closely allied to Lilies. Long spikes of funnel shaped pale lilac flowers with a slight scent; July & August. Sheltered retentive yet well drained site with some shade.
Notholirion campanulatum	£5.50	Bulbous woodland perennial from China with metre long stems studded in nodding, slightly bell shaped lilac-pink flowers with green tipped petals;- midsummer. Not easy to grow in the south revelling in cool Scottish conditions. Moist woodland soil in
Notholirion macrophyllum	£5.50	Short spikes of large funnel shaped nodding pinkish mauve flowers in May & June. Small dainty bulbous plant. Needs a sheltered retentive yet well drained soil in part shade. 45x30cm.

Oenanthe javanica 'Flamingo'	£4.20	A striking foliage plant making spreading clumps of finely cut green leaves heavily variegated cream, white & pink. In cold weather it takes on a red hue. Insignificant cow parsley-like white flowers. any soil in sun or part shade. 45x60cm.
Oenothera 'Cold Crick'	£4.50	Small, compact, long lived American species with slightly arching, woody stems topped by clusters of small, rich yellow, papery, cup shaped flowers over a long season in summer. Small, hairy, grey-green leaves. Free draining soil in sun. (5-8) 40cm.
Oenothera fruticosa 'Hoheslicht'	£3.95	Highlight'.From late spring through midsummer are produced an abundance of showy bright yellow flowers from red flushed buds. Basal rosettes of mid-green leaves. Well drained soil in sun. (5-8) 60cm.
Oenothera fruticosa 'Silberblatt'	£4.15	Rosettes of silver-white variegated leaves are heavily flushed red on emergence, especially in spring. Clusters of golden-yellow, cup-shaped flowers are freely produced in midsummer. Well drained soil in sun or light shade. (6-8) 50cm
Oenothera fruticosa 'W.Cuthbertson'	£4.50	Compact form, with heads of papery, silky cup-shaped rich golden-yellow flowers on short stems in early summer. Basal rosettes of red flushed pale-green leaves. Well drained soil in sun. (6-8) 45cm.
Oenothera macrocarpa (AGM)	£4.20	(syn.O.missouriensis) A succession of huge PRIMROSE flowers; all summer. Good ground cover with red tinted leaves & stems. Well drained soil in sun. 20x60cm.
Oenothera organensis	£4.80	Large, rich butter-yellow, cup-shaped flowers with long stamens are freely produced all summer. Tall, erect, soundly perennial species with narrow leaves up the stems. Well drained soil in a sunny site. 75x45cm.
Oenothera pilosella 'Mella Yella'	£4.20	Attractive, soundly perennial evening primrose with basal rosettes of red flushed leaves, rich burgundy in autumn & hairy beneath. Short stems with good sized butter yellow flowers from orange-red buds all summer. Light soil in sun. (5-8) 40cm.
Oenothera speciosa 'Alba'	£4.20	The beautiful white form of this ususally pink species, with generous, bowl-haped flowers, often with faint pink veining; throughout summer. Gently spreading root. Poor, well drained soil in full sun. (6-9) 30cm.
Oenothera speciosa 'Siskiyou'	£4.20	Gorgeous variant found in the Siskiyou mountains. Large, CLEAR PINK, cup-shaped flowers veined a deeper pink & darken towards the edges; golden-yellow eye. Excellent scent & flowers remain open all day. Gritty, well drained soil in sun. 45x45cm.
Oenothera speciosa 'Twilight'	£4.50	Creeping ground cover with spreading stems having fine, almost needle like leaves. Good sized white flowers heavily veined pink, giving an overall pale pink glow. yellow eye;- June to September. unusual as it flowers during the day. Light, free draining soil in sun. (6-9) 20cm.
Olsynium douglasii 'Album'	£4.20	Small, tufted spring woodlander with fine tufts of narrow, grass like leaves. Large, flared trumpet-shaped white flowers with yellow stamens during spring. Often dormant by summer. Best in a cool, moist, woodland soil in part or full shade. (3-4) 30cm.
Omphalodes cappadocica 'Lilac Mist'	£4.50	Short loose spikes of soft-lilac flowers; early spring. Basal clumps of evergreen, pale green, pointed leaves. Moist, fertile, rich soil in part shade. New from the USA. 20x40cm.

Omphalodes verna 'Alba'	£4.20	Choice ground-covering perennial for a retentive, woodland type soil. Spreading clumps of soft, hairy, oval, green leaves topped by sprays of small, pure white flowers in short racemes in spring. 30x45cm.
Onobrychis viciifolia	£4.50	Rarely seen but attractive plant with narrow silver pinnate leaves. Spikes of dusky-rose pea-like flowers in narrow upright panicles;- June & July. Well drained soil in sun. 60x60cm. (6-8)
Onopordum boisserianum	£6.20	Tall, short lived, often biennial thistle from Syria & Lebanon. Erect stems with jagged, silver-grey leaves & stems. Swollen silver bracts carry thistle like, purple-pink flowers during late summer. Often self seeds. Sheltered spot in sun. (7-9) 150cm.
Onopordum nervosum (AGM)	£4.50	(syn.O.arabicum) A wonderful feature plant that is unfortunately biennial but in it's first year forms rosettes of huge spiny leaves felted with white down topped by rose thistle like flowers. Any soil in sun. 240x90cm. (7-9)
Ophiopogon bodinieri B&L 12505	£4.50	A vigorous spreading clump-former with long, narrow, strap-like, arching, dark green leaves. Clusters of hanging bell-shaped pale lilac-pink flowers. Moist woodland soil. Collected in Yunnan, China. 30x75cm.
Ophiopogon chingii 'Crispum'	£4.80	Tiny, swirling evergreen lily with very fine, thread like, long grassy leaves. Short spikes of lilac-white bell shaped flowers in summer followed by good sized purple berries. Beautiful for the rockery in a retentive, well drained, sheltered spot in sun or part shade. (7-9)
Ophiopogon jaburan	£4.20	Tufted evergreen perennial, with strap-shaped leathery dark green leaves. Short spikes of lilac tinted white flowers in late summer followed by violet-blue fruit. Moist, fertile, hunus-rich soil in sun or part shade. (7-8) 45cm.,
Ophiopogon jaburan 'Vittatus'	£4.80	An evergreen herbaceous perennial forming clumps of grass-like, white & green leaves. Racemes of bell-shaped, white flowers in early summer followed by deep blue berries. Frost hardy. Sun or part shade in fertile, well drained soil. 15x30cms.
Ophiopogon japonicus	£4.20	Tufted evergreen clump former with tights mats of leathery, grassy dark green leaves, spreading gently by stolons. Clusters of small, bell-shaped lilac-white flowers, followed by metallic purple-blue berries in autumn. never too dry soil in sun or shade, out of cold winds. (8-9) 15cm.
Ophiopogon japonicus 'Minor'	£4.20	Tiny creeping form, with arching clumps of narrow, leathery deep-green evergreen leaves. Short spikes of small, bell-shaped pale purple-white flowers followed by blue-black berries. Fertile, retentive, rich soil in part shade. (8-9) 15cm.
Ophiopogon planiscapus 'Black Needle'	£4.80	Like a a more refined 'Nigrescens', this forms fine, arching evergreen tufts of deepest olive green-black evergreen strap like leaves. Short spikes of lilac-white flowers in autumn. Good ground cover in a sheltered spot in retentive soil in sun or part shade. (9-
Ophiopogon planiscapus 'Black Smaragd'	£4.80	Translating as 'Black Emerald' this forms spreading, arching tufts of leathery rich black leaves, the new growth initially coming through as olive green. Short spikes of bell-shaped lilac-white flowers in late summer. Good ground cover for retentive soil in sun or light shade. (7-8) 15cm.
Ophiopogon planiscapus 'Little Tabby'	£5.20	Very slow growing evergreen with short stuuby dark-green leaves regularly variegated cream. Sprays of small white flowers in summer. Retentive well drained soil in sun or part shade. (6-7)
Ophiopogon planiscapus 'Nigrescens' (AGM)	£4.80	Striking herbaceous perennial with evergreen, almost black, strap-like leaves which set off short spikes of rich pink flowers followed by black berries. One of the few black leaved plants. Needs good soil, part shade. Creeps slowly. 15cms. Flowers: Aug-Sept.

Ophiopogon sp.	£4.15	Unidentified species from Julian Sutton unusually flowering in late spring. Short spikes fo bell-shaped lilac flushed white flowers. Arching clumps of evergreen, glossy narrow strap like leaves. never too dry soil in sun or part shade. (5-6) 15cm.
Origanum 'Kent Beauty'	£4.50	Prostrate, semi evergreen sub shrub with trailing stems clothed in oval, apple green leaves. Whorls of small, tubular, rose pink flowers enclosed in large, inflated rose pink bracts. Sharply drained soil in sun. (6-8) 10cm.
Origanum laevigatum 'Herrenhausen' (AGM)	£4.20	Mat-forming clumps of aromatic foliage. Well branched stems bearing abundant clusters of violet flowers; mid to late summer. Reasonably drained soil in sun. 40cms.
Origanum laevigatum 'Hopleys'	£4.20	Useful late flowering aromatic perennial herb with hairy leaves and an abundance of semi-lax stems with clusters of PINK-PURPLE flowers - much loved by bees & butterflies; August & September. Well drained, sunny position. 60x60cms.
Origanum 'Norton Gold'	£4.20	The aromatic leaves are vivid gold in spring ageing to lime green. Sprays of small pinky-purple flowers; June to September. Light well drained soil in sun. 30x60cms.
Origanum vulgare 'Compactum'	£4.20	One of the best, most modest edgers, forming dense mats of rounded, highly aromatic, dark-green leaves. Narrow, rich-pink flowers protrude from small, jade-green, hop-like bracts. Light, well drained soil in sun. (5-7)15cm.
Origanum vulgare 'Country Cream'	£4.20	Lovely, semi-woody, rounded perennial densely covered with highly aromatic, ovate, moss-green and cream leaves. Loose heads of tubular mauve-blue flowers, held in whorls; midsummer to early autumn. Well drained soil in sun. 45x45cms.
Ornithogalum magnum	£4.20	Fleshy stems topped with tall spikes of white, flushed green, star-like flowers; May-June. Fleshy, lance-shaped leaves. Bulbous perennial for a fertile, well drained soil in sun. Ht: 60cms.
Ornithogalum nutans (AGM)	£4.20	Bulbous perennial bearing one-sided panicles of nodding, funnel shaped, SILVERY-WHITE flowers with a green stripe on the exterior of each petal. Bright green leaves with a central silver stripe. Fertile well drained soil in sun or part shade. 45x30cm.
Ornithogalum oligophyllum	£4.20	syn. balansae. Heads of white, up-facing, star-like flowers from green buds; January-March. Bulbous perennial with almost prostrate, strap-like, mid-green leaves. Summer dormant. Fertile, well drained soil in sun. Ht: 20cms.
Ornithogalum ponticum 'Sochi'	£4.20	Collected by Janis Ruksans in the Caucasus, this is now thought not to be form of ponticum, possibly a newly described species. Bold, airy open whorled spikes of starry brilliant white flowers during midsummer. The strap like leaves can wither at flowering. :light, free draining soil in sun. (5-6) 60cm.
Ornithogalum pyramidale	£4.20	Fleshy, upright stems topped with neat, pyramidal heads of white, star-like flowers; May-July. Fleshy, lance-shaped leaves fade away at flowering. Bulbous perennial for a well drained soil in sun. Ht: 60cms.
Ornithogalum reverchonii	£4.20	Tall, elegant bulbous plant with rosettes of narrow, strap-like leaves. Tall spikes of starry white flowers in early summer, quickly going dormant afterwards. Free draining soil in sun. (6-7) 50cm
Ornithogalum sigmoideum	£4.20	Small Turkish species with starry white flowers with a green rib, nestling in the crown of narrow, greyish leaves during mid spring. Seems hardy in a light, well drained soil in sun. (3-4)10cm.

Ornithogalum umbellatum	£4.20	Ideal small bulb for naturalising, this forms fleshy clumps of grassy, keeled green leaves. Spikes of open, starchy white flowers, striped green in bud & on the reverses, during late spring. Best in a light, free draining soil, best with some shade. (4-5) 30cm.
Orthrosanthus multiflorus	£4.60	Unusual member of the Iris family with loose panicles of wedgewood blue flowers with a boss of yellow stamens in late summer. Fans of narrow, sword like leathery leaves. Needs a warm, sheltered, well drained spot in sun. hardyish in the South. (6-
Osteospermum 'Cannington Roy'	£4.20	Good, reliably hardy, spreading ground cover, forming mats evergreen, spoon shaped leaves. Large, daisy like, lilac purple tipped white daisies, ageing mauve pink, with purple reverses when shut in the evening;-summer & autumn. Sheltered, well drained
Osteospermum ecklonis 'Compacta'	£4.20	Not really sure of the name, but it does seem to fit the bill. Creeping, semi-evergreen carpets of fleshy, toothed, spoon-shaped leaves. Short stems carry good sized white daisies with steely metallic-blue backs from May to the frosts. Free draining soil
Osteospermum 'Nairobi Purple'	£4.20	(syn: Tresco Purple) Low growing, fleshy, evergreen bearing daisy like, dark purple flower heads to 5cms, the reverse flushed white; late spring until autumn. Hardyish in a free draining site in full sun. To; 15x90cms.
Ourisia coccinea	£4.80	(syn.O.elegans) A plantsman's plant with mats of oval toothed leaves in rosettes. Nodding scarlet flowers in loose whorls with distinctive cream stamens in late spring. Difficult in the south. Humus rich soil in part or full shade. 15x60cm.
Oxalis hirta 'Gothenburg'	£4.20	Vigorous, clump forming bulb, held at the surface. Trailing stems with whorls of linear, much divided leaves. Large, silky, bowl-shaped rich, deep-pink flowers in autumn. Summer dormant. Will only stand light frosts but superb in pots. (8-9) 15cm.
Oxalis polyphylla	£4.20	Rarely seen species from the Southern Cape of S.Africa with stout, rigid stems topped by congested clusters of clover-like, linear leaves, stained red at the base. Large rose-pink flowers with a yellow centre;- summer. Sheltered spot in sun. (6-7) 20cm.
Oxalis tetraphylla	£4.20	syn.deppei. Bulbous spreading perennial with clover-like leaves with a black cross gently etched in the centre. Heads of silky, cup-shaped rich-pink flowers with a yellow-green eye all summer. Gritty, well drained soil in sun. (6-9) 25cm.
Oxalis triangularis 'Cupido'	£4.20	A lovely foliage plant with beetroot red, shamrock-like leaves. Very pale pink flowers produced on fleshy stems; July & August. Well drained soil in sun. 30x30cms.
