

Pachysandra axillaris	£5.20	Very rare small colony forming perennial with pointed evergreen, yellow-green leaves. Short spikes of white flowers with pink stamens on red stems in spring. gently creeps in cool, moist woodland soil in part shade. From the Emei Shan in Sichuan. (4-5)
Paeonia 'Armani'	£6.50	A striking, fully double Paeony with rather velvety, sinister, darkest red, almost black flowers, a little scruffy but so distinct, it is worth the effort. The new leaves & stems are also flushed burgundy. Flowers May & June. Like a rich, retentive soil in sun or light
Paeonia 'Buckeye Belle'	£6.80	Sumptuous bowl shaped, semi double, dark red flowers, with fringed petals. has a large boss of gold stamens. Round lobed leaves, with burgundy red autumn colour. Humus rich, retentive soil in sun or part shade. (5-6) 60cm.
Paeonia 'Coral Sunset'	£6.80	Deeply cup shaped, semi double, almost luminous coral-pink flowers shaded peach, the centre is filled with a big boss of gold stamens;- May & June. Intermediate hybrid of lactiflora. Plant shallowly. Rich, retentive soil in sun. (5-6) 85cm.
Paeonia 'Early Scout'	£6.80	One of the first paeonies of the season to flower & a selection from tenuifolia. Large, bowl shaped, intense rich-red single flowers with gold stamens, often as early as late March. Very finely cut, feathery leaves. Rich soil in sun or part shade. (4-5) 50cm.
Paeonia lactiflora 'Adolphe Rousseau'	£5.80	Showy double peony bred in 1890. Tall upright habit with the foliage tinged dark red. Very large dark lustrous flowers of deep red with maroon overtones are freely produced in late spring & early summer. Rich soil in sun. 90x60cm.
Paeonia lactiflora 'Avalanche'	£6.50	Almost anemone centred flowers of blush white guard petals, with a central boss of smaller, cream petals, with occasional, thread like, red markings. Sweetly scented. Divided leaves, with good autumn colour. (5-6) 90cm.
Paeonia lactiflora 'Balliol'	£9.70	Could be the same as 'Lord Kitchener'. Tall form with rather generous, bowl-shaped, single intense maroon-red flowers with a small boss of gold stamens, midseason during May & June. Burgundy red flushed new leaves & autumn colour. Rich, retentive soil in sun or light shade. (5-6) 100cm.
Paeonia lactiflora 'Baroness Schroder'	£6.50	Double, bomb shaped paeony with large outer guard petals with the central ones incurving & ball shaped. The flowers initillay open with just the palest pink tinge, becoming white when exposed to sun. Early & long flowering. Rich soil in sun. (5-6)90cm.
Paeonia lactiflora 'Best Man'	£6.15	Fully double, darkest pink, almost red flowers with a large row of guard petals filled by a centre of short, quilled ones. Light pleasant scent. Leaves have good autumn colour. Plant shallowly. Rich, retentive soil in sun or light shade. (5-6) 80cm,
Paeonia lactiflora 'Commando'	£6.35	Good sized single rich red flowers with a slight scent & large boss of creamy yellow stamens;- May & June. Plant shallowly. Rich, retentive soil in sun. (5-6) 75cm.
Paeonia lactiflora 'Festiva Maxima' (AGM)	£6.15	Beautiful, very large DOUBLE WHITE flowers, the central petals FLECKED CRIMSON, on strong stems. Fine clumps of attractive lobed foliage with rich autumn tints. Best in enriched deep soil in full sun. 75-100cms. Flowers: June-July.
Paeonia lactiflora 'Gardenia'	£6.50	Large, fully double, slightly incurved, pure white flowers, with just the merest hint of cream at the eye. Heady scent. leaves turn rich red in autumn. Humus rich, retentive soil in sun. (5-6) 90cm.
Paeonia lactiflora 'Gilbert Barthelot'	£6.20	Bred specifically for cut flowers, this has sumptuous fully double rich rose-pink bomb shaped flowers with a pleasing scent. Flowers May & June. Likes a good, rich retentive soil in sun or light shade.
Paeonia lactiflora 'Kansas'	£5.85	Beautiful DOUBLE RED flowers. Fine clumps of strikingly lobed foliage with good autumn tints. Best in enriched deep soil in full sun. 75-100cms. Flowers: June
Paeonia lactiflora 'Krinkled White'	£7.40	Large, single, cup-shaped, white flowers with slightly ruffled petals & golden stamens; late spring & early summer. Humus-rich, retentive soil in sun or part shade. 75x75cm.

Paeonia lactiflora 'Lady'	£7.95	Japanese herbaceous Paeony with rather loose, semi-double mid-pink flowers, more silver at the tips. The petals are rather informal with rounded lobed tips. Much divided, red flushed leaves. Needs a rich, retentive soil in sun. (5-6) 90cm.
Paeonia lactiflora 'Madame Emile Debatene'	£6.15	Double, rose-shaped, warm-pink flwqs with a silvery sheen & a centre of small, curly petals mixed with gold stamens. Slight spicy fragrance. Free flowering. Mid to late season. (5-6) 75cm.
Paeonia lactiflora 'Madame Gaudichau'	£6.50	Equally as good in leaf as in flower. The leaves in spring are a rich burgundy red persisting right through flowering. Fully double, deep purple-red flowers on dark stems during May & June. Best in a rich, retentive soil in sun or light shade. (5-6) 100cm.
Paeonia lactiflora 'Marie Lemoine'	£6.50	Large, fully double, delicate ivory-white flowers, with the odd petals picoteed in the finest red thread. Crimped, ruffled petals. Humus rich soil in sun or light shade. Compact. (5-6) 60m
Paeonia lactiflora 'Margaret Truman'	£6.15	Fully double, deep-pink flowers, fading paler, slightly more white at the eye. Well scented. Good autumnal colour. Retentive, humus rich soil in sun or part shade. (5-6) 75
Paeonia lactiflora 'Millionaire'	£7.95	Japanese herbaceous paeony with fully double, deep reddish-pink flowers fading silvery pink at the edges of the petals. Flowers May & June. Clumps of glossy, divided, red flushed leaves. Best in a rich, retentive soil in sun. (5-6) 90cm.
Paeonia lactiflora 'Mothers Choice'	£6.50	Large, fully double, very tidy white flowers, with just a touch of pink & cream, giving a warm feel. Vigorous habit, with strong, upright stems. Humus rich, retentive soil in sun or part shade. (5-6) 90cm.
Paeonia lactiflora 'Pink Dawn'	£6.15	Loose, semi-double, flat, bowl-shaped soft baby-pink flowers, paler at the centre around a tiny boss of gold stamens;- late spring & early summer. Leaves have good autumn colour. Rich, retentive soil in sun or light shade. (5-6) 60cm.
Paeonia lactiflora 'Raspberry Sundae'	£8.80	Sumptuous, crimped, frilly edged cream flowers, with soft-pink tipped petals, giving a swirling effect through the flower. New & sure to be popular. Humus-rich, retentive soil in sun or part shade. (5-6)
Paeonia lactiflora 'Sebastien Maas'	£6.50	Anemone type flower with a row of broad, deep pink guard petals. Large, central incurved mass of narrow, quilled, rich pink petaloids with yellow & white markings;- May & JUNE. REtemntive soil in sun. (5-6) 90cm.
Paeonia lactiflora 'Sorbet'	£6.50	A very showy new hybrid forming a loose bowl of ruffled, PALE PINK PETALS FADING AT THE EDGES; feathery, fringed, creamy-white petals fill the centre. Humus-rich, retentive soil in sun. 75x60cm. Flowers: May-June.
Paeonia lactiflora 'Taff'	£6.20	Sumptuous, fully double, soft pink flowers of classic shape, having a wonderful scent. They are held on long stems during May & June. Retentive soil in sun. (5-6) 100cm.
Paeonia lactiflora 'White Towers'	£6.50	Although technically this is a double the centre petals are short giving an anemone style appearance. generous pristine white flowers on stout stems in May & June. Noticeable for it's glossy, apple green leaves. Rich, retentive yet well drained soil in sun or light shade. (5-6) 75cm.
Paeonia mlokosewitchii (AGM)	£10.95	Single, bowl shaped lemon flowers with deeper stamens; late spring & early summer. Lobed mouds of red edged blue-green leaves. Can be caught by the late frosts. Highly sought after. Rich, fertile moist yet well drained soil in sun or part shade. 60x75cm.
Paeonia officinalis 'Rosea Plena' (AGM)	£5.80	Double POMPOM-LIKE LARGE, DEEP PINK flowers - before the lactiflora hybrids. Popular old cottage-garden plant making bold clumps of rounded leaves emerging from red buds. Rich, fertile soil in sun. 60x60cm. Flowers: Late spring - e. summer.

Paeonia officinalis 'Rubra Plena' (AGM)	£5.80	Found in almost every cottage garden this delightful variety has HUGE, FULLY DOUBLE, DEEP RED flowers. Handsome clumps of foliage. Needs a very rich fertile soil in sun or part shade. Do not disturb when established. 75x60cm. Flowers: June-July.
Paeonia officinalis villosa	£6.50	syn.P.mollis. Soft magenta-pink, single flowers with pronounced stamens. A low clump-forming variety with soft greyish-green leaves emerging from red buds; foliage red tinted in autumn. Humus-rich well drained soil in sun or part shade. 45cms. Flowers: Late spring.
Paeonia 'Paula Fay'	£5.70	Unusual, semi-double, vivid-pink flowers initially opening crinkled, with a waxy bloom. prominent white eye. Flowers;-late spring & early summer. Leaves have good autumn colour. Humus rich, retentive soil in sun or light shade. (5-6) 75cm.
Paeonia 'Pink Hawaiian Coral'	£6.50	Rather beautiful, almost translucent palest coral-pink flowers fading almost white at the tips. They are stained cream at the base giving a warm feel. Distinct rose shape. Best in a humus rich, yet well drained soil in sun or light shade. (5-6) 90cm.
Paeonia 'Purple Spider'	£7.20	Striking Anemone flowered form with both the guard petals & quilled central petals a vibrant Fuchsia pink. They are held on strong stems during May & June. Divided leaves with rich autumn colour. Likes rich soil & heavy feeding. sun or light shade. (5-6) 75cm.
Paeonia 'Red Magic'	£6.20	Hybrid paeony with large, bomb shaped, incurved rich red flowers with narrow, rather ruffled petals;- late spring & early summer. Red tinged leaves on the new growth. Likes a rich, free draining soil in sun. (5-6) 75cm.
Paeonia wittmanniana	£12.50	Caucasian species with deeply cup shaped almost rounded creamy-white yellow flowers with yellow anthers & red filaments; late spring & early summer. Round lobed, glaucous leaves. Rich retentive yet well drained soil in sun or part shade. 90x90cm.
Pancreatum maritimum	£4.20	Showy bulbous plant from S.Europe. Wonderfully scented white trumpets with protruding anthers in June. Thick glossy strap like leaves. Needs a hot dry summer baking & a sheltered position. 60x30cm.
Papaver orientale (Goliath Group) 'Beauty Of Livermere'	£4.20	THE TRUE FORM, NOT ANOTHER IMPOSTER. Always raised from seed, the nursery trade hasn't the true form, until now. Large, intense, deep red flowers, stained black at the base;- late spring & early summer. Well drained soil in sun. (6-7) 75cm.
Papaver orientale 'Brilliant'	£4.20	Large, papery, cup-shaped DARK RED poppies freely produced; May & June. Cut back hard after flowering for a possible second show. May need staking. Fertile well drained soil in sun. 75x45cm.
Papaver orientale 'Central Park' (New York Series)	£4.50	Bred by Eleanor de Koenig, this sumptuous poppy has large, papery, vibrant, burgundy purple-red flowers, semi-double, with a large black centre;- Compact, so should not need staking. Flowers;- early summer. Well drained soil in full sun. (6-8) 60cm.
Papaver orientale 'Harlem' (New York Series)	£4.50	(New York superpoppy) Large, upward facing poppy giving a generous bowl of crepe-paper like deep burgundy-rose flowers, filled with black stamens blotches. Flowers early summer, repeating in September. Well drained soil in sun. (5-6) (9) 65cm.
Papaver orientale 'Manhattan' (New York Series)	£4.80	New from Eleanor von Koenig's breeding programme, this has stout, non floppy stems with frilled & ruffled, semi-double lilac-pink flowers with large central black blotches;- May & June. Well drained soil in sun. (5-6) 85cm.
Papaver orientale 'Patty's Plum'	£4.50	Unusual semi-double darkest puce-blackberry coloured papery flowers with a darker eye; late spring & early summer. hairy leaves. Cut back hard after flowering for a second show. Fertile well drained soil in full sun. 60x45cm.

Papaver orientale 'Perry's White'	£4.50		Palest pink tinted white flowers with black blotches at the centre; May-July. Good upright habit. Well drained yet retentive soil in full sun. 75cms.
Papaver orientale 'Prinzessin Victoria Louise'	£4.20		Cup-shaped bowls of almost single, SALMON flowers with papery, crinkled petals from large buds; May to July. Cut back hard after flowering for a second show. Gritty well drained soil in sun or part shade. 75x45cm.
Papaver orientale 'Royal Wedding'	£6.75	2.00	Very large, papery, PURE WHITE blooms with a black blotch at the base of each petal; free flowering from May to July. Breeds true from seed. Gritty well drained soil in sun. 75x45cm.
Papaver orientale 'Snow Goose'	£4.50		New hybrid with large, single white, unruffled, crepe paper like flowers with just the smallest black centre;- midsummer. Basal rosettes of toothed, pinnate, hairy leaves. Well drained, rather poor soil in sun. (6-8) 75cm.
Paradisea liliastrum 'Major'	£4.80		A larger form in all parts, this Anthericum relative has rosettes of narrow sword like dark green leaves. Open pyramidal spikes of starry white flowers during midsummer. Often seen in european alpine regions but not often in cultivation. Well drained soil in sun.75cm
Paradisea lusitanica	£4.80		Upright clump former, with basal rosettes of linear leaves. Loose racemes of trumpet-shaped fragrant white flowers all summer. Humus reich, fertile yet excellently drained soil in sun. Beware of slugs. (7-8) 90cm.
Parahebe perfoliata (AGM)	£4.50		(syn Verbena h.) An unusual Australian perennial looking like a low-growing juvenile Eucalyptus. Trailing stems have clasping, oval, grey leaves. The stems terminate in deep violet-blue flowers; July to Sept. Well drained soil in sun. 45x60cm.
Paris quadrifolia JMH7993	£5.20		Gently creeping woodlander, producing a whorl of lance-shaped, fresh-green leaves. Solitary, star-shaped mid-green, spider-like flowers, with white inner petals in spring, followed by blue-black berries. Slow. Moist, leafy soil in full or part shade.(4-5) 30cm
Paris tibetica	£5.80		Elegant species from Nepal & Tibetwith a radial ring of deeply dissected narrow leaf segments. The flower is a small version with very long, drooping yellow filaments. Flowers spring. Slow to establish & treat like Trillium. Woodsy soil. (3-4) 45cm.
Parnassia gansuensis SDR 51.28	£5.50		Wild Himalayan collection. Small alpine plant for moist, even wet soil. Tufts of small green, oval, pointed leaves. Short stems with large, upward facing, creamy-yellow flowers with long hairs, throughout most of summer. Likely to need skill but growable with care. (5-8) 10cm.
Patrinia gibbosa	£4.50		Very hardy native of Eastern Asia & much used in medicine. Basal mounds of divided, pinnate leaves & large, compound flattened heads of white flowers throughout summer. Loved by bees. Easily grown in any reasonable soil in sun or shade. (6-8) 90cm.
Patrinia scabiosifolia	£4.50		The tallest & most elegant of the Patrinias with deeply divided leaves on purple flecked stems. Open, flattened umbels of golden yellow, sweetly scented flowers during mid to late summer. Retentive well drained soil in sun or part shade. (6-8) 120cm.
Patrinia cf. monandra	£8.95	2.00	Collected by Jim Blake. Not totally sure of the name for this 2mtr giant from Rikord Island in Siberia. Basal rosettes of finely cut, jagged leaves. Open, achillea like heads of lemon yellow flowers during mid to late summer. Best in cool soil in part shade. (7-8)

Patrinia villosa	£4.50	Showy Japanese species, forming mounds of deeply cut, tri-lobed basal leaves. Flattened heads of striking acid yellow flowers throughout summer. Retentive, well drained soil in sun or light shade. (6-8) 45cm.
Pelargonium 'Ardens'	£4.50	Tender Geranium, always scarce due to propagation difficulties. Small, intensely scarlet flowers on branched stems are piercing in their intensity. Doesn't produce stems so cuttings are tricky. Keep frost free in winter. (6-10) 30cm.
Peltoboykinia watanabei	£4.60	Upright stems topped with cymes of open bell-shaped, pale greenish-yellow flowers; summer. Clump-forming perennial with lobed, glossy, olive-green leaves. A rhizomatous species from mountain woodlands of Japan. Moist, humus-rich soil in part shade.
Penstemon 'Andenken an Friedrich Hahn' (AGM)	£4.20	(AGM) (syn P.Garnet') A vigorous evergreen with DEEP PORT-WINE tubular flowers flushed crimson over narrow fresh foliage. Full sun in fertile soil. 75x60cms. Flowers: July-September
Penstemon 'Apple Blossom' (AGM)	£5.20	Neat, bushy, semi-evergreen perennial with foxglove-like flowers of gentle blush-pink from midsummer on. May need protection in severe winters. Well drained sunny position. 45x30cms. Flowers: July-October.
Penstemon 'Blackbird'	£4.20	Large, tubular, DARK PURPLE flowers veined darker in the throat; July to September. Lovely evergreen, border perennial. Well drained soil in sun. 60x45cms.
Penstemon 'Burgundy'	£6.75	(syn.Burford Seedling') Almost entirely deep magenta with a smattering of white markings in the throat, but distinctive white stamens; summer & autumn. Strong bushy habit. Retentive yet well drained soil in sun or part shade. 120x90cm.
Penstemon 'Carillo Red'	£5.25	One of those x mexicali hybrids, this makes a small dense, woody based sub-shrub with very fine, glossy green, needle like leaves. Short spikes of narrowly tubular, cherry-red flowers with an unmarked white throat, from June to the frosts. Sheltered, well drained spot in sun. (6-10) 45cm.
Penstemon 'Cathedral Rose'	£4.20	Upright, evergreen perennial clothed with tubular, rose-pink flowers from mid summer until autumn. Requires a free draining soil in sun or part shade. 75x45cms.
Penstemon confertus	£4.50	Compact carpeting evergreen for the rock garden. Densely packed, oval spikes of narrow, tubular, soft-yellow flowers, unusual for the species;- late spring & early summer. Easy in the open garden in well drained soil in sun. (5-6) 10cm.
Penstemon 'Dark Towers'	£5.20	Possibly a digitalis selection, this has persistent rich wine-purple leaves. long spikes of narrowly tubular warm pink flowers through summer. A species type, not a large flowered hybrid. Retentive, well drained soil in sun or part shade. (5-8) 90cm.
Penstemon heterophyllus 'Catherine de la Mare' (AGM)	£4.50	A native of California. Narrow, tubular, blue tinged purple flowers: colour may vary depending on the acidity of the soil; midsummer. Low, spreading ground coverer with shiny, evergreen leaves on red stems. Well drained soil in sun. 30x45cms.
Penstemon 'Mother Of Pearl'	£5.70	Very large, tubular, ALMOST ENTIRELY WHITE flowers flushed with the merest hint of pearly pink & blue with darker markings in the throat. Needs a well drained soil in a sunny well drained site. 75x45cm. Flowers: July to September
Penstemon multiflorus	£4.80	Rare native of Florida & Georgia. Terminal spikes of narrow, WHITE, tubular flowers tinged violet; early summer. Basal clumps of evergreen leaves. May need protection from winter wet but relatively untried. Gritty soil in sun. 45cm.
Penstemon 'Osprey' (AGM)	£4.20	Spikes of fat, tubular, PURE WHITE flowers with a distinctive DEEP PINK MARGIN; June to September. Hardy in a well drained soil in a sunny sheltered site. 75x60cms.

Penstemon pinifolius 'Mersea Yellow'	£4.20	Spreading evergreen sub-shrub, with crowded, needle-like dark-green leaves. Loose, terminal spike-like racemes of narrow YELLOW flowers are freely produced in summer. Well drained, retentive soil in full sun & shelter. (6-8) 30cm. A little weak initially.
Penstemon 'Purple Passion'	£4.20	Spikes of wide, tubular deep purple flowers with white markings & streaking in the throat. Broad, dark green leaves are lightly flushed purple. Well drained soil in a sunny, sheltered site. (6-9) 75cm.
Penstemon 'Rich Ruby'	£4.20	One of the larger hybrids with spikes of large, flared, RICH RUBY-RED tubular flowers with white markings in the throat; July to September. Shrubby, semi-evergreen perennial for fertile, well drained soil in sun. 75x45cms.
Penstemon 'Riding Hood Purple' (Riding Hood Series)	£4.50	More like a species than a hybrid this has basal rosettes of pointed, thick textured, glossy leaves. Compact spikes of narrowly tubular, rich purple flowers with white guidelines leading to the burgundy throat. Flowers all summer. Very hardy in a sheltered, well drained spot in sun. (6-10) 50cm.
Penstemon 'Rubicundus' (AGM)	£5.80	Huge, tubular, CRIMSON-SCARLET flowers; July to September. Large, evergreen foliage. Needs a well sheltered position in sun & a fertile soil. 60x60cm.
Penstemon 'Schoenholzeri' (AGM)	£5.70	(syn. P.Firebird') Long, thin, narrow, tubular BRIGHT RED flowers. One of the hardiest hybrids with narrow, evergreen leaves. Well drained soil in sun. 60x45cm. Flowers: July to October.
Penstemon 'Sour Grapes' (AGM)	£4.20	(syn.Margery Fish') Lovely, rich plummy-burgundy trumpets with a metallic hue; July to September. One of the more hardy varieties but should be protected in winter. Well drained soil in sun. 75x60cms.
Pericaria affinis 'Kabouter'	£4.50	Very compact form with spreading mats of red flushed leaves turning an attractive rust colour in autumn. Short, erect spikes of soft rose flowers from red buds during early summer. Excellent edger for any soil in sun or shade. (5-7) 15x50cm.
Pericaria alpina	£4.50	Very large back of the border species. Bold stems with alternate dark green leaves topped by PURE WHITE bottlebrushes; late summer & autumn. Give it plenty of space - not invasive. Retentive soil in sun or shade. 180x90cm.
Pericaria amplexicaulis 'Alba'	£4.50	Constant display of erect spikes of soft white pokers from June until frosts. Robust clumps of semi-evergreen, ovate, mid-green leaves. Needs space. Retentive or moist soil in sun or part shade.
Pericaria amplexicaulis 'Blackfield'	£4.50	Erect, non invasive knotweed with large, pointed dark-green leaves & long, erect spikes of darkest-red flowers in profusion;- early summer. Long flowering & easy in retentive soil in sun or shade.
Pericaria amplexicaulis 'Dikke Floskes'	£4.80	Translates as 'Tickling Stick'. Mounds of pointed leaves are topped by branched stems which carry long, fat intense glowing red flowers over a long period from July to October. Retentive soil in sun or shade. (7-10) 100cm.
Pericaria amplexicaulis 'Fat Domino'	£4.50	Bushy perennial with short, fat spikes of glowing crimson-red flowers from midsummer to the frosts. Mounds of pointed, glossy green leaves. Best in a retentive, even moist soil in sun or shade. (7-10) 85cm.
Pericaria amplexicaulis 'Firetail' (AGM)	£4.50	A stout, bushy perennial with deep green, heart-shaped, pointed leaves & tall SCARLET pokers'; June to September. Adaptable to most soils but prefers moist conditions in sun or part shade. 1.0m.
Pericaria amplexicaulis 'Golden Arrow'	£4.80	Strong growing clump former with large, heart shaped gold leaves, especially strong in spring more lime-green by summer. Narrow spikes of cardinal-red flowers during late summer & autumn. Retentive soil, colouring best in sun, although tolerant of part shade. (7-9) 90cm.
Pericaria amplexicaulis 'High Society'	£4.50	Not very well known in cultivation, I find that this is one of the tidiest, most free flowering cultivars. Narrow, upright spikes of small deep pink red flowers over a long period in summer. Large, pointed leaves. Retentive soil in sun/pt.sh. 120cm.

Persicaria amplexicaulis 'Inverleith'	£4.15	Lovely plant for all seasons. A big leafy clump is topped by short erect pokers of dark crimson-red flowers freely produced from June to September. Foliage takes on good autumnal colour. Any retentive soil in sun or part shade. 60x75cm.
Persicaria amplexicaulis Jo And Guido's form'	£4.50	Showy selection with narrow, wispy spikes of bell-shaped, rich, salmon-pink flowers throughout summer. Large, heart-shaped, pointed leaves with a fine red edge. Retentive, well drained soil in sun or shade. (7-9) 75cm.
Persicaria amplexicaulis 'J.S Calor'	£4.50	Selected in Belgium, this has long, fat spikes of glowing orange-red flowers over a very long period from August to September. Unusual in that it produces at least two flowers on each spike when it normally is one. Large, heart-shaped leaves. Best in a retentive soil in sun or part shade. (8-10) 90cm.
Persicaria amplexicaulis 'JS Delgado'	£4.80	Compact form with long, narrow spikes of glowing rich-red flowers throughout summer into autumn. Mounds of large, arrow shaped leaves. Strong growing clump former for a retentive soil in sun or part shade. (7-9) 50cm.
Persicaria amplexicaulis 'Lisan'	£4.00	Summer flowering Persicaria with rather fat spikes of rich reddish-pink pokers over mounds of pointed, heart-shaped leaves. very long flowering from July to September. Best in a retentive soil in sun or shade. (7-9) 70cm.
Persicaria amplexicaulis 'Orange Field'	£4.50	Strong growing perennial with mounds of large leaves. erect spikes of unusual soft coral-orange flowers over a long period through summer into autumn. Never too dry soil in sun or part shade. (7-9)
Persicaria amplexicaulis 'Pink Elephant'	£4.50	Shorter form with distinct, arching, rather gooseneck like spikes of soft pink flowers throughout summer. Pointed leaves have a blueish tinge. Retentive soil in sun or shade. (5-8) 65cm.
Persicaria amplexicaulis 'Rowden Gem'	£4.50	Selected by John Carter in Rowden gardens, this erect perennial has, long narrow spikes of rich raspberry-pink flowers during late summer & early autumn. Branched stems with fresh green leaves. Retentive soil in sun or part shade. (7-9) 90cm.
Persicaria amplexicaulis 'Seven Oaks Village'	£4.50	Bushy, dense clump forming perennial with branched stems topped by narrow spikes of white flowers edged raspberry pink, overall looking rich pink at a distance. Flowers late summer into autumn. Easy grown in retentive, well drained soil in sun or shade. (7-10)
Persicaria amplexicaulis 'Summer Dance'	£4.50	Large, bold clump former, with branched stems carrying narrow, wispy erect blush-pink pokers with a small red eye during mid to late summer. Large, heart-shaped, deeply veined dark-green leaves. Retentive soil in sun or shade. (6-8) 90cm.
Persicaria amplexicaulis 'Taurus'	£4.50	Long, narrow plump spikes of rich cerise-pink flowers on branched stems all summer into autumn. Bushy, vigorous form, with large, heart-shaped dark-green leaves. Retentive soil in sun or shade. (7-
Persicaria bistorta 'Superba' (AGM)	£4.20	Masses of erect COOL PINK pokers'; early summer. Dense clumps of semi-evergreen, broadly ovate, boldly veined, mid-green leaves to 30cms long. Best in moist soil in sun or part shade. Excellent ground cover. 75cms.
Persicaria campanulata	£4.20	A good coloniser with attractive pale green foliage. Slender spikes of fragrant, pink or white, bell-shaped flowers; over a long period from midsummer on. Cool, moist soil in part shade. 90x90cm (3ft)
Persicaria 'Johanniswolke'	£4.80	Much like a condensed form of alpina (polymorpha) with strong stems topped by clouds of very fine, pristine white flowers during late summer. Large, pointed, heart-shaped leaves. Retentive soil in sun or part shade. (8-10) 120cm.
Persicaria runcinata	£4.20	(Polygonum.r.) One of the most attractive knotweeds with gently creeping carpets of pointed dark green leaves. Branching stems with ball like soft pink flowers in the leaf axils from May to October. Needs a sheltered site in moist leafy soil in pt.sh. 30x45cm.
Persicaria sp. SDR 3965	£4.20	Small rockery or front of border species, collected in China & as yet unidentified. Tufts of very narrow, elliptic leaves, held erectly. Narrow, long wispy spikes of soft pink flowers from red buds during mid to late summer. Easily grown in any reasonable soil in sun or part shade. (7-8) 20cm.

Persicaria tenuicaulis	£4.20		Gentle, spreading ground cover, with the short spikes of snow-white flowers emerging with the new leaves in early spring. Oval, rather pale green leaves. Good ground cover for sun or shade. (3-
Persicaria virginiana filiformis	£4.20		Ovate, red flushed leaves, with a strong red narrow chevron. Long airy, wispy spikes of small deep-red flowers. Retentive or moist soil in sun or part shade. Needs a sheltered site. (8-10) 75cm.
Persicaria virginiana (Variegated Group) 'Painter's Palette'	£5.80	2.00	Attractive erect perennial the large leaves having a banding of cream, pink, black & white making it a noble foliage plant. Small insignificant flowers. For a fertile retentive soil in sun or part shade.
Petasites hybridus	£4.20		Very vigorous, spreading ground cover for a moist spot where it can be left to naturalise. Stumpy spikes of starry pink flowers appear before the large, rounded, softly hairy, soft green leaves in early spring. BUYER BEWARE. (2-3) 40 x indefinite.
Petasites japonicus giganteus 'Nishiki-buki'	£4.45		Extremely vigorous spreading ground cover for retentive soils. Huge leaves irregularly splashed & mottled cream appear after the round heads of creamy-yellow flowers. Sun or shade. (3-4) 90cm.
Petasites japonicus purpureus	£4.15		The large rounded leaves emerge purple-black, fading purple-green. The purple-pink flowers emerge from the red buds on stout stems before the leaves. Spreads in moist or retentive soil in sun. (2-4) 75cm.
Peucedanum verticillare	£5.45	2.00	Impressive, stately Umbellifer bearing dramatic, creamy green flattened flower heads on strong, dark purple stems. Blueish-purple divided foliage. Ht: 220-250cms.
Phacelia californica	£4.80		Surprisingly hardy & perennial, this Coastal native of California & Oregon has rosettes of divided, intensely silver leaves on woody stems. Curling spikes of lavender-blue flowers like a scorpions tail, all summer long. Fantastic for butterflies. Sheltered, well drained spot in sun. (4-8) 40cm.
Phlomis russelliana (AGM)	£4.50		Stout stems with whorls of SOFT BUTTER-YELLOW, hooded flowers; all summer. Basal rosettes of large, coarse leaves. Evergreen perennial for a dry, sunny border. Gives good winter structure. 90x60cm.
Phlomis sp. coll. China	£4.80		There are a lot of Phlomis in China so this may remain a sp. for some time. Creeping herbaceous variety with whorls of dark-green, pointed leaves. whorls of hooded dusky-pink flowers in the upper leaf axils;- late summer. Easy in any reasonable soil in sun or part shade. (7-8) 80cm.
Phlox 'Adessa White'	£4.50		A shorter strain, bred in Russia for use also in pots. Domed heads of scented pure-white flowers during late summer & autumn. pointed, light fresh-green leaves. Best in a retentive soil in sun or part shade. (7-9) 60cm.
Phlox amplifolia 'Augenstern'	£4.50		Rarely seen species, bred in Germany to create a much underused garden plant. Erect stems with narrow, smooth green leaves. Domed heads of small but profuse, narrow petalled soft-pink flowers with a small red eye, from June to September. Retentive soil in sun or part shade. (6-9) 100cm.
Phlox x arendsii 'Babyface'	£4.50		Dwarf, very floriferous hybrid between divaricata x paniculata. Domed heads of well packed, sweetly scented baby-pink flowers with a deep rosy-pink eye, during midsummer into autumn. Loved by butterflies & insects. Good for pots. Retentive soil in sun or part shade. (7-9) 60cm.
Phlox x arendsii 'Casablanca'	£4.20		Older cultivar with well rounded heads of scented pure white flowers;- July to September. Paler fresh green leaves with reasonable mildew resistance. Retentive soil in sun or part shade. (7-9) 75cm.

Phlox x arendsii 'Miss Jessica' (Spring Pearl Series)	£5.65	2.00	Large umbels of lilac-blue flowers which fade to almost white at the eye. Slightly scented. Retentive soil in sun or part shade. (7-9) 50cm.
Phlox x arendsii 'Miss Jill' (Spring Pearl Series)	£4.35		(Springpearl Series) Shorter hybrid with clusters of scented, creamy-white flowers with a small pink eye;- late summer & early autumn. Good mildew resistance. Ideal for pots. Retentive soil in sun or part shade. (7-9) 55cm.
Phlox x arendsii 'Miss Mary' (Spring Pearl Series)	£4.20		Springpearl series. A new selection with clear-red flowerheads like a paniculata, but much dwarfer & well scented; June & July. Very dark smokey-purple foliage. Retentive soil in sun. 50x45cm.
Phlox carolina 'Miss Lingard' (AGM)	£4.50		Spires of DAZZLING WHITE flowers; June to August. Distinct thin, purple spotted stems with glossy, mildew resistant leaves. Fertile soil in sun. 75x45cms.
Phlox divaricata 'Dirigo Ice'	£4.50		Gently creeping, semi evergreen ground cover for part or full shade. Gappy petalled, highly scented, white flowers are held on trailing stems, with elliptic, dark green leaves. Retentive soil. (4-6) 30cm.
Phlox divaricata laphamii 'Chattahoochee' (AGM)	£4.50		Very showy, deep lilac-blue, narrow petalled flowers with a red eye; on trailing stems early summer. Semi-evergreen, self-rooting stems form good ground cover. Humus rich, fertile, well drained soil in part shade. 30x45cm.
Phlox divaricata 'May Breeze'	£4.60		A lovely new selection with glossy leaves covered in clouds of FRAGRANT WHITE FLOWERS WITH A HINT OF BLUE over a long period; April to June. Rich, not too dry soil in sun. 30x45cms.
Phlox glaberrima 'Morris Berd'	£4.60		Attractive American selection, reminiscent of 'Bill Baker'. Dense heads of silky, cup-shaped, baby-pink flowers with a white eye;- early to midsummer. Upright stems with smooth, elliptic leaves. Naturally a woodland species so best in part shade. (5-8) 30cm.
Phlox maculata 'Alpha' (AGM)	£4.50		A different & unusual phlox with stout, upright stems carrying long, cylindrical heads of heavily scented LILAC-PINK flowers; summer. Retentive soil in light shade. 90cms.
Phlox paniculata 'Aida'	£4.20		Very old hybrid, not very strong & robust now but still sought after for its vibrant purple-blue flowers, becoming faintly streaked paler with age;- late summer & autumn. Very light scent. Needs a rich, retentive soil in sun or part shade. (7-9) 90cm.
Phlox paniculata 'Becky Towe'	£4.50		Striking variegated form, with the leaves almost entirely burnished gold, with just small amounts of green variegation. The new growth is burnished bronze. Heads of dark salmon pink flowers, deeper at the eye. retentive soil in sun or part shade.(7-9)50cm
Phlox paniculata 'Blue Boy'	£4.50		Strong grower with large panicles of fragrant flowers of MAUVE-BLUE WITH A WHITE EYE; summer into mid autumn. Good mildew resistance. Fertile retentive soil in sun or part shade. 90x45cm.
Phlox paniculata 'Blue Evening'	£4.50		(Summer Phlox) Large trusses of lilac-blue flowers, stained white at the eye, with a small dark eye. Like all blues, they seem more pink on hot days. Has a light scent. Flowers July to September. Best in a retentive soil in sun or part shade. (7-9) 80cm.
Phlox paniculata 'Blue Paradise'	£4.80		Possibly the most sought after hybrid. Large heads of almost fluorescent rich-blue flowers, with a darker eye. Highly fragrant. Good disease resistance. Retentive soil in sun or part shade. (7-9) 100cm.

Phlox paniculata 'Brigadier' (AGM)	£4.20		A popular old cultivar, with heads of pink-red flowers, with an orange tint. Slightly scented. Very dark-green leaves. Fertile, retentive or moist soil in sun or part shade. (7-8) 90cm.
Phlox paniculata 'Bright Eyes' (AGM)	£5.75	2.00	Well scented, clear pale-pink flowers with a red eye; late summer & early autumn. Good mildew resistance. Retentive soil in sun or part shade. 75x45cm.
Phlox paniculata 'Classic Cassis'	£4.50		Dwarf form, bred specifically for pots but equally as good in the open garden. Domed heads of rich purple-pink flowers with a lipstick-pink eye;- late summer. Bred for good mildew resistance. Retentive soil in sun or light shade. (7-9) 50cm.
Phlox paniculata 'David'	£5.55	2.00	Rather long, cylindrical spikes of highly fragrant pure-white flowers, more reminiscent of a maculata type. Fresh paler-green leaves. Good mildew resistance. Retentive soil in sun or part shade. (7-8) 80cm.
Phlox paniculata 'Dusterlohe'	£4.50		syn. 'Eclairer' of hort & 'Nicky'. Re-discovered old, European variety with scented heads of RICH SALMON-RED flowers on upright, wiry stems; July to September. Fertile, retentive soil in sun or part shade. 90cms.
Phlox paniculata 'Europa'	£4.20		Upright stems carrying heads of WHITE FLOWERS WITH A DISTINCT RED EYE; July - September. A good clump-forming perennial. Not too dry soil in sun or part shade. 75x45cm.
Phlox paniculata 'Eva Foerster' (AGM)	£5.65	2.00	Old German selection, not often seen now. Heads of striking, bright lipstick-pink flowers with white guidelines at the eye. Flowers July to September. The leaves have a light purple-brown flush on the new growth. Retentive, never too dry soil in sun or part shade. (7-9) 100cm.
Phlox paniculata 'Eventide' (AGM)	£5.80	2.00	Large heads of lavender-blue flowers, paling at the eye; late summer & early autumn. Tall strong stems with good mildew resistance. Retentive soil in sun or part shade. 90x45cm.
Phlox paniculata 'Franz Schubert'	£4.50		A popular border plant with heads of scented flowers of PALE LILAC-BLUE ON A WHITE BACKGROUND; July & August. Needs a moisture retentive, rich soil in sun or part shade. 75x60cms.
Phlox paniculata 'Goldmine'	£4.80		Striking foliage plant with the leaves having a very broad, golden margin. Dense heads of scented rich magenta purple flowers during late summer, into autumn. Best in a retentive soil in sun or part shade. (7-9) 75cm.
Phlox paniculata 'Jade'	£4.50		Attractive shorter & later flowering hybrid with densely packed, domed heads of small white flowers with a celadon green edge & eye, attractive & unusual. Rich, retentive soil in sun or part shade. (7-9) 60cm.
Phlox paniculata 'Laura'	£4.50		A new European hybrid with densely packed heads of rich violet-blue flowers with a darker central zone giving a star-like pattern. Retentive well drained soil in sun. 80x45cm. Flowers: July-September.
Phlox paniculata 'Le Mahdi' (AGM)	£4.50		Popular in Europe but virtually not known in the UK. Clusters of lightly scented, violet-blue flowers with pink overtones, especially in hot weather;- late summer. Retentive, well drained soil in sun or part shade. (7-9) 75cm.

Phlox paniculata 'Lichtspel'	£4.50	Old variety with heads of silvery lilac-pink flowers with a slightly deeper flushed eye during late summer & early autumn. Needs excellent living as it is an older variety. Best in a retentive soil in sun or part shade. (7-9) 120cm.
Phlox paniculata 'Mardi Gras'	£4.50	Domed panicles of very intense, richest velvety purple flowers with paler flecking, around a small red eye, during late summer & autumn. Light scent. Best in a retentive, even moist soil in sun or part shade. (7-9) 65cm.
Phlox paniculata 'Monica Lynden-Bell' (AGM)	£4.50	This showy hybrid has large baby-pink flowers with a red flushed eye, emerging from red buds in in late summer. Well scented. Leafy stems have good disease resistance. Retentive soil in sun or part shade. (7-9) 75cm.
Phlox paniculata 'Mystique Black'	£4.50	Strange Phlox with dense heads of deepest purple-black buds opening to tint black flowers, stained green at the edges ;- late summer & autumn. Very effective en-masse in a retentive, well drained soil in sun or part shade. (7-8) 60cm.
Phlox paniculata 'Newbird'	£4.50	Old German hybrid from the 1930's, not often seen now. Originally bred as 'Neubert' which should take precedence. Heads of glowing rich carmine-pink, faintly marked white towards the eye. tall stems with narrow, red flushed leaves. Retentive or moist soil in sun or part shade. (7-10) 100cm.
Phlox paniculata 'Norah Leigh'	£4.50	A most striking border plant with the leaves heavily variegated & almost entirely cream. The purple, scented flowers are produced in late summer. Must have a well fed, moisture retentive soil with some shade in which to thrive. 80x45cm. Flowers: July-August
Phlox paniculata 'Pina Colada'	£4.50	This shorter form is one of the best pure whites. Heads of good sized white flowers from green tinged buds during late summer & early autumn. Pale green leaves. Best in a retentive soil in sun or part shade. (7-9) 60cm.
Phlox paniculata 'Pink Lady'	£4.50	(Top Shelf Series) Very distinct short form with domed heads of soft baby-pink scented flowers. has a graduated white halo around the cherry red eye ; July to September. Good mildew resistance & good for pots. Retentive soil in sun or part shade. (6-9) 40cm.
Phlox paniculata 'Prince Of Orange' (AGM)	£4.50	Startling colour break with domed heads of intense, seville orange flowers, more orange on cooler days but red on hot, summer days. Popular for it's colour but not the best for disease resistance. Retentive soil in sun or part shade. (7-8) 90cm.
Phlox paniculata 'Rembrandt'	£4.50	One of the best whites, with strikig flattened heads of white flowers with a heady scent. pale-green leaves. retentive soil in sun or part shade. (7-9) 75cm.
Phlox paniculata 'Rosa Pastell'	£4.50	Tall, free flowering hybrid with rather large blush-pink flowers fading to almost white at the eye with just a few intense lipstick pink veins in the throat;- mid to late summer. Likes a rich, retentive soil in sun or part shade. (7-9) 100cm.
Phlox paniculata 'Septemberglut'	£4.20	Erect leafy stems topped by dense panicles of GLOWING SALMON-CARMINE flowers. Grow in a rich, fertile, well mulched & not too dry soil in sun or part shade. 80x45cm. Flowers: July-August.

Phlox paniculata 'Starfire' (AGM)	£5.65	Heads of good dark red, scented flowers; July to September. Dark green foliage. Any fertile, moisture holding soil in sun or part shade. 90cms.
Phlox paniculata 'Tatjana'	£4.50	Russian hybrid with domed heads of sweetly scented, bright cerise-pink flowers with a white stained centre, from late summer into autumn. Pairs of fresh green leaves. Retentive soil in sun or part shade. (7-10) 75cm.
Phlox paniculata 'Tequila Sunrise'	£4.80	A shorter form with heads of glowing rich salmon-orange flowers with a tiny red eye during late summer & autumn. Has a pleasing scent. The leaves are heavily flushed burgundy. Good in pots. Retentive or moist soil in sun or part shade. (7-10) 40cm.
Phlox paniculata 'The King'	£4.50	One of the darkest hybrids available. Densely packed pyramidal heads of fragrant, DEEP VIOLET-BLUE flowers becoming paler towards the eye; July to September. Fertile retentive soil in sun or part shade. 75x45cm.
Phlox paniculata 'Tiara'	£4.35	The worlds first double flowered Phlox with densely packed domed heads of double white flowers, opening from green flushed buds;- midsummer into autumn. Rich, retentive soil in sun or light shade. (7-9) 50cm.
Phlox paniculata 'Twister'	£4.50	Sport of 'Peppermint Twist' with domed heads of lightly scented white flowers with a bright raspberry-pink star like pattern on each flower ; - August & September. Good mildew resistance. Best in a rich, retentive soil in sun or light shade. (7-9) 75cm.
Phlox paniculata 'Uspek'h'	£4.50	Russian selection of strong growth & habit with large, domed heads of lightly scented, intense violet-purple flowers with star like white pattern at the eye, held in late summer. Retentive soil in sun or part shade. (7-9) 80cm.
Phlox paniculata 'Van Gogh'	£4.50	Popular European form, with rounded heads of light-blue flowers with a paler central zone & white eye, slightly scented & freely produced in late summer. Moderate mildew resistance. Retentive or moist soil in sun or part shade. (7-9) 80cm.
Phlox paniculata 'Wenn Schon Denn Schon'	£4.15	An old Karl Foerster hybrid which was lost for a long period. Much like a brighter 'Uspek'h' with intense cerise-pink flowers with bluish overtones around a large, star-shaped white eye. Needs good living in a rich, retentive soil in order to do well. Sun or part shade. (7-9) 75cm.
Phlox paniculata 'Windsor' (AGM)	£4.50	Old variety with dense, domed heads of warm salmon-pink with a magenta-red eye;- late summer. Needs a retentive soil in sun or light shade in order to thrive. (7-8) 75cm.
Phuopsis stylosa	£4.20	Dense compact ground cover, with trailing stems carrying needle-like glaucous grey-green leaves with a Foxy scent when wet. Small flattened heads of narrow, trumpet shaped pink flowers smother the plant in late spring & early summer.(5-7)15cm
Phuopsis stylosa 'Purpurea'	£4.50	Low, edging mat former with whorls of very fine, needle like light green leaves. Domed heads of scented purple-pink, narrowly tubular flowers during late spring & early summer. Loved by butterflies. Ideal for naturalising banks. Well drained soil in sun or

Physalis alkekengi franchettii	£4.35	Creeping perennial with heart shaped leaves turning yellow in autumn. Flared soft cream flowers during early summer followed by large inflated yet inedible orange fruits which persist through winter. Any reasonable soil in sun or part shade. (5-7) 50cm.
Physalis alkekengi franchettii 'Variegata'	£4.20	Not our idea of a lovely plant but may appeal to some the gold-marbled leaves having a virus-like variegation. Cup-shaped white flowers in summer; the inflated orange fruits in autumn are decorative. Spreads freely in well drained soil in sun or shade. 45x60cm.
Physalis alkekengi 'Halloween King'	£4.20	Dwarf form of this vigorous species which does not split. Short stems carry inconspicuous cream flowers during midsummer, followed by large, inflated, lantern like rich orange flowers which are persistent through autumn into winter. Easy in retentive, well drained soil in sun or part shade. (5-6) 35cm.
Physostegia virginiana 'Galadriel'	£4.50	Strangely neglected plant with spikes of narrowly tubular rich rosy-purple flowers, held in two ranks;- Midsummer. Narrow, toothed leaves. easy in well drained soil in sun or light shade. (7-8) 100cm.
Physostegia virginiana 'Red Beauty'	£4.50	An attractive clump-former with bright green leaves and spikes of curiously hinged, RED, tubular flowers; August-September. Good late season colour. Fertile, not too dry soil, in sun. 60x45cms.
Physostegia virginiana speciosa 'Variegata'	£4.20	Makes a neat clump of upright stems clothed in pale green leaves edged white. Spires of tubular, curiously hinged, RICH LILAC-PINK flowers. Moisture holding soil in sun. 60cms. Flowers: August-October.
Phytolacca americana	£4.50	Coll;-Rockton, Illinois. CARE POISONOUS & SMELLY. Despite this, they are well worth growing for their spikes of white flowers in late summer followed by closely packed, shining, maroon berries. Large leaves. Retentive soil in sun or shade. 120x60cm.
Phytolacca americana 'Silberstein'	£4.60	American selection with broad, creamy-white, speckled leaves, held on pink flushed stems. Clusters of small pink flowers develop into pikes of initially purple, then black berries;- July to August. Retentive soil in sun or light shade. (7-9) 100cm.
Pimpinella major 'Rosea'	£4.80	Bold, upright perennial the stiff stems topped with flattish heads (umbels) of both deep and pale pink flowers; early & midsummer. Basal clumps of triangular, pinnate, fresh green leaves. Prefers a fertile, moist soil in sun. Ht: 120cms.
Pinellia pedatisecta	£4.80	Yellow-green, cuckoo-pint-like spathes to 18cms concealing a yellow-green spadix; summer. Basal clumps of rounded, pedate, nasturtium-like, lobed, mid-green leaves. Tuberous perennial for a fertile, humus-rich, well drained soil in sun or part shade. 18cms
Pinellia ternata	£8.00	Probably the trickiest species to grow of those currently in cultivation. Tuberous, with palmate, mid-green leaves with oblong segments. Hooded green spathes with a protruding green spadix in summer. Fertile, humus rich soil in part shade. (7-8) 20cm.
Plantago major 'Rubrifolia'	£4.20	Bold rosettes of broad, pleated, dark purple-flushed leaves - makes a good feature for pots & borders. Insignificant flowers, but beware, it can self seed true like the garden weed! Any reasonable soil in sun or shade. 45x45cm.

Platycodon grandiflorus 'Mariesii' (AGM)	£4.20	Large, round, balloon-like buds open to wide, cup-shaped flowers of STRIKING BLUE.; July to September. Makes clumps of neat, blue-green leaves. Any well-drained soil in sun or light shade. 45cms.
Plectranthus excisus	£4.35	Unusual autumn flowering shade lover with square stems having unusual, rounded leaves with a very pointed tip. Arching sprays of small, narrowly tubular, id-blue Nepeta like flowers during autumn. Best in a retentive, woodland soil in part or full shade. (8-10) 60cm.
Pleurospermum sp. SDR7985	£5.20	Small, high alpine unidentified Chinese species forming tufted rosettes of finely cut, fresh green leaves. Branched stems carry flattened heads of lacy white flowers, ageing rose pink;- mid to late summer. easy when established. Retentive, sharply drained soil in
Podophyllum aurantiocaulle	£6.20	Unusual herbaceous woodlander with pairs of palmate leaves, variably mottled brown, the variation often disappearing at flowering. The new shoots are intensely hairy. hanging clusters of lampshade like cream flowers in during spring. Needs a humus rich, woodland soil in part shade. (4-5) 40cm.
Podophyllum 'Kaleidoscope'	£17.25	Superb but painfully slow foliage plant with big, umbrella like leaves with heavy silver blotching & a central black ring. Nodding dark red flowers hang beneath the leaves in late spring. Fussy needing a rich woodland soil in part shade. (5-6) 60cm.
Podophyllum peltatum	£4.80	Curious woodlander with wandering roots producing solitary leaves that unfurl like umbrellas. It then has one large creamy flower followed by a rosy fruit. Humus rich soil in part shade. Poisonous except the fruit which is edible. 45x30cm.
Podophyllum versipelle 'Spotty Dotty'	£17.35	Woodlander with toothed, palmate leaves, pale green with heavy black spotting. Nodding burgundy red flowers nestle in the crown in late spring. Cool, retentive, woodland soil in part shade. (5-6)
Polemonium acutiflorum	£4.50	(syn.P.acutiflorum) Coll;-Magadan, Siberia. Clusters of large, cup shaped, RICH BLUE, cup-shaped flower with an orange-yellow eye; early summer. Unusual pinnate leaves. A sub-species of our native plant. Well drained soil in sun. 75x45cm.
Polemonium caeruleum	£4.20	Silky cup-shaped, LAVENDER-BLUE flowers with orange stamens; May to July. Basal clumps of finely divided foliage. Any fertile soil in sun. 60x60cms.
Polemonium caeruleum 'Brise D'anjou'	£4.80	Recently rediscovered in France. Deep green pinnate leaves are regularly margined golden-yellow. Cup-shaped, BLUE flowers with a yellow centre; midsummer. Fertile, well drained soil in sun or part shade. 60x45cm.
Polemonium caeruleum caeruleum albiflorum	£3.95	Elegant, cottage garden perennial, forming basal mounds of pinnate, deeply cut, pale-green leaves. Heads of cup-shaped white flowers with yellow filaments;- late spring & early summer. Well drained soil in sun or part shade. (5-6) 60cm.
Polemonium caeruleum 'Days of Thunder'	£4.80	Selected here, this is a taller form of caeruleum. Basal clumps of finely pinnate, fresh green leaves. Heads of rich purple-blue, yellow eyed flowers during late spring & early summer. Retentive soil in sun or shade. (5-6) 75cm.
Polemonium caeruleum 'Snow & Sapphires'	£4.50	Clumps of pinnate leaves, with a broad white margin, rather like Brise d'Anjou', but this is yellower. Umbels of fragrant, sky blue flowers, with yellow stamens during early summer. Rich, well drained soil in sun or part shade. (5-8) 60cm.
Polemonium 'Churchills'	£4.80	Clusters of small flowers emerge pale-lilac almost white, maturing through to a mid-blue, all on the same head at the same time. Slightly dark-flushed stems. Very effective. retentive well drained soil in sun or part shade. (4-6) 45cm.

Polemonium formosissimum 'Cottage Cream'	£5.20	Tall, upright, self supporting, late flowering hybrid heads of warm cream flowers on well branched stems during June & July. mounds of finely pinnate, fresh green leaves. Retentive, well drained soil in sun or part shade. (6-7) 150cm.
Polemonium 'Glebe Cottage Lilac'	£4.80	A Carol Klein hybrid, with clusters of cup-shaped pale lilac-pink flowers with cream stamens from late spring through early summer. Longer flowering than most. Pinnate. Retentive, well drained soil in sun or part shade. (5-7) 90cm.
Polemonium 'Hopleys'	£4.80	Clump former with basal clumps of finely pinnate leaves with oval leaflets. Branched stems with spikes of cup-shaped, lightly scented pale lilac sterile flowers over a long period from June to September. Retentive, rich soil in sun or shade. (6-9) 60cm.
Polemonium 'Lambrook Mauve' (AGM)	£4.50	Shallow, saucer-shaped, purple flowers on upright stems; May-June. Forms clumps of divided pinnate foliage. Any fertile soil in sun or part shade. 60x60cm.
Polemonium 'Pink Beauty'	£4.20	Clusters of cup-shaped, lilac-pink flowers with a yellow eye; all summer. Basal clumps of pinnate, divided foliage slightly flushed purple. Retentive well drained soil in sun or part shade. 45x45cm.
Polemonium reptans	£4.50	Clusters of SOFT BLUE bell-shaped flowers; May-June. Forms a rosette of finely divided leaves. Any fertile soil in sun or part shade. 60x30cm.
Polemonium reptans 'Stairway To Heaven'	£4.85	Grown as much for it's spectacular foliage as it's flowers. Billowing, semi evergreen mounds of pinnate leaves with a broad cream edge take on distinct pink tints when growing well. Heads of sky-blue flowers in spring. Well drained soil in sun. (4-5) 60cm.
Polemonium reptans 'Virginia White'	£4.50	The unusual white form of this easy to grow perennial. Cup-shaped, white flowers with a slatey blue flush on the exterior during early summer. Ordinary soil in sun or part shade. 45x45cm.
Polemonium 'Sonia's Bluebell'	£4.80	flowers: Heads of a beautiful soft blue freely produced over a long period; April-June. A beautiful form, found in a garden in Devon, the foliage subtly showing black hues. Fertile soil in sun or part shade. 45x45cms.
Polemonium yezoense hidakanum 'Bressingham Purple'	£4.50	A pleasing combination of delicate, finely cut, smokey-brown leaves. Sprays of violet-blue flowers with a purple eye & yellow stamens, during late spring & early summer. Retentive, well drained soil in part shade or sun. (5-7)70cm.
Polemonium yezoense hidakanum 'Purple Rain'	£4.50	Variable seed raised strain which in it's best form has rich-purple pinnate leaves; but very variable! Clusters of silky, RICH BLUE, cup-shaped flowers with yellow stamens; summer. Fertile soil in sun. 45x45cms.
Polygonatum biflorum	£4.80	Gently creeping rhizomatous perennials, with arching stemshaving alternate, elliptic leaves with glaucous veining. Clusters of pendent, tubular greeish-white flowers in the leaf axils followed by black fruit. Fertile, rich, well drained soil in full or part shade. 75cm.
Polygonatum cirrhifolium	£4.80	An unusual solomon's seal with whorls of narrow leaves on upright stems. Clusters of small lilac flowers in the leaf axils in early summer. Retentive soil in part or full shade. (5-6) 45cm.
Polygonatum cryptanthum	£9.50	Rarely seen, small Japanese species with strongly arching stems having almost back folded, soft green leaves. From each axil hangings two greenish-white, narrowly tubular flowers, held in conspicuous large green bracts, during late spring. Slow to multiply. Woodland soil in part shade. (4-5) 40cm.
Polygonatum filipes	£5.50	

Polygonum forrestii	£4.50	syn. Koenigia. Introduced by George Forrest from China. Low, creeping mats of glossy, rounded, deeply veined, small heart-shaped leaves. Short stems with sprays of chaffy white flowers during early summer. Needs a retentive, yet well drained soil in dappled shade. (6-7) 10cm.
Polygonatum hookeri	£4.50	Completely unlike most peoples conception of Solomons Seal. Quick spreading mats of narrow, linear leaves. Short stems bear upfacing, flared, rich-pink flowers (2cm) in the leaf axils; early summer. Humus-rich, fertile soil in part or full shade. 10x60cm.
Polygonatum humile	£4.60	Slender stems with lined with pendent, long, narrow, creamy-yellow flowers held in pairs; late spring. Purple-black fruits. Ovate leaves placed. Much confused with P.falcatum of gardens. Well drained, humus-rich soil in part or full shade. 15x45cm.
Polygonatum x hybridum 'Striatum'	£6.75	Creeping perennial, with upright, arching stems with alternate dark-green leaves, irregularly striped & variegated white. Small, hanging clusters of greenish-white flowers in the upper leaf axils followed by black fruit. Woodland soil. (5-6) 90cm
Polygonatum x hybridum 'Weihenstephan'	£4.80	syn.P.h.multiflorum. Selected for it's pairs of larger, green tipped white bells which hang from every leaf axil during spring. Arching stems with pairs of opposite, elliptic, smooth green leaves. Cool, moist, woodland soil in part or full shade. (3-5) 90cm.
Polygonatum x hybridum 'Welsh Gold'	£5.80	Rather unusual form with the leaves a burnished rich gold, becoming more yellow green by flowering. Arching stems with narrow, bell-shaped white flowers, tipped green, during April & May. rather slower to multiply than the type. Best in a woodland soil in part or full shade. (4-5) 75cm.
Polygonatum 'Multifide'	£6.30	Plants in cultivation have arisen from Amsterdam Botanical garden but this seems similar to multiflorum ssp. ramosum. The stems branch very heavily from which hang the green tipped white bells during spring. Very showy. Cool, humus rich soil in pt,sh. 80cm.
Polygonatum multiflorum	£4.50	This is the true species & not x hybridum as is usually offered. A compact species with grey-green leaves & clusters of small creamy-white flowers in the leaf axils. Retentive, leafy soil in part shade. (5-6) 30cm.
Polygonatum odoratum pluriflorum	£4.75	Arching, unbranched stems have oval leaves glaucous beneath. Small, white bell-shaped flowers tipped green; held in the leaf axils in late spring & early summer. Spreads via rhizomes. Retentive soil in part shade. 45x30cm.
Polygonatum odoratum 'Ussuriland'	£5.20	Collected By Michael Wickenden from Ussuri, Russia in 1996 this impressive species has large grey-green leaves, greyer beneath. Hanging clusters of good sized cream flowers in the leaf axils during late spring. Humus rich woodland soil in part shade.(4-5)
Polygonatum odoratum 'Ussuriland Roundleaf'	£5.20	Collected by Michael Wickenden in the Ussuri in Russia. Distinct form of odoratum with erect stems having rather rounded, light grey-green leaves. Small hanging clusters of narrowly tubular, creamy-white flowers, held in the upper leaf axils during late spring. Woodland soil in part or full shade. (4-5) 70cm.
Polygonatum orientale	£4.80	syn. P.polyanthemum. Shorter, strong growing species with pairs of lance shaped, smooth green leaves, hairy beneath. Hanging clusters of narrowly bell shaped, green tipped white flower during late spring. Cool, humus rich, woodland soil in full/part shade. (5-6)
Polygonatum prattii	£5.20	Distinct, dwarf Chinese species with short erect stems with very narrow, scattered, linear leaves. The stems are crowded in small, rather lilac-grey, bell-shaped flowers during mid to late spring. Gently creeps in a retentive, woodland soil in part or full shade. (4-
Polygonatum roseum	£4.80	Small species from Asia, with the leaves emerging pale green on angled, erect stems, greyish-green beneath. Pairs of long, dusky-pink flowers from the upper leaf axils in late spring. Cool, retentive, humus rich soil in part or full shade. (4-5) 30cm.

Polygonatum sibiricum DJHC 600	£4.95	Amazing, almost climbing form often up to 3mtrs. Whorls of fine narrow green leaves turning yellow in autumn. Clusters of small brownish flowers followed by bluish fruits. Humus rich woodland soil in part or full shade. Ht to 3mtrs.
Polygonatum stewartianum	£4.95	Small & very slow to clump up therefore it will remain scarce in cultivation. Narrow lance shaped leaves on arching stems in whorls, with small clusters of tiny purple pink flowers in the leaf axils in spring. Retentive soil in part or full shade. 45x30
Polygonatum verticillatum	£4.50	Willowly tall stems with whorls of very fine leaves. Small brooding creamy white flowers with green rims in pairs in the leaf axils during late spring. Cool, moist woodland soil in part shade. (5-6) 120cm.
Polygonatum verticillatum 'Himalayan Giant'	£4.80	Narrow, pendent, greenish-white flowers in the upper leaf axils; late spring followed by black fruits. Dark green, lance-shaped leaves held in whorls. Humus-rich, well drained soil in sun or part shade. A giant form of this variable plant. 120x45cm.
Polygonatum zanlanscianense	£5.95	Tall species forming aerial tendrils which enable it to scramble. Whorls of narrow leaflets at the nodes from which hang small clusters of deep purple flowers, tinged green in late spring. Small, blue-black berries follow. Well drained soil in pt.sh. Ht to 5ft
Polygonatum sp. SDR 1615	£5.20	Unidentified, tiny creeping species with erect stems clothed in whorls of very narrow, glossy green, linear leaves. Large, hanging bell-shaped dusky-purple flowers with flared deep purple mouths, hanging in clusters in the upper leaf axils during late spring. Cool, moist woodland soil in part shade. (5-6) 10cm.
Polygonatum sp. 245	£5.50	Collected near the Pienma pass on the Yunnan/Burma border, by Michael Wickenden, this has pairs of rich green, thick, leathery textured leaves. Flowers not seen. Remarkable for it's large bunches of fruit. (4-5) 60cm. Does not key out to any species i
Polygonatum yunnanense Og94.047	£5.20	Delightful small spreading species, initially collected by Midori Ogisu in China as a Disporum. Creeping rhizome with arching stems having pairs of smooth green oval leaves. Small hanging clusters of yellowish green flowers in the leaf axils in late spring & early summer. Cool, moist woodsy soil in part shade. (5-7) 25cm.
Potentilla alchemilloides		Good rock garden or front of the border plant with pleated alchemilla leaves silvery beneath. Large WHITE cup-shaped flowers are freely produced all summer on branching stems. Fertile well drained soil in sun or part shade. 30x45cm.
Potentilla andicola	£4.20	South American species, with mats of deeply-cut, dark green, strawberry-like leaves. Upright stems carry sprays of golden-yellow flowers during late summer. Retentive, well drained soil in sun or part shade. (7-8) 45cm.
Potentilla arguta	£4.20	(coll:-Illinois). Rare in cultivation this is an erect plant making clumps of divided, finely toothed, hairy leaves. Clusters of CREAMY-WHITE flowers are freely produced from mid to late summer. Fertile well drained soil in sun. 60x60cm.
Potentilla atrosanguinea	£4.20	Attractive, silver, lobed leaves make a low clump topped by masses of brilliant red, strawberry-like flowers on branching stems; June & July. Any well drained soil; best in full sun. 40x60cms.
Potentilla atrosanguinea yellow flowered	£4.35	
Potentilla 'Etna'	£4.50	Lovely old hybrid, with cup-shaped deep-maroon red flowers on branching stems. Carpets of strawberry-like green leaves. Rarely seen now as it is slow to propagate. Well drained soil in sun or light shade. (5-7) 45cm.

Potentilla 'Fireflame'	£4.60	Large, glowing, semi-double orange-red flowers on branched stems. Carpets of strawberry-like silver-grey leaves. Well drained soil in sun or part shade. (6-8) 30cm.
Potentilla 'Flamboyant'	£4.50	Bred by Marco van Noort, this has branching stems carrying semi-double, rich crimson-red flowers from mid to late summer. Mounds of toothed, silver-green, strawberry-like leaves. Retentive, well drained soil in sun or part shade. (7-8) 40cm.
Potentilla hippiana	£4.50	Wild collected near Calgary, this spreading perennial has rosettes of pinnate, intensely silver-haired leaves. Heads of canary-yellow flowers on wiry stems throughout summer. Easily grown in any reasonable soil in sun or part shade. (5-8) 20cm.
Potentilla x hopwoodiana	£4.60	A lovely old hybrid, rather straggly, but giving a wondrous show of peachy-pink, red eyed flowers all summer. Needs good drainage & good living. (6-8) 45cm.
Potentilla x hybrida 'Jean Jabber'	£4.35	Branching stems with terminated with clusters of cup-shaped, butter-yellow flowers marked scarlet; midsummer. Mats of strawberry-like, serrated, silver-green foliage. Fertile, well drained soil in sun. 45x45cms.
Potentilla megalantha (AGM)	£4.20	(syn.P.fragiformis) Small clusters of thick textured, large, single, deep golden yellow flowers; July to September. Forms attractive, evergreen carpets of deeply cut leaves covered in silky hairs. For a well drained soil in full sun. 30x30cms.
Potentilla 'Melton'	£4.20	Probably a nepalensis hybrid, with mats of large, strawberry-like leaves. Sprays of small, cup-shaped strawberry-pink flowers with a yellow flush & red eye. Flowers early summer. Well drained soil in sun or part shade. (7-8) 30cm.
Potentilla 'Mont d'Or'	£4.20	atrosanguinea hybrid with mats of strawberry like intensely silver leaves. Sprays of double golden yellow flowers over a long period;- June to August. Excellent edger for any reasonable soil in sun or part shade. (6-8) 30cm.
Potentilla nepalensis Miss Willmott' (AGM)	£4.20	Well covered in ROSE-PINK, strawberry-like flowers; June to September. Well branched stems with green, lobed, strawberry-like leaves. Best in full sun & well drained soil. 30cms.
Potentilla nepalensis 'Ron McBeath'	£4.20	A more compact form collected by Rom McBeath of Edinburgh Bot.Gdn in Nepal. Mats of small, strawberry-like leaves & beanchded stems with sprays of small, rich cerise flowers, with a cherry-red eye, throughout summer. Retentive, well drained soil in sun or part shade. 30c
Potentilla nepalensis 'Roxana'	£4.20	Well clothed in strawberry-like OARNGE-YELLOW flowers with a darker eye; June to September. Good, well branched perennial with lobed, green leaves. Best in full sun & well drained soil.
Potentilla nepalensis 'Shogran'	£4.20	Very dwarf, compact form, forming mats of ground-hugging, silver-grey leaves. Clusters of small, cup-shaped glowing cerise-pink flowers. with a red eye. Nam3d after the Himalayan village where it was found. Well drained soil in sun or part shade. (6-8) 20cm.
Potentilla palustris	£4.20	An unusual bog loving species with long, trailing stems with strawberry-like leaves. Heads of soft plum-purple flowers held in reddish calyces. Needs a permanently moist site in sun or part
Potentilla recta sulphurea	£4.20	syn.pallida. More upright in habit, this has branched sprays of bowl-shaped, pale moonlight-yellow flowers over a long period throughout summer. Strawberry-like, haired leaves. Retentive, well drained soil in sun or light shade. (6-9) 60cm.
Potentilla x tonguei (AGM)	£4.20	Charming sprays of small apricot-crimson flowers; July to September. Excellent ground cover forming lush carpets of bright green, cinquefoil foliage. Well drained sunny position. 20x40cms.
Potentilla 'Volcan'	£4.50	Clusters of double, clear red with a darker centre; all summer. Lovely front of border perennial making spreading clumps of strawberry-like, divided leaves. Fertile well drained soil in sun.

Potentilla 'Yellow Queen'	£4.20	Deciduous clump former with sprays of cup-shaped rich golden-yellow flowers throughout summer. Mats of strawberry-like silver-grey leaves. Good ground cover or well drained soil in sun or part shade. (6-8) 40cm.
Primula alpicola (AGM)	£4.50	A shorter bog Primula with nodding heads of slightly bell shaped rather variable flowers, often purple, occasionally white or reddish;- late spring a early summer. Basal rosettes of coarse green leaves. Retentive soil in sun or part shade. (5-6) 50cm.
Primula alpicola alba	£4.50	Bog primula with nodding, one sided spikes of soft scented creamy-white flowers on bare stems;- May & June. Rosettes of crenated leaves wither at flowering. Retentive or moist soil in sun or part shade. (5-6) 40cm.
Primula alpicola 'Kevock Sky'	£4.80	Selected from wild Chinese seed & breeding true, this has umbels of nodding, fragrant, pale mauve-purple flowers in early summer. Rosettes of crinkled, basal leaves. Retentive or moist soil in sun or prt shade. (6-8) 45cm.
Primula aurantiaca	£4.15	Unusual species from Yunnan with whorls of soft-orange flowers from orange-red buds;- early summer. Rosettes of elliptic leaves, often covered in a white farina. Retentive or moist soil in sun or part shade. (6-7) 40cm.
Primula auricula 1-2-3'		Auricula.
Primula auricula 'Angostura'		(Double Auricula) Rather unusual deepest purple flowers, the tips fading almost black as they age. The outer petals open flat to reveal a small portion of the yellow & white centre. Flowers mid to late summer. Smooth soft green leaves. Hardy but dislikes excessive winter wet. Best in part shade. (4-5) 10cm.
Primula auricula 'Arundell'		Sweetly scented, light green flowers with irregular reddish maroon striping. Large white ring around the small gold eye. Rosettes of smooth grey green leaves. Free draining soil in light shade. (4-5) 10cm.
Primula auricula 'Astolat'		Sage green glowers with a broad crimson-red ring around prominent white eye;- spring. Rosettes of fleshy grey-green leaves. Best in a sharply drained soil in part shade. 93-5) 10cm.
Primula auricula 'Beeches Variegated' (v)		A seedling which arose here, a sport of 'Piers Telford'. The flowers are the same, rich rusty orange flowers suffused brown at the centre. Large gold eye. The light green leaf are randomly mottled with streaks of cream.Free draining soil in dappled shade. (3-5)
Primula auricula 'Blush Baby'		(Striped Group) Heads of rather sombre, dark cherry-red flowers with grey striped radiating from the outside of the petals. Creamy eye around the yellow centre. Fresh-green leaves with small amounts of farina. (3-5) 10cm.
Primula auricula 'Brazil'		Single, glowing, rich gold flowers with a large central white ring around the gold eye;- April & May. Basal rosettes of smooth, grey-green leaves. Free draining soil in light shade. (4-5) 10cm.
Primula auricula 'Chorister'		Deep mustard yellow flowers with a white central ring around the gold eye;- April & May. Basal rosettes of smooth grey-green leaves. Free draining soil in light shade. (4-5) 10cm.
Primula auricula 'Dusty Miller'		(Border Auricula) Good, old garden variety with unusual, dusky orange-red flowers of an antiqued hue, from March to May. The leathery, spathe shaped leaves are covered in a white farina. One of the better ones for the open garden. (3-5) 10cm.
primula auricula 'Gizabroon'		(Show Auricula) Striking blood red flowers with a pristine white eye & small gold centre from March to June. Spathe shaped smooth green leaves are covered in a white farina. Needs a sharply drained soil in part shade. (3-5) 10cm.
Primula auricula 'Gleam'		Single, rich yellow flowers with a contrasting white ring around the small gold eye. Flowers;- April & May. Rosettes of smooth, grey-green leaves. Free draining soil in light shade. (4-5) 10cm.

Primula auricula 'Greendfield's Fancy'		Showy, sage-green flowers with almost crystalline highlights around a burgundy red ring & pristine white centre, held on short stems in spring. basal rosettes of smooth, soft green leaves. Lightly shaded, well drained spot. (3-5) 15cm.
Primula auricula 'Hyacinth'		Attractive hybrid with soft purple-blue flowers, having a small white eye, flowering very early, often from March. Rosettes of smooth green leaves. Needs a sharply drained soil in dappled shade. (3-5)
Primula auricula 'Jupp'		Hardy garden variety with rather unusual double soft lilac flowers covered in a fine peppering of purple speckles. Creamy white eye. Flower March to June. Retentive, well drained soil in sun or part shade. (3-6) 10cm.
Primula auricula 'Karen Cordrey'		Single, dark red & mustard green striped flowers with varying degrees of striping in each flower. Lrge white centre & gold eye. Flowers ; - April & May. Rosettes of smooth grey-green leaves. Free draining soil in light shade. (4-5) 10cm.
Primula auricula 'Lucy Lockett'		Good sized soft creamy yellow flowers with buff overtones, fading parchment white as they age. Flowers mid to late spring. The oval leaves are covered in a fine powdery white meal.Hardy but dislikes excessive winter wet. Best in dappled shade. (4-5) 10cm.
Primula auricula 'Matthew Yates'		Showy form with fully double, darkest purple, almost black flowers which just open enough to show the yellow stained bases. Flowers April-May. Grey-green, smooth toothed leaves. Free draining soil in light shade. (4-5) 10cm.
Primula auricula 'Merlin'		Semi-double, light green flowers with a broad, irregular burgundy red striping down the petals. Slight scebnt. Smooth rosettes of toothed, grey-green leaves. Free draining soil in light shade. (4-5)
Primula auricula 'Noelle'		(Show Auricula) Rather unusual form with almost pentagonal flowers with a burgundy-red centre bleeding out into the wide silver edges. Basal rosettes of silver-green leaves. Needs a gritty, retentive soil with some shade. good in pots. (4-5) 10cm.
Primula auricula 'Pot o' Gold'		Single, deep golden-yellow flowers contrast superbly with a the central white ring around the small gold eye. Flowers;- April & May. Rosettes of grey-green leaves. Free draining soil in light shade. (4-
Primula auricula 'Redstart'		A show auricula with rich red flowers covered in a silvery grey 'meal'. White centre. Flowers spring. Rosettes of fleshy grey green leaves. Well drained soil in dappled shade. (3-5) 10cm.
Primula auricula 'Xavier'		European variety with double, rich velvety purple flowers with just patches of the yellow & white centre showing through the petals. Smooth green leaves. Good garden variety. Well drained soil in sun or dappled shade. (4-6) 10cm.
Primula auricula 'Taffeta'		Show Auricula. Rather unusual single deep lavender-pink flowers with a bloomy white eye ; - May & June. Basal rosettes of crimped, smooth green basal leaves. Dislikes excessive winter wet. Well drained soil with some shade & excellent drainage. (4-5) 10cm.
Primula auricula 'Trojan'		Single, soft silvery jade-green petals stained with irregular burgundy ring around the large white centre. Flowers April & May. Basal rosettes of smooth, light green leaves. Very hardy but dislikes excessive winter wet. Gritty soil in light shade. (4-5) 10cm.
Primula 'Barbara Midwinter' (prim)	£4.80	Pleasing little creeping primrose with mats of toothed fresh green leaves held on striking red stems. Light purple flowers with notched petals around a white eye;- Late winter. Retentive, never too dry soil in part shade. (1-4) 10cm.
Primula beesiana	£4.15	Long, upright stems with whorls of ROSE-CARMINE flowers with a yellow eye; May to July. A lovely Chinese bog primula forming a basal rosette of oval leaves. Moist soil in sun or shade. 60x30cms.
Primula 'Buckland Wine'	£4.50	Attractive primrose with bronze-purple tinted leaves. Cherry-red flowers with a yellow eye, paler at the margins, throughout spring. Best in a retentive soil in part shade. (3-5) 10cm.

Primula burmanica	£4.50	A bog primula forming rosettes of large green leaves. Purple flowers with a gold eye are produced in whorls. Moist soil in sun/shade. 60x30cm. Flowers: July-September.
Primula chungensis	£4.50	(Candelabra Group) Chinese species with rosettes of crinkled, toothed, thin textured leaves. Whorls of long tubed, pale orange flowers from scarlet buds during early summer. Moist soil in part shade is best. (5-8) 60cm.
Primula cockburniana (AGM)	£4.50	Small candelabra primula, with slender stems holding whorls of small red tinged, mid-orange flowers. Small rosettes of mid-green crinkled basal leaves. Not as robust as most bog primulas. Moist soil in part shade. (6-7) 40cm.
Primula denticulata (AGM)	£4.20	Sturdy stems topped with large, rounded, drumstick-like flower heads of blue, violet, white or red. Basal rosettes of crisp, fresh-green leaves. Reasonably moist soil in part shade. 30cms. Flowers: Spring
Primula denticulata 'Bressingham Beauty'	£5.65	Selected at Bressingham, this shorter form has a densely packed, rounded umbels of cream eyed soft lavender flowers;- April & May. Rosettes of crinkled soft green leaves. Any reasonable soil in sun or part shade. (3-5) 25cm.
Primula denticulata 'Confetti Blue'	£4.20	Seed raised strain, a little variable but all good. Bare stems carry large, rounded heads of densely packed, sky-blue flowers with a white eye, during mid to late spring. Basal rosettes of crenated leaves. Retentive, even moist yet well drained soil in sun or part
Primula denticulata 'Glenroy Crimson'	£4.20	(Denticulata Group) A choice named hybrid of this moisture loving primula. Dense leafy clumps of toothed leaves with leafless stems holding rounded densely packed heads of rich crimson flowers which emerge with the new leaves in spring. Part shade. 30x30cm.
Primula 'Don Keefe' (prim)	£4.20	Striking primrose with the most intense scarlet red flowers with a tiny yellow eye from May to June often intermittently at other times. Rosettes of crinkled, dark green leaves. Retentive soil in sun or shade. (3-6) 10cm.
Primula florindae (AGM)	£4.50	Tall stems topped with a crown of up to 40, fragrant, drooping, funnel-shaped, soft citrus-yellow flowers; July to September. Basal rosettes of ovate, mid-green leaves. Must have moisture and shade. 60cms.
Primula 'Francisca' (prim)	£4.50	Truly remarkable form of primrose with frilly, single, apple-green flowers with a paler, slightly yellow tinged centre;- late spring. The crisp leaves are deeply veined. Retentive, well drained soil in sun or shade. 10x30cm.
Primula 'Gigha' (prim)	£4.50	Very rare in cultivation, this pure white flowered form of our native primrose originates on the island of Gigha off the coast of Scotland. As all the flowers are thrum it is infertile. Retentive soil in dappled shade is best. (2-4) 15cm.
Primula 'Groenekan's Glorie' (prim)	£4.50	Old Dutch hybrid with small rosettes of coarsely crinkled dark green leaves. Shorts stems with deeply notched lilac-pink flowers with a small white halo around a tiny gold eye, early to mid spring. Retentive, well drained soil in dappled shade is best. (2-5) 10cm.
Primula 'Hall Barn Blue'	£4.35	Stunning old hybrid of uncertain origin. Short stems carry rather small, mid-blue flowers with a tiny burgundy halo around the yellow eye. Flowers mid to late spring. Tight rosettes of glossy green leaves. Retentive soil in sun or shade. (2-5) 10cm.

Primula heucherifolia	£4.50		From Eastern Himalayas & SW China, this is very Cortusa like. Basal rosettes of almost rounded, hairy, scallop-shaped leaves. Short stems carry narrowly tubular, one sided umbels of rich magenta-pink flowers during early summer. Best in a cool, humus rich, woodland soil in part shade. (5-7) 30cm.
Primula hirsuta red flowered	£3.80		Although more correctly claret-red this attractive primula should be treated as an auricula. Rosettes of toothed fleshy green leaves. Heads of flowers with a prominent white eye from February to May. Likes a retentive soil in part shade. (2-4) 10cm.
Primula 'Ingram's Blue' (prim)	£4.50		More like a an old Polyanthus with taller stems having nodding heads of intense violet-blue flowers, with a small yellow eye, held on long stalks during spring. Rosettes of green crinkled leaves. Not often seen hybrid for a retentive soil in part shade. (2-5) 15cm.
Primula 'Inverewe' (AGM)	£8.80		Stiff stems with whorls of candelabra-like, vivid orange-red flowers; May-June. Basal clumps of ovate, mid-green leaves. Grow in humus-rich, moist shade or woodland conditions. Ht: 75cms.
Primula 'Iris Mainwaring'	£4.50		Old hybrid with simple, lilac-pink flowers with a fine deckled white edge. Small yellow eye. Flowers throughout spring. Neat basal rosettes of glossy green leaves. Retentive soil in sun or shade. (2-5) 10cm.
Primula japonica 'Miller's Crimson' (AGM)	£4.50		A Japanese bog primula the upright stems carrying whorls of large, magenta-red flowers; April & May. Large rosettes of green leaves. Best in part shade in heavy soil. 60x30cm.
Primula japonica 'Postford White' (AGM)	£5.75	2.00	(Candelabra Primula) A lovely bog primula with the white flowers arranged in whorls up the stems. Better grown in part shade as the flowers bleach in the sun. Needs a rich moist soil. 50x30cm. Flowers: June-July
Primula japonica 'Valley Red'	£4.50		Bog primula with erect stems carrying whorls of deep pinkish-red flowers with a yellow eye;- early to midsummer. basal rosettes of caorse leaves. Retentive or moist soil in sun or part shade. (5-6) 45cm.
Primula 'Kusum Krishna'			Wharfedale Bluebell' x marginata 'Linda Pope'. A strange hybrid of the auricula group, although not technically one. Rosettes of grey-green, wavy margined leaved with white farina on the edge. Heads of striking violet-blue flowers with a white eye, during spring, often repeating through summer. Treat as an auricula. (4-8) 10cm.
Primula 'Lady Greer' (AGM)	£3.85		Unusual veris x elatior hybrid, with mounds of wrinkled dark-green leaves covered in small, primrose-yellow fringed flowers in late winter & early spring. Retentive soil in sun or shade. (2-4) 10cm.
Primula 'MacWatt's Cream' (prim)	£3.75		(Polyanthus group) Condensed mat former, with rosettes of ground hugging, dark-green, deeply veined leaves. Umbels of slightly nodding cream flowers during early spring. Rich, retentive soil in sun or part shade. (3-4) 10cm.
Primula melanantha 'Moonshine'	£4.80		From Eastern tibet, this is truly a magnificent Primrose. Whorl of long tubed, intense black flowers covered in a powdery farina. Basal rosettes of smooth green leaves. Was known as euprepes. Likely to be very challenging. Retentive, sharply drained soil in part shade. (4-5) 10cm.

Primula munroi yargongensis	£4.50	Choice plant native of moist places. Basal rosettes of crinkled lance-shaped leaves topped by 30cm. stems with umbels of large, PURPLE FLOWERS WITH A WHITE-RINGED, YELLOW EYE. Retentive, yet drained soil in sun or part shade. 30x30cm. Flowers: Late Spring.
Primula 'Old Port' (prim)	£4.50	A very old selection of polyanthus with striking, rich port red flowers with a gold eye;- early to late spring, nestling in the crown of the rosette of basal leaves. Retentive , well drained soil in sun or shade. (2-5) 10cm.
Primula palmata	£4.50	From Sichuan, this creeping woodland species has the most handsome,. palmate, deeply dissected, softly hairy leaves. Short stems with starry rose-purple flowers with a large white eye, during late spring & early summer. Likes a cool, moist, woodland soil in part or full shade. Tricky. (5-6) 15cm.
Primula polyneura	£4.80	(cortusoides group) Variable Chinese species, best grown in retentive soil in part or full shade. Basal rosettes of almost rounded, soft green, deeply veined leaves. Whorls of red-purple to pink flowers in late spring & early summer. (5-7) 30cm.
Primula x pubescens 'Bewerley White'		Looking much like an auricula, this has evergreen rosettes of smooth, pale-green, fleshy leaves. sprays of pale moonlight-yellow flowers are freely produced in mid spring. Well drained soil in sun.
Primula pulverulenta (AGM)	£5.45	Heavily powdered stems carry whorls of red flowers with a darker eye; April-May. Large rosettes of long, oval leaves. Wet, humus-rich soil in part shade. 50x30cms.
Primula serratifolia	£4.50	Chinese collection with rosettes of dark green, deeply veined leaves. Small clusters of narrowly bell-shaped nodding yellow flowers with an orange central vein, white at the edges;- early summer. From moist wet woodland. Needs skill. (5-6) 30cm.
Primula sieboldii 'Beeches Star'	£4.80	Selected here this distinctive hybrid has narrow, rather ragged tipped petals of bright cerise-purple flowers with a distinct star like white pattern at the centre. The flower fades pinkier with age. Rosettes of scallop shaped leaves. Summer dormant. (3-5) 25cm.
Primula sieboldii 'Blue Lagoon'	£5.80	Simple, light lavender-blue flowers with a small star shaped white centre in late spring & early summer. Creeping root with softly hairy, pale green crinkled leaves. Best in retentive soil in part shade. (3-5) 25cm.
Primula sieboldii 'Frilly Blue'	£5.65	Gently creeping woodlander with very finely cut, almost frilly cool lavender-blue flowers in late spring. Rosettes of deeply veined basal leaves. Needs a cool, moist woodland soil in part shade out of cold winds. (4-5) 30cm.
Primula sieboldii 'Geisha Girl'	£5.80	Good sized soft pink, rather gappy flowers with a white starry centre;- April & May. Rosettes of apple green toothed leaves. Best in a cool, moist woodland soil in part shade, out of cold winds. (3-5)
Primula sikkimensis (AGM)	£4.50	Elegant, tall stems carry umbels of numerous pendent, white, yellow or cream funnel-shaped flowers to 2.5cm across; late spring. Basal rosettes of lance-shaped, shiny, pale green leaves to 30cm long. Humus-rich, moist soil in dappled shade. To: 90x60cms.
Primula 'Tatyana'	£4.80	Unusual hybrid with intense purple-pink flowers having a fine central white stripe. Blood red central zone around the yellow eye. Purple-red stems. Small rosettes of deeply crinkled leaves. Best in retentive soil in sun or shade. (3-5) 10cm.
Primula 'Theodora'	£4.50	Can be traced back to Norfolk in the 1940's this distinct form has a profusion of good sized, vibrant mauve-pink flowers with a yellow eye, during spring. Rosettes of deeply veined, glossy green leaves. Retentive soil in sun or shade. (2-5) 10cm.

Primula 'Tomato Red' (prim)	£4.50	An old variety from Champernowne, possibly renamed from 'Sunset Glow' or 'Afterglow'. Clusters of strange orange-red flowers with a yellow eye, sometimes more yellow when grown in shade. Flowers throughout spring. Tiny rosettes of glossy green leaves. Retentive soil in sun or shade. (2-5) 10cm.
Primula veris (prim) (AGM)	£3.80	Native species with clusters of deep yellow stained red heads on upright stems; April-May. Rosettes of crisp, veined leaves. Sedd raised. Any local, retentive soil. Best in part shade. Ht: 10cms.
Primula veris 'Cabrillo' (prim)	£4.20	In this selected form, the dense heads of cup-shaped yellow flowers have a distinct ring of five golden-orange blotches in the throat;- held on bare stems in spring. Rosettes of coarse basal leaves. Retentive soil in sun. (3-4) 30cm.
Primula veris 'Katie McSparron' (prim)	£4.20	Never common in cultivation, this very slow growing double form of our native cowslip has small, pom pom like yellow flowers, like small roses, held on very short stems in spring. Basal rosettes of coarse green leaves. Never too dry soil in sun/pt.sh. 10cm
Primula veris 'Vajen'	£4.20	Not sure this is totally a cowslip hybrid, but attractive nonetheless. Heads of small, upward facing cream flowers with a contrasting large, yolk yellow eye, during early to late spring. Basal rosettes of crinkled, basal leaves. Retentive, even moist soil in sun or shade.
Primula vialii (AGM)	£4.50	Unusual Chinese species with stiff stems carrying dense, conical flower spikes of VIOLET BLUE from a BRIGHT CRIMSON CALYX; summer. Clumps of upright leaves. Cool, moist soil in part shade. 30cms.
Primula vulgaris 'Drumcliff'	£4.20	(Kennedy Irish Series) This modern primrose forms rosettes of dark olive-brown leaves. The flowers initially emerge palest lavender, quickly fading pure-white, over a long period through late winter & spring. Best in a retentive soil in sun or shade. (2-5cm.
