

Valeriana officinalis	£4.20	Upright, branching, fleshy stems topped with rounded heads of salver-like white or pink flowers; throughout summer. The pinnate, lance-shaped, fleshy, bright green leaves are aromatic. Any reasonable soil in sun or part shade. Ht: 1.2-2m. Native & Europe.
Valeriana pyrenaica	£4.80	An unusual valerian with large rounded toothed leaves. Strong stems carry flat heads of PINK & WHITE BI-COLOURED FLOWERS. For shady not too dry sites. 110x60cm. Fowers: May-
Veratrum album 'Auvergne White'	£7.80	Selected in France, this has very impressive spikes of tiny, starry snow white flowers in large, airy plumes, during midsummer. Basal rosettes of large, rounded, heavily pleated pale-green leaves. Beware of slugs. Humus rich, retentive soil in sun or part shade. (7-
Veratrum album lobelianum	£7.50	Big, bold, slow growing species forming rosettes of broadly elliptic, pleated, fresh-green leaves. Large, pyramidal spike of small, starry, greenish-white flowers;-early to midsummer. Best in woodland soil in moist shade. (6-7) 200cm. BEWARE OF SLUGS!
Veratrum album 'Lorna's Green'	£7.80	Unusual form of album with spikes of rather drooping greenish-yellow flowers from July to August. Basal rosettes of large, pleated leaves. Slug heaven so protect. Best in a retentive, well drained soil in sun or part shade. (7-8) 200cm.
Veratrum californicum	£7.50	Rarely sen in cultivation, this forms spectacular rosettes of deeply veined, elliptic to lance shaped, fresh green leaves. Woolly spikes of green to off white flowers, in a pyramidal plume, during late summer. BEWARE OF SLUGs. Slow to maturity. (7-9)200cm
Veratrum maackii	£7.75	
Veratrum maackii green-flowered	£7.80	Unusual green flowered form of this robust species. Basal rosettes of broad, light green, pleated leaves. Tall stems carry open spikes of very small, yellowish-green flowers during mid to late summer. Protect from slugs. Retentive, well drained soil in sun or part shade. (6-8) 120cm.
Veratrum viride	£7.50	Much sought after slow clump forming plant. Large pleated fresh green leaves & dense spikes of small starry green flowers on tall stems; summer. Retentive partly shaded site with heavy feeding for best results. 120x60cm.
Verbascum chaixii 'Album' (AGM)	£4.20	Rosette forming semi-evergreen, with spikes of saucer-shaped white flowers with purple stamens in slender panicles on white wolly stems. Rosettes of grey-green basal leaves. Poor, well drained soil in full sun. (7-9) 90cm.
Verbascum chaixii 'Wedding Candles'	£4.20	Stately perennial with long, unbranched spikes of pure white, bowl shapedflowers with purple filaments & orange anthers during summer. Rosettes of grey-green leaves. Soundly perennial in light, well drained soil in sun. (6-8)100cm.
Verbascum 'Christo's Yellow Lightning' (AGM)	£4.50	Huge, soundly perennial hybrid from Great Dixter, with impressive spikes of rich yellow flowers, with many small side spikes adressed to it, making it very impressive. Rosettes of grey-green leaves. Flowers July to September. Light, free draining, rather poor soil in sun. (7-9) 160cm.
Verbascum (Cotswold Group) 'Cotswold Queen'	£4.50	Tall spires of SOFT YELLOW-BROWN flowers. Basal rosette of woolly grey-green foliage. Free draining soil in sunny position. 1.2m. Flowers: July-August.
Verbascum (Cotswold Group) 'Gainsborough' (AGM)	£4.50	Elegant, cottage garden favourite with long spikes of palest moonlight yellow flowers with subtle cream filaments, over rosettes of grey-green leaves during summer. Light, free draining soil in
Verbascum lydium	£4.80	Little known Turkish species, found in pine forests. Basal rosettes of very silver grey, felted. Huge, airy, heavily branched stems with yellow flowers along their length, during summer. seems perennial to date. Light, free draining soil in sun . (6-8) 90cm.

Verbascum phoeniceum	£4.20		Tall spikes of cup shaped white flowers flushed pink with a purple eye. Flowers early summer. Handsome rosettes of basal leaves. Life expectancy is 2-3 yrs, but self seeds mildly. Well drained soil in sun. 120x60cm.
Verbascum pyramidatum	£4.20		Soundly perennial. Basal rosettes of narrow grey-green, downy leaves with wavy margins. Narrow spikes with cup-shaped YELLOW flowers & violet filaments in a dense wool; summer. Ordinary to poor, well drained soil in sun. HIGHLIGHTED IN OUR FRONT GARDEN. 120x45cm.
Verbascum 'Sugar Plum'	£4.80		Dwarf, soundly perennial selection with basal rosettes of woolly grey leaves. Short, densely packed spikes of soft plum-lilac flowers with a tiny tuft of purple filaments;- midsummer. Needs a poor, sharply drained soil in sun. (5-7) 50cm.
Verbena bonariensis (AGM)	£4.50		(syn.V.patagonica) Bold, spectacular back of the border perennial with heads of small, LAVENDER-BLUE, fragrant flowers on long wiry stems; June to September. Rough, dark green basal leaves. Often self-seeds. Sheltered well drained soil in sun. 150x60cms.
Verbena bonariensis 'Lollipop'	£4.50		Short, bushy form of this popular perennial with larger, plate like heads of soft lilac flowers, ageing with a bluish tinge;- June to the frosts. Plant in a very warm, sheltered spot in full sun. (6-10) 60cm.
Verbena 'Hammerstein Pink'	£4.20		Surprisingly hardy hybrid, forming low, spreading mats of finely cut, narrow leaves. Small clusters of bright pink flowers, held on long tubes, all summer & autumn. Not reliably hardy, but comes through most in a sheltered, well drained spot. (6-10) 30cm.
Verbena 'Homestead Purple'	£4.20		Recently found in a front garden in Georgia. Much like a bedding verbena but larger, flat heads of RICH MAGENTA-PURPLE flowers; from early summer to the frosts. Vigorous ground cover; hardy down to -10c. Well drained soil in sun or part shade.
Verbena hastata 'Alba'	£4.20		Flattened heads of pure white flowers; early summer to early autumn. Stiff upright perennial with dark green, toothed leaves. Moist, yet well drained fertile soil in full sun. 120x45cm.
Verbena 'Muriel'	£4.50		Perennial, slightly spreading hybrid with rich purple, domed heads of flowers, each with an almost black eye;- summer to the frosts. Hairy, lobed leaves on spreading stems. Sheltered, well drained soil in sun. (6-10) 30cm.
Verbena officinalis	£4.50		Hardy, airy perennial from S.Europe with glossy, deeply veined leaves. Branched stems carry, small stumpy spikes of lavender-blue flowers from midsummer into autumn. Best in a light, free draining soil in sun or light shade. (6-9) 90cm.
Verbena officinalis grandiflora 'Bampton'	£4.50		Very dainty, wispy, long flowering perennial with small heads of violet-pink flowers continuously through summer to the frosts. The leaves turn a rich purple in autumn. Creates a frothy effect in a light, free draining soil in sun or light shade. (6-10) 85cm.
Verbena stricta	£4.20		Erect stems with silver hairy, serrated leaves. Spikes of small lavender, purple flushed tubular flowers from midsummer through autumn. can hybridise with hastata, giving good hybrids. Retentive, well drained soil in sun. (6-9) 90cm.
Verbesina alternifolia	£4.50		From eastern USA, this tall, back of the border plant is possibly one of the best for bees. Willow stems with narrow leaves. Heads of 5cm, butter-yellow daisies with a green cone, from august, long into autumn. Easy in a retentive, well drained soil in sun or part shade. (8-11) 180cm.
Vernonia arkansana	£5.80	2.00	syn.Vernonia crinita. Tall, autumn flowering back of the border perennial from Eastern USA with flattened heads of small intense purple cerise rayless daisies, ageing rusty orange red, hence the common name. Alternate leaves turn rich yellow in autumn. likes long summers in a well drained spot in sun. Very tough. (8-10)

Vernonia arkansana 'Alba'	£4.80	This tall prairie plant can be 2mtrs in its native Illinois but is generally only a metre here. Very slowly forms clumps of thick stems with elliptic leaves. Flattened heads of starry white daisies age a rusty brown, hence the common name ironweed. Flowers late into autumn. Retentive soil in sun or part shade. (9-11) 120cm.
Vernonia arkansana 'Mammuth'	£4.80	Tall, easy to grow back of the border perennial with flattened heads of rayless daisy like rich purple flowers;- early autumn to christmas. Big clump former, initially slow but never invasive. Retentive, well drained soil in sun or part shade. (8-11) 200cm.
Vernonia baldwinii	£4.80	Tall, back of the border perennial with clusters of cornflower-like, rich purple flowers in tight heads during autumn. The toothed leaves take on yellow autumn colour at flowering for a contrast. Retentive, well drained soil in sun or part shade. 180x75cm.
Vernonia lettermannii 'Iron Butterfly'	£5.20	Selected from a rare Arkansas species, this tall perennial has whorls of very fine, needle like leaves. Flattened heads of rich purple-pink fluffy flowers, very late in autumn. Much loved by butterflies & bees. Very hardy in any reasonable soil in sun or part shade. A little slow initially. (9-11) 120cm.
Vernonia noveboracensis 'White Lightning'	£5.20	One of the last perennials to flower, this bold, back of the border plant has stout stems with elliptic, finely toothed leaves. Heads of small, fluffy, daisy like white flowers during October & November. Breeds true from seed. Retentive soil in sun or part shade. (10-11)
Veronica 'Amethyst Plume'	£4.80	A breakthrough in Veronica breeding as this has rather fat, well branched spikes of rich amethyst-purple flowers from late spring into summer. A shorter form for the front of the border. Retentive, well drained soil in sun or light shade. (5-7) 40cm.
Veronica 'Atomic Hot Pink Ray'	£4.20	Short, very floriferous form, unusual in the it has well branched narrow spikes of rich-pink flowers over a long period throughout summer. Can be effective in pots. Retentive, well drained soil in sun or light shade. (6-8) 35cm.
Veronica austriaca teucrium 'Lapis Lazuli'	£4.50	Low, spreading speedwell with trailing stems having finely toothed leaves. Short spikes of starry mid-blue flowers over a long period through summer. good edger for a light, free draining soil in sun. (6-8) 30x60cm.
Veronica austriaca teucrium 'Royal Blue' (AGM)	£4.20	Continuous succession of deep-blue hooded flowers in densely packed spikes on erect stems throughout summer. A bushy, spreading, ground coverer. Dry sunny site in a well drained soil. 30x60cm.
Veronica 'Charlotte'	£4.35	longifolia hybrid with slender erect spikes of narrowly tubular white flowers ;- June to August. Unusual silver-grey leaves have a broad, irregular silver-white edge. Needs good living to thrive. Best in a well drained soil in sun. (6-8) 70cm.
Veronica dabneyi	£3.85	Unusual, little hardy species from the Azores, with finely toothed, dark-green leaves on trailing stems. Short spikes of small, cup-shaped, pale-pink flowers with darker veining;- spring & summer. Hardy in a well drained spot in sun. (4-7) 15cm.
Veronica gentianoides (AGM)	£4.20	Graceful spires of dainty, pale blue flowers; April to June. Spreading rosettes of glossy, green leaves. Best in good, fertile soil in sun or light shade. 60x45cms.
Veronica gentianoides 'Robusta'	£4.20	Spikes of cup-shaped, clear light-blue flowers; early summer. An improved, strong-growing form with evergreen, glossy leaves in basal rosettes. Retentive YET well drained soil in sun or part shade. 45x45cm.
Veronica gentianoides 'Tissington White'	£4.20	Short spikes of cup-shaped, almost white flowers just flushed with the palest blue; late spring & early summer. Evergreen mat-former with rosettes of glossy, lance-shaped leaves. Slower spreading than the type. Well drained soil in sun. 45x45cms.
Veronica gentianoides 'Variegata'	£4.20	A low, mat-forming evergreen with broad, dark green leaves edged cream. Spires of palest blue flowers are an excellent foil in May & June. Moisture retentive, fertile soil in sun. 45x45cms.

Veronica grandis	£3.85	(syn.V.bachofenii) Rarely seen airy, tall border perennial with erect stems & broad serrated leaves. Delicate spikes of PALE LILAC-BLUE flowers are freely produced all summer. Well drained soil in sun. 100x45cm.
Veronica kiusiana	£4.50	Stout, upright stems lined with soft pink, saucer shaped flowers; June-July. Clump forming perennial with grey-green leaves. Reasonably drained soil in sun. Ht: 75cms.
Veronica 'Lavender Plume'	£4.20	A very distinct strain with multiple, erect fat spikes of rich lavender-blue flowers over a long period through early to midsummer. Strong stems with fine toothed leaves. Retentive, well drained soil in sun or light shade. (5-7) 45cm.
Veronica longifolia 'Antarctica'	£4.50	Very delicate, mid border perennial with long, narrow elegant spikes of two lipped palest icy-blue flowers, stained white;- midsummer. Glossy toothed leaves. Easy in a well drained soil in
Veronica longifolia 'Blauer Sommer'	£4.20	Long, narrow spires of single, bright blue flowers on upright stems. A good mid-border plant for retentive soil in sun. 90x90cms. Flowers: June-August
Veronica longifolia 'Blauriesen'	£4.20	syn Foerster's Blue. Upright perennial, with narrow spikes of cup-shaped, bright deep-blue flowers on unbranched stems. Pairs of pined, toothed, mid-green leaves. Bushier than the species. Fertile, well drained, retentive soil in sun. (7-9) 75cm.
Veronica longifolia 'Incarnata'	£5.65	Old cultivar, not often seen now with long, narrow, erect spikes of small, mid-pink flowers; midsummer. Loved by bees & offers an excellent vertical accent. Easily grown in any well drained soil, preferably in sun. (6-8) 90cm.
Veronica prostrata 'Goldwell'	£4.20	Gently creeping semi evergreen edger with the glossy green leaves edged gold. Short wispy spikes of cup-shaped rich blue flowers in profusion during late spring & early summer. Ideal for rockeries. Light, free draining soil in sun. (5-7) 10cm.
Veronica prostrata 'Nestor'	£4.20	Prostrate, spreading ground cover with trailing stems clothed in small leaves. Short spikes of sky-blue flowers with a navy eye during late spring & early summer. Often semi-evergreen. Well drained soil in sun or light shade. (5-7) 15cm.
Veronica 'Purpleicious Harmony'	£4.20	Compact form of spicata with broader, well branched spikes of rich purple flowers just above the toothed, narrow, dark green leaves. Good in pots. Light, well drianed soil in sun or light shade. (6-8)
Veronica 'Shirley Blue' (AGM)	£4.20	A compact, tussock forming plant for the front of the border. Numerous stems carry bright blue spires; June to August. Well drained soil in sun. 45x60cms.
Veronica spicata	£4.20	Tall spires of BRIGHT BLUE flowers; June to August. Fresh green, slightly toothed leaves. A compact perennial for the front of border. Well drained sunny position. 45x60cms.
Veronica spicata 'Alba'	£4.20	Densely packed erect spikes of pure white flowers flowers over basal clumps of grey green leaves. Sun lover for a well drained position. 45x45cm.
Veronica spicata 'Blue Carpet'	£4.20	Dense more or less evergreen mat former with dark green toothed leaves. Short, dense erect candle like spikes of mid blue flowers throughout summer. Good edger or rockery. Well drained soil in sun or light shade. (5-8) 30cm.
Veronica spicata 'Ulster Blue Dwarf'	£6.90	2.00 Dwarf Irish species, forming mats of grey flushed, toothed leaves. Narrow, erect spikes of deep, inky, violet-blue flowers during early summer. Good edger for well drained soil in a sunny site. (5-7)
Veronica 'Sunny Border Blue'	£4.20	Voted American perennial of the year in 1995. Showy erect perennial with dark green, wrinkled leaves. Short spikes of large, deep blue-violet flowers. If cut back will give a second flush. Ordinary soil in sun. 60x45cm. Flowers: May-July.

Veronicastrum 'Adoration'	£4.80	Good sized back of the border perennial, much like a large Veronica. Candelabra like spikes of small lilac-rose flowers in profusion during late summer into autumn. Slow to establish. Retentive soil in sun or part shade. (8-10) 160cm.
Veronicastrum villosulum	£4.95	Weak stemmed herbaceous scrambler or climber with small, rounded clusters of rich, violet-purple flowers in the leaf axils;- summer & autumn. Rounded, softly hairy leaves are held in pairs. Moist, well drained soil in sun or part shade. (6-10) 180cm.
Veronicastrum virginicum	£4.60	A good bold back of the border plant with erect stems & whorls of dark green toothed leaves. Spikes of tightly packed pale lilac flowers in tapering spikes in late summer. Fertile soil in sun or part shade. 120x60cm.
Veronicastrum virginicum 'Album'	£4.50	Bold upright perennial with clusters of tiny, closely set, PURE WHITE flowers in spikes; midsummer. Whorls of narrow leaves up the stems. Fertile soil in sun or part shade. 120x60cms.
Veronicastrum virginicum 'Cupid'	£4.80	Impressive, back of the border perennial with well branched, candelabra like spikes of wispy, rich lavender-purple flowers during late summer & autumn. Whorls of toothed leaves turn rich yellow in autumn. Fertile, humus rich, retentive soil in sun or part shade. (7-9) 120cm.
Veronicastrum virginicum 'Erica'	£4.50	Tall, back of the border perennial with large, branched spikes of small, soft-rose spikes of flowers opening from rose-pink buds;- late summer into autumn. Much like a supesize Veronica. takes time to establish. retentive soil in sun or part shade. 2.0m.
Veronicastrum virginicum 'Fascination'	£4.50	Long stems (to 1.5m) topped with generous spikes of pinky-lilac, veronica-like flowers; August. Dark stems neatly lined with whorls of pointed leaves. From Tom Der Linden's garden, Holland & named by Piet Oudolf. Humus-rich, moist soil in sun or part shade.
Veronicastrum virginicum 'Lavendelturm'	£4.50	Long narrow slender spikes of tubular lavender-blue flowers with protruding stamens; midsummer to early autumn. tall unbranched stems with toothed pointed leaves. Retentive humus rich soil in full sun. 150x75cm.
Veronicastrum virginicum 'Spring Dew'	£4.50	Elegant, back of the border relative of veronica, with long, narrow wispy spikes of pearly-white flowers opening from the base in late summer. Easily grown in well drained soil in sun or part shade. (7-8) 150cm.
Veronicastrum virginicum 'Temptation'	£4.35	Long, narrow spikes of loosely formed purple-rose flowers, with protruding stamens, opening from the base in midsummer. Whorls of dark-green, serrated leaves. Good accent plant for the back of the border. Retentive, well drained soil in sun. (6-8) 130cm.
Vincetoxicum fuscatum	£4.80	Rarely seen, small herbaceous species with simple pairs of leaves, topped by small heads of creamy brown, starry flowers, followed by showy rusty red seed pods;- late summer. Best in a woodland soil in part or full shade. (7-8) 50cm
Vincetoxicum hirundinaria	£4.75	For the collector only, this unusual small twining species has elliptic, leathery dark-green leaves. Clusters of yellow flushed white flowers, much like an Asclepias appear in the upper leaf axils during summer. Retentive soil in light shade. (6-7) 90cm.
Viola 'Belmont Blue'	£3.80	syn Boughton Blue'. Well scented, narrow petalled sky-blue flowers with a silvery sheen are freely produced in late spring & early summer. carpets of dark-green leaves. Retentive, well drained soil in sun. (5-7) 10cm
Viola 'Buttercup'	£3.80	Very small clump forming species smothered in small rich butter-yellow, well scented flowers all spring & summer if dead headed regularly. Any reasonable soil in sun or part shade. (4-8) 10cm.
6	£4.20	Small spring flowering sweet violet with rich pink, elegant flowers nestling amongst the heart-shaped leaves during early to mid spring. They have a light, sweet scent. They continue to produce seed throughout the summer without flowering. Best in a retentive, well drained soil in dappled shade. (2-4) 10cm.

Viola 'Carol Loxton' (Vt)	£4.20	Elegant, clear mid-blue single flowers with a white throat, veined purple. They are sweetly scented & nestle amongst the leaves during early to mid spring. Heart-shaped leaves. Retentive, well drained soil in dappled shade. (2-4) 10cm.
Viola 'Coeur D'alsace'	£4.20	(Sweet violet) Delicate, creeping ground cover for a partly shaded spot. Small, sweetly scented, dusky, purple-pink flowers nestle amongst the rounded leaves in spring. Retentive soil in part shade. 10x20cm.
Viola cornuta Alba Group	£4.20	Compact more or less evergreen ground cover, with sprays of chalky white scented flowers freely produced in late spring & throughout summer if deadheaded. Any reasonable soil in sun or shade. (5-8) 15cm.
Viola 'Dawnie' (Vt)	£4.20	From the national collection holders, this has rather dusky amethyst-plum flowers with narrow, slightly twisted petals, from February to April. Has a pleasing scent. Mats of heart-shaped leaves. Retentive, well drained soil in dappled shade. (2-4) 10cm.
Viola 'Emperor Blue Vein'	£3.60	sororia type viola with elegant, pure-white flowers, stained purple-blue in the throat with the veining bleeding into the flower. Flowers throughout spring. Vigorous, healthy clumps of heart-shaped, fresh-green leaves. Any reasonable soil in sun or shade. 10cm.
Viola 'Isabella' (Vt)	£4.20	A sport of Alice. Pale lavender flowers with permanently deeper veins. The buds are medium Blue. Very attractive, sweetly scented flower are held on long stems make it great for cut flowers. Mats of heart-shaped leaves. Retentive, well drained soil in dappled shade.
Viola 'Jack Sampson' (Vt)	£4.20	Well scented violet-blue flowers, held on slightly longer stems, just above the heart shaped leaves from March to May. They have a pleasant sweet scent. Retentive, well drained soil in dappled shade. (3-5) 15cm.
Viola 'Jean Arnot' (Vt)	£4.20	Old, historic variety with beautiful baby-pink flowers with a large white throat, during March & April. Has a fairly good scent. Mats of heart-shaped leaves. retentive, well drained soil in dappled shade. (3-4) 10cm.
Viola 'Mrs. Lancaster'	£3.90	Very compact, tidy viola with simple, single white flowers, held on dark flushed stems throughout spring & early summer. Prune hard for repeat flushes. Retentive, well drained soil in sun or shade. (4-8) 10cm.
Viola 'Mrs. Pinehurst'	£3.60	Very unusual odorata x sororia hybrid, intermediate between the two parents. Mats of rounded, glossy, heart shaped leaves with delicate rich purple flowers popping out between the leaves;- February to May. Semi dormant by late summer. Best in woodland soil in light shade. (2-5) 5cm.
Viola odorata 'Alba'	£4.20	Tufts of heart-shaped, fresh green leaves emerge in spring followed quickly by sweetly scented white flowers. Self seeds freely & true. Good for the wild & woodland garden where it naturalises freely. 20x30cm.
Viola odorata 'Miracle Bride White' (Miracle Series)	£3.80	A vigorous, disease free violet with faintly scented delicate white flowers nestling amongst the heart shaped fresh green leaves during mid spring. Best in retentive, well drained soil in dappled shade. (3-4) 10cm.
Viola odorata 'Miracle Magenta Red' (Miracle Series)	£3.80	Gives of profuse display of lightly scented flowers before the new leaves from early spring. They are followed by large, glossy, heart-shaped leaves. Best grown in a rich soil in light shade but very adaptable. (2-5) 10cm.
Viola 'Parchment' (Vt)	£4.20	Small sweet violet with rather unusual, soft dusky grey-purple flowers, stained purple at the eye, which nestle amongst the heart-shaped leaves during mid spring. Best in a retentive, well drained soil in dappled shade. (3-4) 10cm.
Viola 'Parme De Toulouse'	£4.20	(Double Parma Violet) Carpets of rounded, glossy leaves emerge in spring with the highly scented fully double, soft lilac-blue flowers nestling amongst them. Best in a woodland retentive soil in part or full shade. (3-4) 15cm.

Viola 'Phyl Dove'	£3.85		Originally found in a patch of sulphurea in Australia, this has delicate, slightly scented soft peachy orange-pink flowers hidden amongst the rounded leaves during February to April. Never too dry soil in dappled shade. 92-40 10cm.
Viola 'Princess Diana' (Vt)	£4.20		Old Sweet violet with good sized blush-pink flowers, becoming streaked deeper pink. The flowers are sweetly scented & nestle amongst the leaves from March to May. Mats of heart-shaped leaves. Retentive, well drained soil in dappled shade. (3-5) 10cm.
Viola 'Rebecca'	£3.90		The delicate-white flowers are heavily veined powder-blue & produced in succession all spring; if cut back will give a second show. Good mats of evergreen foliage. Ordinary soil in sun or part

Viola 'Titania' (Vt)	£4.20		(Sweet Violet) Small, late flowering sweet violet. Delicate blush-pink flowers, flushed deeper pink at the eye & on the backs of the petals. Flowers March to May. Mats of heart-shaped leaves. Only has a light scent. Retentive, well drained soil in dappled shade. (3-
Wachendorfia thyrsoiflora	£6.25	2.00	Spectacular subject for a warm border or pot with winter protection. Fans of spectacular pleated leaves. Long spikes of golden-orange flowers all summer. Hardy in the Southwest. Well drained soil in sun. (5-8) 180cm.
Waldsteinia fragarioides	£4.50		Delicate, creeping woodlander with strawberry like, toothed smooth green leaves. Sprays of small, cup-shaped yellow flowers which nestle amongst the leaves, during late spring & early summer. Excellent ground cover even for dry shade but adaptable to anything. (4-6) 20cm.
Waldsteinia ternata 'Mozaick'	£4.80		More or less evergreen creeping ground cover with the strawberry like, glossy green leaves irregularly blotched & mottled creamy-white. Cup-shaped yellow flowers through early summer followed by small red fruit. Easy ground cover for sun or shade. (5-7) 10x60cm.
Watsonia aletroides	£4.60		Unbranched spikes narrow, tubular pink-red flowers with narrow mouths. Clumps of erect sword-like leaves. Needs plenty of moisture in spring to induce flowers but needs to be dry the rest of the year. Will need protection in cold areas. (2-5) 60
Watsonia angusta	£4.25		A popular feature of the Cape fynbos with two raked spikes of glowing, narrowly tubular, orange-red flowers with striking black filaments;- late spring & early summer. Narrow, upright fans of grey-green leaves. Sheltered spot in sun. (6-7)120cm.
Watsonia borbonica 'Peach Glow'	£4.80		Tall, erect, bulbous plant from South Africa with fans of broad, leathery leaves. Tall stems with one sided spikes of flared, trumpet-shaped soft peachy apricot flowers during late spring & early summer. Needs moisture at flowering & a dry winter, in a sunny, sheltered spot. (5-7) 120cm.
Watsonia borbonica pink flowered	£5.55		One of the earliest to flower, this has two ranks of narrowly tubular, soft baby-pink flowers in spring. Erect fans of leathery, sword like leaves. Needs a sharply drained soil in a sheltered spot to thrive but plenty of moisture at flowering. (5-6) 75cm.
Watsonia brick red flowered	£4.95		South African cormous perennial reminiscent of pillansii types. Two ranked spikes of short, arching dark brownish brick-red flowers with flared mouths;- May & June. Lax more or less evergreen clumps of leathery strap like leaves. Needs copious moisture at flowering & dry the rest of the year in a sunny, sheltered spot. (5-7) 90cm.

Watsonia 'Dart Sea Trout'	£5.20	Seedling selected from the free flowering 'Tresco Dwarf Pink'. Spikes of long tubed, warm salmon-pink flowers in spaced spikes during early summer. Fans of broad, strap like leathery leaves. Multiplies well & a good flowerer. well drained soil in sun, needing moisture at flowering. (5-7) 90cm.
Watsonia knysnana	£5.20	Rare species from the Knysnana Hills of South Africa. Fans of sword like leaves are topped by spikes of flared, trumpet-shaped, reddish-orange flowers;-mid summer. Needs plenty of moisture at flowering but a sunny sheltered spot at othertimes. (6-7) 60cm.
Watsonia laccata pink flowered	£5.30	From high rainfall Fynbos, this species has one sided spikes of narrowly trumpet shaped spikes of warm-pink flowers from highly polished bracts;- May & June. fans of sword like leaves. Needs moisture to flower but need excellent drainage in a sunny, sheltered spot. (5-6) 75cm.
Watsonia lepida	£5.20	coll;- W Of Oliviershoekpass, 1700m. Kwazulu-Natal, Drakensbergs. In theory, one of the hardiest species & close to densiflora. Stumpy, dense spikes of arching, narrowly tubular, pink flowers;- early summer. Best in a scree bed. (6-7) 45cm.
Watsonia meriania	£4.60	Large species with branched spikes of flared, bright rose-red, tubular flowers during midsummer. Upright fans of broad, sword-like, dark-green leaves. Likes moisture at flowering but otherwise needs a warm, sheltered spot in sun. (6-8) 90cm.
Watsonia meriania bulbillifera	£4.60	Branched spikes of narrow, tubular bright rose-red flowers with spreading lobes. Small bulbils are produced which can be grown on to flowering size. Erect clumps of narrow leaves. Needs a dry site with plenty of moisture in spring. (7-9) 90cm
Watsonia 'Peachy Pink Orphan'	£4.95	Semi-evergreen, reminiscent of pillansii with two ranks of short, curved soft peachy pink tubular flowers in erect spikes in May & June. Leathery strap like leaves. Needs copious moisture at flowering but excellent darinage for the rest of the year. Sunny shletered spot. (5-6) 90cm.
Watsonia 'Pink Hybrid'	£4.60	Despite the rather prosaic name, this is a very distinct, tall, late flowering hybrid. Very long spikes of flared, intense cerise-pink retina tearing flowers during June & July. erect fans of leathery, sword like leaves. Moisture at flowering, dry in winter is desirable.
Watsonia 'Stanford Scarlet'	£4.95	An extremely vigorous hybrid with arching spikes of scarlet flowers with contrasting blue stamens. Fans of sword-like leaves. One of the hardier types. Retentive yet well drained soil with plenty of summer moisture. (6-7) 150cm.
Watsonia zeyheri	£4.80	Coastal species found along the South Coast of South Africa. Tall, widely spaced spikes of flowers ranging from soft to deep orange, usally flowering from late spring into summer. Fans of sword like leaves are summer dormant. One of the more tender
Wulfenia baldaccii	£4.50	Small evergreen alpine with basal rosettes of leathery, round lobed basal leaves. Whorled spikes of narrowly tubular, rich lilac-blue flowers during early to midsummer. From Albania. Retentive, free draining soil in sun or light shade. (5-6) 20cm.
Wulfenia carinthiaca 'Alba'	£4.50	
Wulfenia x schwarzii	£4.80	Hybrid between orientalis & baldaccii & assumed lost, but we have recovered it from Austria. Lax, basal rosettes of leathery, shiny, round lobed leaves. One sided, spike-like racemes of tubular, two-lipped, deep blue flowers. Fertile soil in sun. 15cm.
Ypsilandra cavaleriei	£5.65	Heloniopsis relative from China found in moist shady spots. Rosettes of symmetrical narrow strap like leaves. In spring produces a spike of white filaments & stamens radiating from the crown. Dislikes excessive neutrient in the soil. Cool moist shade.
Ypsilandra thibetica	£8.95	Unusual woodlander with rosettes of long, narrow, fleshy green leaves. Spikes of spidery white flowers mature dusky pink with age,, through spring into summer. There appears to be two forms in cultivation. Cool, moist woodland soil in pt/shade. 30cm.

Zaluzianskya 'Orange Eye'	£4.80	Strange South African alpine with creeping mats of unpleasantly scented small dark green toothed leaves. Short stems carry long tubed white flowers with a big orange eye, opening in the evening morning & very sweetly scented. Hardy but dislikes excessive winter wet. (4-8) 10cm.
Zaluzianskya ovata	£6.75	Small South African perennial with woody stems & slightly sticky leaves. From late spring, through summer there are white flowers which close in the heat of the day, but open in the morning & evening. They have a heady scent. When closed the reverses of the petals are bright red. Hardy to -5c in a sheltered, sunny spot.
Zantedeschia aethiopica 'Crowborough' (AGM)	£4.50	Probably the hardiest of all the Arum Lilies. Large, white spathes, with a yellow spadix, throughout summer. Bold, arrow shaped, glossy leaves form vigorous clumps. Retentive or moist soil in sun or light shade. Mulch well in cold winters. (6-9) 75cm.
Zantedeschia aethiopica 'Glencoe'	£5.20	Tall, very robust hybrid, bred from 'Crowborough' so one of the hardiest. Huge, pure white spathes on 1.5mtr stems from late May through July. Tall stems with large, smooth green, arrow-shaped leaves. Retentive to wet, even pond margins in sun. (5-7) 150cm.
Zauschneria californica 'Dublin' (AGM)	£4.50	Woody sub-shrub, with narrow, linear green leaves on woody stems. In autumn has long, narrow trumpet shaped orange red, tubular flowers at the tips which in the wild are pollinated by hummingbirds. Sharply drained soil in a sunny sheltered spot. 30x45
Zephyranthes candida	£4.60	Probably the hardiest species. Small bulbous perennial with crocus-like white flowers over clumps of narrow, grassy leaves. More or less hardy & multiplies well. Warm, sheltered, gritty, well drained spot in sun. (7-9) 15cm.
Zephyranthes citrina	£4.20	Short spikes of goblet-shaped crocus-like golden-yellow flowers in late summer. Narrow, erect deep-green grassy leaves. Marginally hardy in a sheltered, gritty, well drained spot in full sun. (7-9) 25cm.
Zephyranthes rosea	£4.20	Clusters of goblet-shaped, rather crocus-like rose-pink flowers with a yellow throat & stamens in late summer & autumn. Erect clumps of narrow grassy leaves. Very sheltered, gritty spot in full sun. (7-9) 15cm.
Zingiber mioga	£6.95	from Japan, this vigorous, spreading, clump former has upright stems with clasping fresh-green leaves. Small yellow flowers nestle near the base in summer. Needs a very warm, sheltered spot in sun. Good in pots. 45cm.
