

PRICE

<i>Actinidia arguta</i>	£9.60	Strong growing, twining deciduous climber from much of Asia & Siberia. Large, rounded, slightly downy leaves. The fruits are smaller than the normal supermarket kiwi's often with a red flush. They are totally edible & delicious. Easy in any reasonable soil in sun or light shade. Ht to 3.5mtrs
<i>Actinidia deliciosa</i> 'Tomuri'	£9.30	(Male) Deciduous climber bearing small clusters of creamy-white, fading to yellow, flowers; summer. Non-fruiting form. Bristly, brown-red stems and heart-shaped leaves. Sheltered site against a warm, sunny wall or cold greenhouse. Ht: to 10m.
<i>Actinidia tetramera</i> <i>maloides</i>	£8.45	Far superior to the better known <i>A.kolomikta</i> . Twining stems, with long, pointed, dark green leaves with a silver & cherry-pink tip. Burgundy red autumn colour. Insignificant flowers. Easily grown in a sheltered, well drained spot in sun/pt.sh. Ht to 3mtrs.
<i>Akebia trifoliata</i>	£9.45	Vigorous, evergreen twining climber. Oval leaves, held in whorled clusters of 3, opening bronze then turn a glossy, dark green. Hanging racemes of cup-shaped, purple flowers (to 12cm long) in spring followed by sausage-shaped, purple fruits. Fertile soil in sun. (5-6) ht to 10mtrs.
<i>Ampelopsis</i> <i>brevipedunculata</i> max.'Elegans'	£6.95	Rather weak, slow growing, twining, deciduous vine, making it ideal for growth in pots or where space is restricted. Five lobed, hop like leaves irregularly splashed & mottled pink & white. Insignificant flowers followed by porcelain blue berries in hot summers. Best in a warm, sheltered spot in sun. Ht to 3mtrs.
<i>Bignonia capreolata</i>	£9.10	Vigorous evergreen climber from Canada & eastern USA with clusters of good sized, trumpet shaped orange-red flowers, rather like <i>Campsis</i> , throughout summer. Lance shaped, wavy edged leaves. Needs a warm, sheltered spot in sun. Ht to 10 mtrs.
<i>Campsis radicans</i> 'Flamenco'	£12.55	Vigorous, deciduous climber bearing terminal clusters of brilliant scarlet & yellow, trumpet-shaped flowers; August & September. Well clothed in grey flushed, dark green leaves. May take 2-3 years to establish the clinging aerial roots. Sheltered site in fertile soil in sun. 10m.
<i>Campsis x tagliabuana</i> 'Madame Galen' (AGM)	£12.55	A tall, strong growing deciduous climber with slightly downy, pinnate leaves. Clusters of very large trumpet-shaped, salmon-red flowers are carried in clusters at the tips of the shoots; - late summer. Requires support. For a sheltered well drained site in full sun. (7-9) Ht to 7mtrs. Possibly the hardiest of the evergreen <i>ceanothus</i> . Medium to large
<i>Ceanothus</i> 'Autumnal Blue' (AGM)	£7.50	evergreen shrub with panicles of rich, sky-blue flowers in late spring with often a second flush in autumn.. The broad, rounded leaves are glossy green. Best treated as a wall shrub. Well drained sunny site. (4-5) (8-9) 2.5mx2.0m
<i>Ceanothus thyrsiflorus</i> 'Millerton Point'	£7.50	Strong growing, large, upright, evergreen shrub which can be trained against a wall or grown free standing. Small, glossy, mid-green leaves & large panicles of creamy-white, lilac like flowers at the tips; - late spring. Light, free draining soil in sun in a sheltered spot. (4-6) 3.5x3.0mtrs.
<i>Ceanothus thyrsiflorus</i> 'Skylark' (AGM)	£7.50	Large evergreen, upright shrub with larger, mid green, glossy leaves. Panicles of deep blue flowers late in the season from late spring to early summer. Best grown as a wall shrub with a south or west aspect. Light, well drained soil in sun (5-7) 3.0x2.0mtrs.

<i>Clematis 'Alita' (Vt)</i>	£9.95	viticella group. Rather a short viticella, often only to 1.2mtrs. Clusters of medium sized, almost true-red flowers over a long period from June to September. Hard pruning optional. Any aspect. Cool, moist root run. Can be grown in a pot. Ht to 1.4mtrs.
<i>Clematis alternata</i>	£11.00	Rare species from Tibet & Nepal. Large rehderiana like leaves. Nodding, narrow, bell-shaped, burgundy-red flowers with reflexed tips during autumn. Only hardy in very sheltered gardens on a warm wall. Retentive, well drained soil. Ht to 4mtrs.
<i>Clematis 'Andromeda' (EL)</i>	£8.00	(Florida) Large, wide open, white flowers with a prominent deep pink bar; May-June & autumn. Medium-size climber. Retentive, fertile soil - best in part shade to avoid bleaching. Ht: 2.5m.
<i>Clematis 'Anita' (Ta)</i>	£9.80	(Tangutica) Small, semi-nodding, pure white flowers from creamy-yellow buds; July - September. Prune hard to 45cms late February. Cool, moist root run. Any aspect. Ht: to 3.0m.
<i>Clematis 'Apple Blossom'(AGM) (Ar)</i>	£13.70	Beautiful, strong growing evergreen climber bearing clusters of white-shaded pink flowers April - early May. Leaves bronze-green when young. Warm, sunny sheltered wall. Ht: to 12m
<i>Clematis armandii</i>	£15.40	Superb, strong growing, evergreen species bearing scented, creamy-white flowers, 5cms across, in early spring. Best on a warm, sunny wall with a cool, moist root run. 4.0x3.0m. Flowers: April-early May.
<i>Clematis armandii 'Snowdrift'</i>	£13.70	Very strong growing evergreen with leathery, rather laurel-like leaves on vigorous stems. Clusters of strongly almond scented white flowers with propeller-shaped petals, from March To June. Likes a warm, sunny spot, out of cold winds to prevent leaf scorch. (3-6) Ht to 4.5mtrs.
<i>Clematis 'Ascotiensis' (LL)</i>	£8.45	Large, azure-blue flowers July-Sept. Very free flowering. Prune hard to 18' late February. Any aspect. Cool, moist root run
<i>Clematis 'Bees Jubilee' (EL)</i>	£8.00	(Patens) Mauve-pink with a deep carmine bar, May-June. Cut out old wood after flowering. Cool, moist roots. North, East or West aspects. Ht. 3m+.
<i>Clematis 'Blekitny Aniol' (AGM) (LL)</i>	£8.95	(syn.'Blue Angel') Abundance of medium-size, sky blue tepals with darker edges; July-Sept. Hard prune late Feb. Cool, moist root run with heads in sun or part shade. Ht: 3-4m.
<i>Clematis 'Blue Bird' (A)</i>	£9.80	(alpina gp.) A macropetala type with nodding heads of silvery-blue; April-May. Attractive foliage. No pruning required. Cool, moist root run. Any aspect. To: 4m.
<i>Clematis x cartmanii 'Joe' (Fo)</i>	£10.25	Bred by Joe Cartman in New Zealand, this small hybrid is a marmoraria x fosteri cross. Short stems with finely cut, leathery, olive-green leaves. Clusters of cup-shaped creamy greenish-white flowers throughout spring. Can be trained on a trellis or can trail over the edge of a pot. Sheltered spot in sun. (4-6) 35cm.
<i>Clematis x cartmanii 'Michiko' (Fo)</i>	£9.95	fosteri Group. Bred by Raymond Evison, this short form is covered in a vast profusion of single, small white flowers from March to May. Small, divided, evergreen, olive green leaves. Flowers April & May. Needs a warm, sheltered, well drained spot in sun. (4-5) Ht to 1.2mtrs.
<i>Clematis 'Cassis'</i>	£10.50	Evipo020PBR.
<i>Clematis cirrhosa 'Wisley Cream' (AGM)</i>	£13.55	Small, nodding creamy-white flowers, with a greenish tinge, held on long stalks during mild spells from November to February, on ripe wood. Scrambling, very finely cut, fresh green leaves. Flowers November to March. Needs a sheltered, warm sunny spot. No prune. Ht to 4.0mtrs.
